

3) Draw an abacus to show each of these numbers:

Here are four digits.

(a) Make the biggest three-digit number you can with any three of these digits.

A large green rectangular area with a blue border, intended for drawing an abacus to represent the largest three-digit number possible using three of the digits 7, 4, 9, and 1.

(b) Make the smallest three-digit number you can with any three of the digits in question 1.

A large green rectangular area with a blue border, intended for drawing an abacus to represent the smallest three-digit number possible using three of the digits 7, 4, 9, and 1.
