## Part C: Reading Comprehension

First of all, I must say that I don't watch much television. This is because I've always got so many other things to do. My two favorite programs are "Hard Rock" and "Open Air". I try not to miss them.

Hard Rock is on every Friday night and usually has excellent rock bands playing live. Open Air is completely different. It's a magazine program about the environment. It's on every Sunday evening. Each week they talk about a subject which is connected in some way with the environment. Last week they <u>looked into</u> pollution, and next week they're going to have a talk to the president of "Friends of the Earth". There are lots of people who watch television every night. There are so many programs to choose from. They can always find something interesting. I don't know why they do it. I think most of TV is just unprofitable.
