Part B: Cloze Test

No one would have believed, in the last few years of the nineteenth century, that human affairs were being watched closely by minds ...**(8)**... man's and yet as human as his own. As men went about their affairs they were watched and studied, perhaps almost as closely as a man might study the ...**(9)**... that live in a drop of water.

No one at that time gave a thought to the older worlds of space. If they thought about them at all, they never imagined that the other ...**(10)**... could be a danger to human life. The ...**(11)**... that men imagined was that there could possibly be some life on Mars.

- 8- 1) as great 2) as great as 3) greater than 4) greater
- 9- 1) creatures 2) wonders 3) strangers 4) defenders
- 10- 1) plants 2) planets 3) plains 4) plates
- 11- 1) much 2) less 3) more 4) most

Part C: Reading Comprehension

Passage 1

Man is a social creature. He cannot live without a society. The society in which he lives gives him certain rights. But rights always go hand in hand with duties. Every man has the right to live a peaceful life. He expects the government to protect him and his property. He has certain political, social and personal rights too. But the rights cannot be exercised unless certain duties towards society are performed.

- 12- Man is a social creature because he
 1) can live alone 2) can live only with his family
 3) has to live in a society 4) hates living in a society
- 13- The rights the society gives him
 1) go along with duties and responsibilities 2) put him in an awful position
 3) encourage him not to respect the rights of others 4) do not force him to accept any responsibilities

Passage 2

If you were out in space, you would see the Earth as a tiny ball moving in a wide path around a star that you might recognize as our sun. You would also see, at various distances from the sun, eight other planets all traveling in the same direction in almost circular paths around the sun. Moving around some of the planets you would see smaller balls – the satellites or moons of the planets.

- 14- Satellites move
 1) around the balls 2) around the sun 3) around the moon 4) around the planets
- 15- If we were in the space
 1) we could see a huge ball moving around the sun 2) we could see the direction of our trip
 3) we could see a small ball moving around the sun 4) we could see the Earth moving in straight path
