- 1) depends - on 2) consists - of 3) connects - with 4) computes - at
- 1255 | He failed his tests; you should have helped him with his lessons when he to you. (خارج ۹۳)
- 1) recognized 2) appreciated 3) advised 4) referred

CLOZE 19

Mankind had been fooled into believing that the world's resources could never be exhausted. Only with the massive growth in industry has it become obvious that our planet not only has limits, but these limits are fast ²¹⁴⁰ approached. Although some new supplies remain ²¹⁴¹ and others will be replaced, we cannot afford to live in the same ²¹⁴² . If we continue, the demand for energy and minerals could generate an industrial "famine" ²¹⁴³ would bring a worldwide crisis. ²¹⁴⁴ this, man must discover a new relationship with the Earth and learn to conserve its vital resources.

- 2140 | 1) be 2) been 3) being 4) to be
- 2141 | 1) to discover 2) discovering 3) to be discovered 4) been discovered
- 2142 | 1) character 2) manner 3) string 4) variety
- 2143 | 1) who 2) whom 3) what 4) that
- 2144 | 1) To avoid 2) Avoiding 3) To be avoided 4) Having been avoided

PASSAGE 37

Our demand for electricity is climbing so fast that over the next decade our generating capacity must increase by a third. Fossil fuels supply nearly three-quarters of this energy. But the smoke expelled from coal, gas, and oil-fired plants are also responsible for half of our air pollution. That might be considered as a small price for progress. But there's an alternative, namely nuclear power that produces no smoke and can actually create more fuel than it consumes. In many regions it's even cheaper than coal-fired electricity. It may directly bring danger of radioactivity to the mind, but let's also keep in mind that other types of power present equal and even worse problems.

2150 | While three-quarters of the electricity is generated from fossil fuels,

- 1) we should consider the potential dangers of nuclear power
- 2) it may contribute to global warming and the greenhouse effect
- 3) half of the air pollution is caused by the plants using them
- 4) coal also contains a surprising amount of radioactive material

2151 | It's claimed in the passage that nuclear power

- 1) supplies three-quarters of the energy demand
- 2) might be less dangerous and cheaper than other types of power
- 3) is a potential danger because it's radioactive
- 4) is more expensive to generate, but not a pollutant

2152 | In the passage, the writer is worried that in the future

- 1) fossil based plants might bring bigger problems than nuclear energy
- 2) nuclear waste might be more dangerous than air pollution
- 3) they will have to build nuclear power stations one day
- 4) there will always be possible dangers of nuclear power

2153 | The pronoun "it" refers to

- | | |
|---------------------------|-------------|
| 1) nuclear power | 2) progress |
| 3) coal-fired electricity | 4) region |
