				s most effictively – for example, ports that have long rest periods	
יעטו					

Exercises that require total body involvement improve and maintain fitness most effictively – for example, jogging, running, swimming, cycling, and fast walking. Organized games and sports that have long rest periods within the play design haveonly a little influence on fitness. Programs especially planned to help individuals become fit are offered in different places: schools and gyms, private clubs and studio, and special, professionally organized clinics that pay attention to people with problems related to the heart or lungs. The individual must be careful in choosing an exercise program. The general rule is to exercise only until you feel very tired - that is, until breathing becomes labored, ciculation seems not enough, or tiredness influences performance. People with health problems caused by heart attacks, strokes, and illness should see a doctor before choosing an exercise programs.

22- According to the information in the passage, if you	participate ina sport that makes you have long rest periods,				
you					
1) Cannot expect your fitness improve much	1) Cannot expect your fitness improve much				
2) Should do your best to avoid total body involvement					
3) Need to exercise in different places in order to improve your fitness					
4) Had better do running, fast walking etc. during the rest period to keep your body warm and fit
