- 1) morally 2) gratefully 3) surprisingly 4) unconditionally

12- She had a very happy childhood, and I guess her confidence is a of that.

- 1) product 2) guide 3) duty 4) challenge

Passage 2

The dependence on motor vehicles has given rise to major problems, including environmental pollution, decrease of oil resources, traffic jams and safety-related issues.

While the pollutants from new cars are far less harmful than they used to be, city streets and motorways are becoming more crowded than ever. This problem makes the air quality unpleasant and sometimes dangerous to breathe.

Technical solutions can reduce the pollution problem and increase the fuel capability of engines. Many people buy larger cars than they need for daily purposes or waste fuel by driving fast.

One solution that has been put forward is the long-term solution of designing cities and neighborhoods so that car journeys are not necessary – all essential services being located within walking distance or easily available by public transport. Not only would this save energy and decrease carbon dioxide, but it would also increase the quality of community life, putting the emphasis on people instead of cars. Better transport systems are also possible by the use of modern computers. But these are solutions for countries which can afford them.

22- According to the passage, it is TRUE that

- 1) nowadays air pollution has been reduced a lot
- 2) the consumption of fuel increases when one drives fast
- 3) the use of cars for travel to places within walking distance has been reduced
- 4) most of the countries around the world use modern computers to reduce fuel consumption

23- One way to reduce the number of car journeys is to

- 1) decrease oil resources
- 2) make people drive faster
- 3) build more streets and motorways
- 4) place essential services close to public transport

24- The word "them" in the last line refers to

- 1) cars
- 2) solutions
- 3) computers
- 4) countries

25- The phrase "given rise to" in line 1 is closest in meaning to

- 1) caused
- 2) replaced
- 3) solved
- 4) continued
