 1) issue                      2) aid                      3) figure                      4) tip

**Part B: Cloze Test**

Most slang words are used more in speaking than in writing. For this reason, ...13... of them can be found in dictionaries. However, slang words are among those ...14... most often. Slang words ...15... by some groups such as workers, students, and musicians. They are used to ...16... a new object, idea or ...17... . At first only the members of the special groups understand the slang words. Later, some of the slang words are used by other people.

- 13- 1) a few                      2) few                      3) many                      4) some  
 14- 1) that have used                      2) that are used                      3) which is used                      4) who use  
 15- 1) are replaced                      2) are informed                      3) are made up                      4) are picked up  
 16- 1) reproduce                      2) exclaim                      3) describe                      4) consider  
 17- 1) experience                      2) experiment                      3) resource                      4) volume

**Part C: Reading Comprehension**

**Passage 1:**

The dependence on motor vehicles has given rise to major problems, including environmental pollution, decrease of oil resources, traffic jams and safety-related issues.

While the pollutants from new cars are far less harmful than they used to be, city streets and motorways are becoming more crowded than ever. This problem makes the air quality unpleasant and sometimes dangerous to breathe.

Technical solutions can reduce the pollution problem and increase the fuel capability of engines. Many people buy larger cars than they need for daily purposes or waste fuel by driving fast.

One solution that has been put forward is the long-term solution of designing cities and neighborhoods so that car journeys are not necessary – all essential services being located within walking distance or easily available by public transport. Not only would this save energy and decrease carbon dioxide, but it would also increase the quality of community life, putting the emphasis on people instead of cars. Better transport systems are also possible by the use of modern computers. But these are solutions for countries which can afford them.

- 18- According to the passage, it is TRUE that ..... .
- 1) nowadays air pollution has been reduced a lot
  - 2) the consumption of fuel increases when one drives fast
  - 3) the use of cars for travel to places within walking distance has been reduced
  - 4) most of the countries around the world use modern computers to reduce fuel consumption

- 19- The phrase "this problem" in line 4 refers to ..... .
- 1) safety
  - 2) air quality
  - 3) problems caused by cars
  - 4) streets and motorways full of cars

- 20- One way to reduce the number of car journeys is to ..... .
- 1) decrease oil resources
  - 2) make people drive faster
  - 3) build more streets and motorways
  - 4) place essential services close to public transport

- 21- The word "them" in the last line refers to ..... .
- 1) cars
  - 2) solutions
  - 3) computers
  - 4) countries

**Passage 2:**

No one would have believed, in the last few years of the nineteenth century, that human affairs were being watched closely by minds greater than man's and yet as human as his own. As men went about their affairs they were watched and studied, perhaps almost as closely as a man might study the creatures that live in a drop of water.

No one at that time gave a thought to the older worlds of space. If they thought about them at all, they never imagined that the other planets could be a threat to human life. The most that men imagined was that there could possibly be some life on Mars, but that any men there would be less intelligent than ourselves, and would be in need of our help.

Yet, across the miles of space, minds that made our minds seem as simple as those of animals, looked at this earth unimportantly, and slowly and surely made their plans against us. And early in the twentieth century men on earth found out how wrong they had been about Mars. The planet Mars goes round the sun at the distance of 140 million miles. It receives about half the light and heat from the sun. It must be older than our world, and long before our earth cooled, life on its surface must have begun.

- 22- In the first paragraph, "creatures in a drop of water" have been considered to be similar to ..... .
- 1) men
  - 2) affairs
  - 3) human body
  - 4) minds greater than man's

- 23- The main point of the second paragraph is that ..... .
- 1) Earth is the oldest planet in the space
  - 2) there are also other planets in the space
  - 3) other creatures are less intelligent than man
  - 4) man has not considered life on other planets seriously

- 24- According to the passage, ..... .
- 1) man should plan for living on Mars
  - 2) man has been right about life on other planets
  - 3) man has not been right about life on Mars
  - 4) the twentieth century man was prepared to go to Mars

- 25- The passage indicates that ..... .
- 1) Earth is younger than Mars
  - 2) Earth is older than Mars
  - 3) Mars is bigger than Earth
  - 4) Mars is warmer than Earth
