

Part A: Grammar & Vocabulary

- 1- Before I could say anything more, David for the station.**
 1) left 2) was leaving 3) has left 4) had left
- 2- We have been friends ever since we at school together.**
 1) were 2) are 3) have been 4) had been
- 3- The students as carefully as possible if we expect them to do well in their exams.**
 1) are taught 2) have been taught 3) should be taught 4) may be taught
- 4- They that there could be delays on Road A, so they took Road B.**
 1) had warned 2) have warned 3) were warned 4) had to be warned
- 5- Patients who are given the new drug will be asked to their progress.**
 1) replace 2) monitor 3) radiate 4) convert
- 6- Orange juice helps the body iron easily when consumed with a meal.**
 1) demand 2) surround 3) transmit 4) absorb
- 7- Studies have shown that certain chemicals in plastics can actually harm cell in humans.**
 1) reproduction 2) infection 3) consumption 4) separation
- 8- See if you can revise your schedule and come up with ways to reduce the number of hours you're on call.**
 1) practical 2) dreadful 3) portable 4) gradual
- 9- Recent studies suggest that factors play the major role in whether or not a person develops most types of cancer.**
 1) cooperative 2) environmental 3) commercial 4) convertible
- 10- Millions of Americans from illnesses that can be prevented or improved through regular physical activity.**
 1) suffer 2) infect 3) deliver 4) apply
- 11- According to my university professor, peace can only be obtained when there are no longer people who are dying of hunger.**
 1) beneficial 2) renewable 3) global 4) magic
- 12- Make sure you don't write in the of your paper because I will write my comments there.**
 1) sections 2) panels 3) formulas 4) margins

Part B: Cloze Test

As man began using the world's ...13..., his civilization and his culture became increasingly dependent on what seemed an endless ...14... of energy from several sources. The ...15... source has been fossil fuel: oil, coal, and gas. But in the past few years, serious questions have been raised about how long that supply will ...16... . And also the safety of ...17... power is under question too.

- 13-** 1) components 2) communities 3) resources 4) principals
- 14-** 1) scale 2) supply 3) treasure 4) flock
- 15-** 1) primary 2) visible 3) digestible 4) various
- 16-** 1) pollute 2) demand 3) last 4) use
- 17-** 1) mechanical 2) kinetic 3) solar 4) nuclear

Part C: Reading Comprehension

Passage I:

Health food is a general term applied to all kinds of foods that are considered more healthful than the types of foods widely sold in supermarkets. For example, whole grains, dried beans, and corn oil are between types of the same food. Fresh fruit is a natural food, but canned fruit, with sugars and other organic food, used to describe food that has been grown on a particular kind of farm. Fruits and vegetables that are grown in gardens treated only with organic fertilizers, that are not sprayed with poisonous insecticides, and that are not refined after harvest, are organic foods.

In choosing the type of food you eat, then, you have basically two choices: inorganic, processed foods, or organic, unprocessed foods. A wise decision should include investigation of the allegations that processed foods contain chemicals, some of which are proven to be toxic, and that vitamin content is greatly reduced in processed foods.

- 18- Which term is used to distinguish between types of the same food?
1) Refined foods 2) Natural foods 3) Organic foods 4) Unprocessed foods
- 19- What does the word “which” (line 9) refer to?
1) Chemicals 2) Allegations 3) Processed foods 4) Unprocessed foods
- 20- What happens to food when it is processed?
1) Vitamins are added to the food.
2) The vitamin content is reduced.
3) The final content remains the same.
4) Vitamin information is not available after processing.
- 21- What is the passage mainly about?
1) Poisons 2) Organic gardens 3) Health food 4) The processing of bread

Passage II:

One of the great problems that the world faces is overpopulation. Experts tell us that unless it is brought under control, population growth will produce a serious problem in the world’s food supply in a few years. Increase in population will also consume the space for living on the earth. Many of the world’s people are not aware of this problem. Also people who have used lands to produce food find this problem difficult to understand. World leaders who must always think about public reaction find the problem hard to deal with. Improvement in food production, however, is something that everybody can understand and support. Likewise water saving, which is necessary to food production and other important human activities, is supported readily by most people, but increased production will probably never reach enough balance, unless an effort is made to control population.

- 22- The word “it” (line 1) refers to
1) problem 2) world 3) food supply 4) population growth
- 23- The one problem NOT mentioned in the passage is
1) water scarcity 2) food supply
3) world leader’s weakness 4) shortage of living space for people
- 24- The word “consume” (line 3) is closest in meaning to
1) decrease 2) use up 3) catch 4) dissolve
- 25- According to the passage, the problem of increased population
1) cannot be effectively solved
2) requires human activity for its solution
3) cannot be solved unless some other problems are solved
4) requires the use of more agricultural land for its solution
