Passage II:

Association football, commonly called soccer, is the most popular game in Europe and South America and is also widely played throughout the rest of the world. Most countries belong to the international organization that rules the sport, the Federation International of Football Association (FIFA).

It is not really known when the game began, but it was certainly played in Roman times and during the Middle Ages. However, this early form of the game was so rough that it was stopped by seven kings. It was not until the second half of the 19th century that it began to take its present form in schools in Great Britain. Even then there were a wide variety of rules. Where open fields were available, a greater number of players were permitted and so was "handling and kicking". So they began practicing dribbling and passing. Finally, in 1863 the Football Association (FA) was founded in order to decide on a standard set of rules.
