14-1) satisfy 2) advise 3) avoid 4) prevent

15-1) accidental 2) imaginary 3) fluent 4) common

Part C: Reading Comprehension

Edison, Thomas Alva (1847 — 1931), an American scientist, was one of the world's greatest inventors; he was born at Milan, Ohio in the United States.

As a boy he had a great deal of imagination and curiosity, and was taken away from school because the teacher thought his continual questions were a sign of stupidity. His first great interest was chemistry and he read all he could about it; he was only ten when he began to grow and sell vegetables so that he could buy chemicals for making experiments at home. When he was 12, he worked selling magazines and fruit on a train.

He then decided to learn telegraphy and worked in several telegraph offices. Then he had the chance to walk into the building of a telegraph company just as the telegraph stopped working. Soon afterwards he made a large sum of money by selling his design for a telegraphic instrument known as a stock checker, which relayed information about share prices from stock markets.

He then began on his own and set up a workshop and laboratory for making stock checkers and for working on his other inventions. He also helped to make the first successful typewriter and found a way of sending as many as six messages together over the same telegraph wire without getting them mixed up. He was very proud of having invented the gramophone in 1877.

16-Edison stopped studying at school, for

- 1) he did not study well
- 2) his mother wanted him to do so
- 3) he had a great imagination and curiosity
- 4) the teacher thought he would not make progress at school

17-At first Edison gave his attention to

- 1) physics
- 2) telegraphy
- 3) chemistry
- 4) typewriting

18-He became financially successful by

- 1) working in a telegraph company
- 2) selling his design for a stock checker
- 3) selling magazines and fruit on a train
- 4) making chemicals at home

19-According to his teacher, Edison's continual questions showed his

- 1) stupidity
- 2) imagination
- 3) curiosity
- 4) creativity

20-According to the passage, which sentence is not true?

- 1) He, in 1877, invented one of the things he was very proud of.
- 2) He decided to learn telegraphy and worked in several telegraph offices.
- 3) He began on his own and set up a workshop and laboratory for making stock checkers.
- 4) By inventing the first typewriter he could send as many as six messages without getting them mixed up.
