

2.1. Angles

Which three of these pieces fit together to make a complete circle?

This is a 360° protractor. You can use the letters placed around the protractor to write secret codes.

Look and learn

◆ Acute angle:

◆ Obtuse angle:

◆ Right angle: an angle that is exactly 90°.

◆ Straight angle: when lines meet to make one straight line, it is an angle of 180°.

Use the 360° protractor decoder to answer these questions.

- a) What letter is at clockwise 150° ?
- b) What letter is at anti-clockwise 250° ?
- c) What is the angle from 0° to H clockwise?
- d) What is the angle from 0° to H anti-clockwise?
- e) Start at 0° . Follow these instructions.

For each new instruction, start where you finished the previous turn.

Write down the letter you stop on after each instruction.

- Turn clockwise 35° .
- Turn clockwise 75° .
- Turn anti-clockwise 230° .
- Turn clockwise 155° .
- Turn clockwise 115° .
- Turn anti-clockwise 95° .

What word do the six letters make?

- f) Choose a word of your own, write instructions to make the word using the protractor decoder. Ask a partner to decode your word.
