

Doubling and Halving

Use doubling and halving to multiply.

1

$$\begin{array}{c}
 \text{Double} \\
 \text{35} \times \text{8} = \square \times \square = \square \\
 \text{Half}
 \end{array}$$

2

$$\begin{array}{c}
 \text{Double} \\
 \text{45} \times \text{6} = \square \times \square = \square \\
 \text{Half}
 \end{array}$$

3

$$\begin{array}{c}
 \text{Double} \\
 \text{55} \times \text{6} = \square \times \square = \square \\
 \text{Half}
 \end{array}$$

TIP: Double the number that has a 5 in the ones place and halve the other number.
