It also carries away the waste that your body has to get rid of.</p> <p>Your heart is like a pump, or two pumps in one. The right side of your heart receives blood from the body and pumps it to the lungs. The left side of the heart does the exact opposite: it receives blood from the lungs and pumps it out to the body. ۱۷	<p>متن زیر را بخوانید و به سؤالات آن پاسخ دهید.</p> <p>Can Jupiter be a star instead of a planet? Jupiter is the fifth planet from the sun and the biggest planet in our solar system. More than 1,300 planets the size of Earth could fit inside Jupiter. If you could put together all eight of the other planets in the solar system, the resulting planet would still be smaller than Jupiter! In some ways, Jupiter is more like a star than a planet.</p> <p>Like the sun and other stars, Jupiter is a huge ball of hydrogen gas and helium gas. It gives off more heat than it receives from the sun. Many moons and several thin rings go around Jupiter. Jupiter's moons and rings are like a little solar system. You could never land a spacecraft on Jupiter. Jupiter does not have a hard surface. Astronomers (scientists who study space) call Jupiter a gas giant because it's made almost entirely of gas.</p> <p>61) How many planets could fit inside Jupiter?</p> <div style="display: flex; flex-wrap: wrap;"> <div style="width: 50%;">1) more than a thousand</div> <div style="width: 50%;">2) less than a thousand</div> <div style="width: 50%;">3) about five hundred</div> <div style="width: 50%;">4) five hundred</div> </div> <p>62) Jupiter is made up of .....</p> <div style="display: flex; flex-wrap: wrap;"> <div style="width: 50%;">1) nitrogen gas</div> <div style="width: 50%;">2) hydrogen gas</div> <div style="width: 50%;">3) hydrogen and helium gas</div> <div style="width: 50%;">4) rock and ring</div> </div> <p>63) Jupiter is larger than the earth.
