

## Remember

In a **regular** polygon, all the sides are the same length and all the angles are the same.

In an **irregular** polygon, the sides and angles are different sizes.

1 Copy and complete this table.

Shape	Name	Sides	Corners/Vertices
			
			
			
			
			

2 Draw and name these shapes:

- (a) I have four sides and four right angles. Both pairs of opposite sides are equal in length. One pair of sides is longer than the other.
- (b) I have six sides, not all of equal length.
- (c) I have three sides and one right angle.
- (d) I have three sides and no right angles.
- (e) I have five sides, not all of equal length.
- (f) I have four sides of equal length and four right angles.
- (g) I have six sides of equal length and no right angles.
