	J. Choose the best answer. Sharks are not the same. In fact there are nearly 400 different kinds. Most sharks never attack people. Only a special group can be dangerous. They kill an average of 40 people every year. Let's compare sharks with snakes. Snakes kill about 60000 people every year and let's not forget that people kill about 25,000,000 sharks every year. 32. We can understand from the above passage that 1) snakes are more dangerous than sharks 2) all groups of sharks are dangerous 3) sharks are more dangerous than snakes 4) most sharks never attack people
