Part A: Grammar & Vocabulary 93- Will you your homework? 1) does 2) did 3) do 4) going do 94- You going to go to school tomorrow. 2) am 3) do 4) are 1) is 95- Which sentence is incorrect? 1) Tomorrow I will travel to Africa 2) I will not eat junk food 3) Where will the tourists visit next summer 4) She is going play tennis Tomorrow 96- many people are taking care of nature. 2) unfortunately 3) nowadays 4) regrettably 1) sadly 97- What is the meaning of a few in: He was not a social person. He had a few friends. 2) too much 3) a lot 4) plentiful 1) not many 98- The persian lion about 75 years ago. 1) carried on 2) died out 3) picked up 4) paid attention 99- The Doctor was a man. He gave a lot of money to poor families. 1) generous 2) lazy 3) cruel 4) irate 100- What does it mean "spare no Paris" 1) to not feel the pain 2) to cure the pain 3) to be relax 4) to do whatever is necessary 101- The teacher at the student for not listening. 1) smiled 4) laugh 2) shouted 3) aimed 102- "He does everything calmly. He is very relaxed" calmly means:? 2) in a quiet manner 3) full of energy 4) without a sound 1) harsh 103- "Who did you invite to the party" who refers to? 1) a person 2) an object 3) a location 4) a time 104- We must for those who love us. 1) cry 2) hug 3) care 4) think **Cloze test:** Fernado is a ...13... Italian tourist. Everybody knows him in Italy. He ...14... in Rome. He likes to travel and see different places in the world. He ...15... all culture and nations. He takes photos of everything, ...16... from animals. Next month he and his family will travel to Iran. They will go to Tooran ...17.... 4) annoying **13-** 1) angry 2) famous 3) tired 14- 1) will lived 2) lived 3) live 4) lives 2) predicts 3) carries 15-1) respects 4) protects 4) honestly **16-** 1) fortunately 2) Luckily 3) especially **17-** 1) earth 2) plain 3) sky 4) phase Reading Cooking is the way food is prepared for eating. There are several reasons for cooking food. When food is heated, chemical changes take place which make some food easier to eat and digest. We also think of cooking as making food taste better, but that is often because we are used to certain foods being cooked and do not like the idea of eating them raw. Also, when food is cooked it is often mixed with other food to give it a different flavor Another reason for cooking food is to preserve it. Heat kills, or delays the action of certain bacteria and parasites that may be in the food. This may also be done in other ways, such as drying, smoking, freezing, or pickling. The term "cooking" can include all these processes and also the preparation of raw food for eating. Cooking is not only done out of necessity. Many people who cook for themselves, their families or friends, as well as those who cook for a living, do it for pleasure. Although cooking is a science, it is also a form of art, and part of the art of cooking is presenting the food so that it looks good to eat. The Scottish writer, James Boswell, defined man as a "Cooking Animal". "No beast can cook", he said. "Man alone can prepare a good dish; and every man whatever is more or less a cook, in preparing what he himself eats". Each country has tis own traditional ways of cooking based on among other things, the food available, the people who have lived there at different periods of history, the climate, and the religions and customs practiced there. 1) when food is exposed to heat 2) whenever food is easy to cook 3) anytime we prepare food, raw or cooked 4) because without them people may refuse to eat 1) is a way through which some people earn money 2) enables people to keep food for a longer time

4) helps improve the taste of food

3) changes harmful bacteria into useful ones

20- The passage refers to cooking as a kind of art

- 1) because humans are cooking animals
- 2) because every man can cook somehow
- 3) when people engage in preparing food for themselves and also when they cook for the fun of it
- 4) when people take steps to make food look pleasant in appearance to others to encourage them to eat it

- 1) the factors affecting different countries' choice of their traditional ways of cooking
- 2) examples of people's traditional foods in different countries
- 3) reasons why people's food choices vary over time
- 4) people's different ways of learning how to cook

Passage 1

Global warming and climate change both refer to the observed century-scale rise in the average temperature of the Earth's climate system and its related effects. Multiple lines of scientific evidence show that the climate system is warming. More than 90% of the additional energy stored in the climate system since 1970 has gone into ocean warming; the remainder has melted ice, and warmed the continents and atmosphere. The observed increases in global average surface temperature and atmospheric carbon dioxide have been much faster in recent decades than the natural changes of previous millennia, and levels are now higher than at any time for hundreds of thousands of years prior.

Scientific understanding of the cause of global warming has been increasing. In its fourth assessment (AR40 2007) the Intergovernmental Panel on Climate Change (IPCC) reported that scientists were more than 90% certain that most of global warming was being caused by increasing concentration of greenhouse gases produced by human activities. In 2010 that finding was recognized by the national science academies of all major industrialized nations.

22-	The	word	'reco	gnize'	in	line	12	actually	means:

1) discover

2) accept

3) improve

4) increase

23- According to the passage global warming was being caused by increasing concentrations of reenhouse gases produced by?

1) environmental pollution

2) machine smoke

3) human activities

4) rising temperatures

24- What is the passage mainly about?

3) influence of carbon dioxide

1) additional energy

2) global warming and climate change

4) IPCC

25- According to the passage all of the following true EXPECT that

- 1) Multiple lines of scientific evidence show that the climate system is warming.
- 2) Scientific understanding of the cause of global warming has been increasing.
- 3) Multiple lines of scientific evidence show that the climate system is not warming.
- 4) IPCC is sign summary of the Intergovernmental Panel on Climate Change.
