## Part C: Reading Comprehension

Speaking a foreign language is what most people want. Every year many people start learning one. Some people try at home with books and tapes. Some use the radio or TV programs; thousands go to evening classes. If they use the language only 2 or 3 times a week, it will take some time to learn a language, like language learning at school. Some try to learn a language fast by studying for 6 hours or more a day. Some travel to the country where the language is spoken to learn it. However, most people do not have enough money to go abroad. Some people need the language to do their work better. For example, students, doctors, and scientists need to read foreign books and reports. Others need it for some other purposes. Whether the language is learnt quickly or slowly, it is hard. Laboratories and good books and tapes will help, but nothing can be as effective as a good teacher.
