

3. Each set of coordinates makes a triangle.

- A (6,8) (7,4) (8,8)
- B (1,1) (6,1) (6,4)
- C (4,2) (6,6) (8,2)
- D (3,5) (4,7) (7,7)
- E (3,4) (1,6) (5,6)

'Coordinates' is another name for 'ordered pair'.

Work out which type of triangle each set of coordinates makes.

4. Draw and label a coordinate grid.

Plot each point on the grid.

- a) P(2, 7)    b) Q(6, 5)    c) R(1, 4)    d) S(0, 3)    e) O(0, 0)
