Topic: Math – Polygons and quadrilaterals

### 1. Look at the shapes in the picture.

- Which shapes are polygons?
- Write two reasons why they are polygons.

### 2. Write the name of each shape.

a) A quadrilateral with all sides equal and all right angles → \_\_\_\_\_

b) A quadrilateral with one pair of parallel sides → \_\_\_\_\_

c) A quadrilateral with two pairs of equal adjacent sides → \_\_\_\_\_

### 4. True or False? (Circle one)

a) A square is also a rectangle. **True / False**

b) A rhombus has four equal sides. **True / False**

c) All quadrilaterals have right angles. **True / False**
