Reading comprehension

What color are our dreams?

Do we dream in color or in black and white?

People argued for many years about this question, and scientists have done a lot of research about this question. One of these scientist is Eva Murzyn. Sixty people helped Eva with her research. They completed a questionnaire and kept a diary of their dreams. When Eva analyzed their diaries she discovered that the young people usually dreamed in color, Whereas the older group of them had black and white dreams. She thinks that this is because the older group saw TV shown in black and white when they were young.

- 19- What is the main idiea of the article?
