

Our internal organs

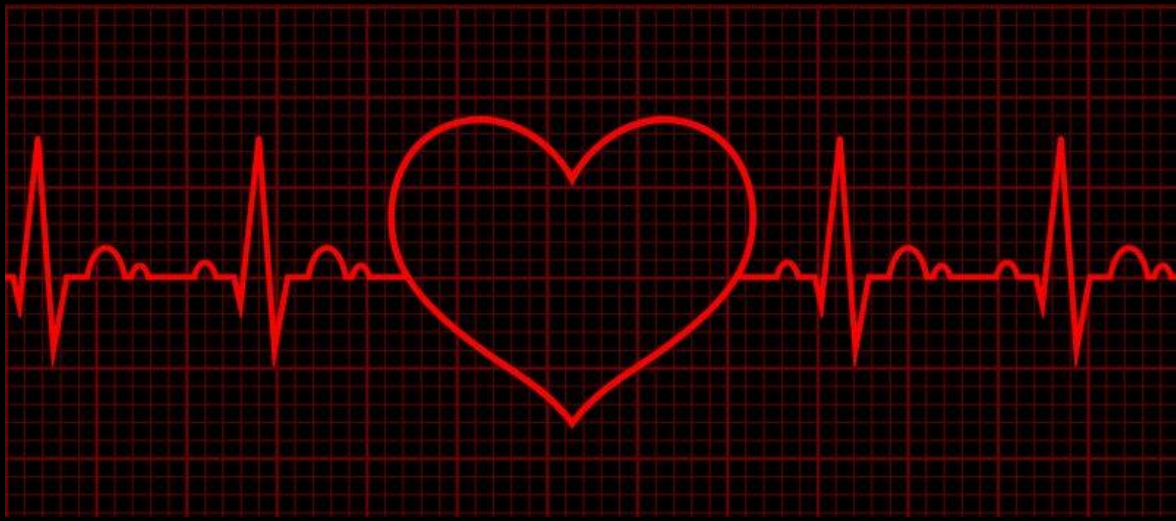

There are 206 **bones** in our body.

All the **bones** of our body are together called as **skeleton**.

The hard **skull** protects the **brain** inside it.

heartbeat

breathing

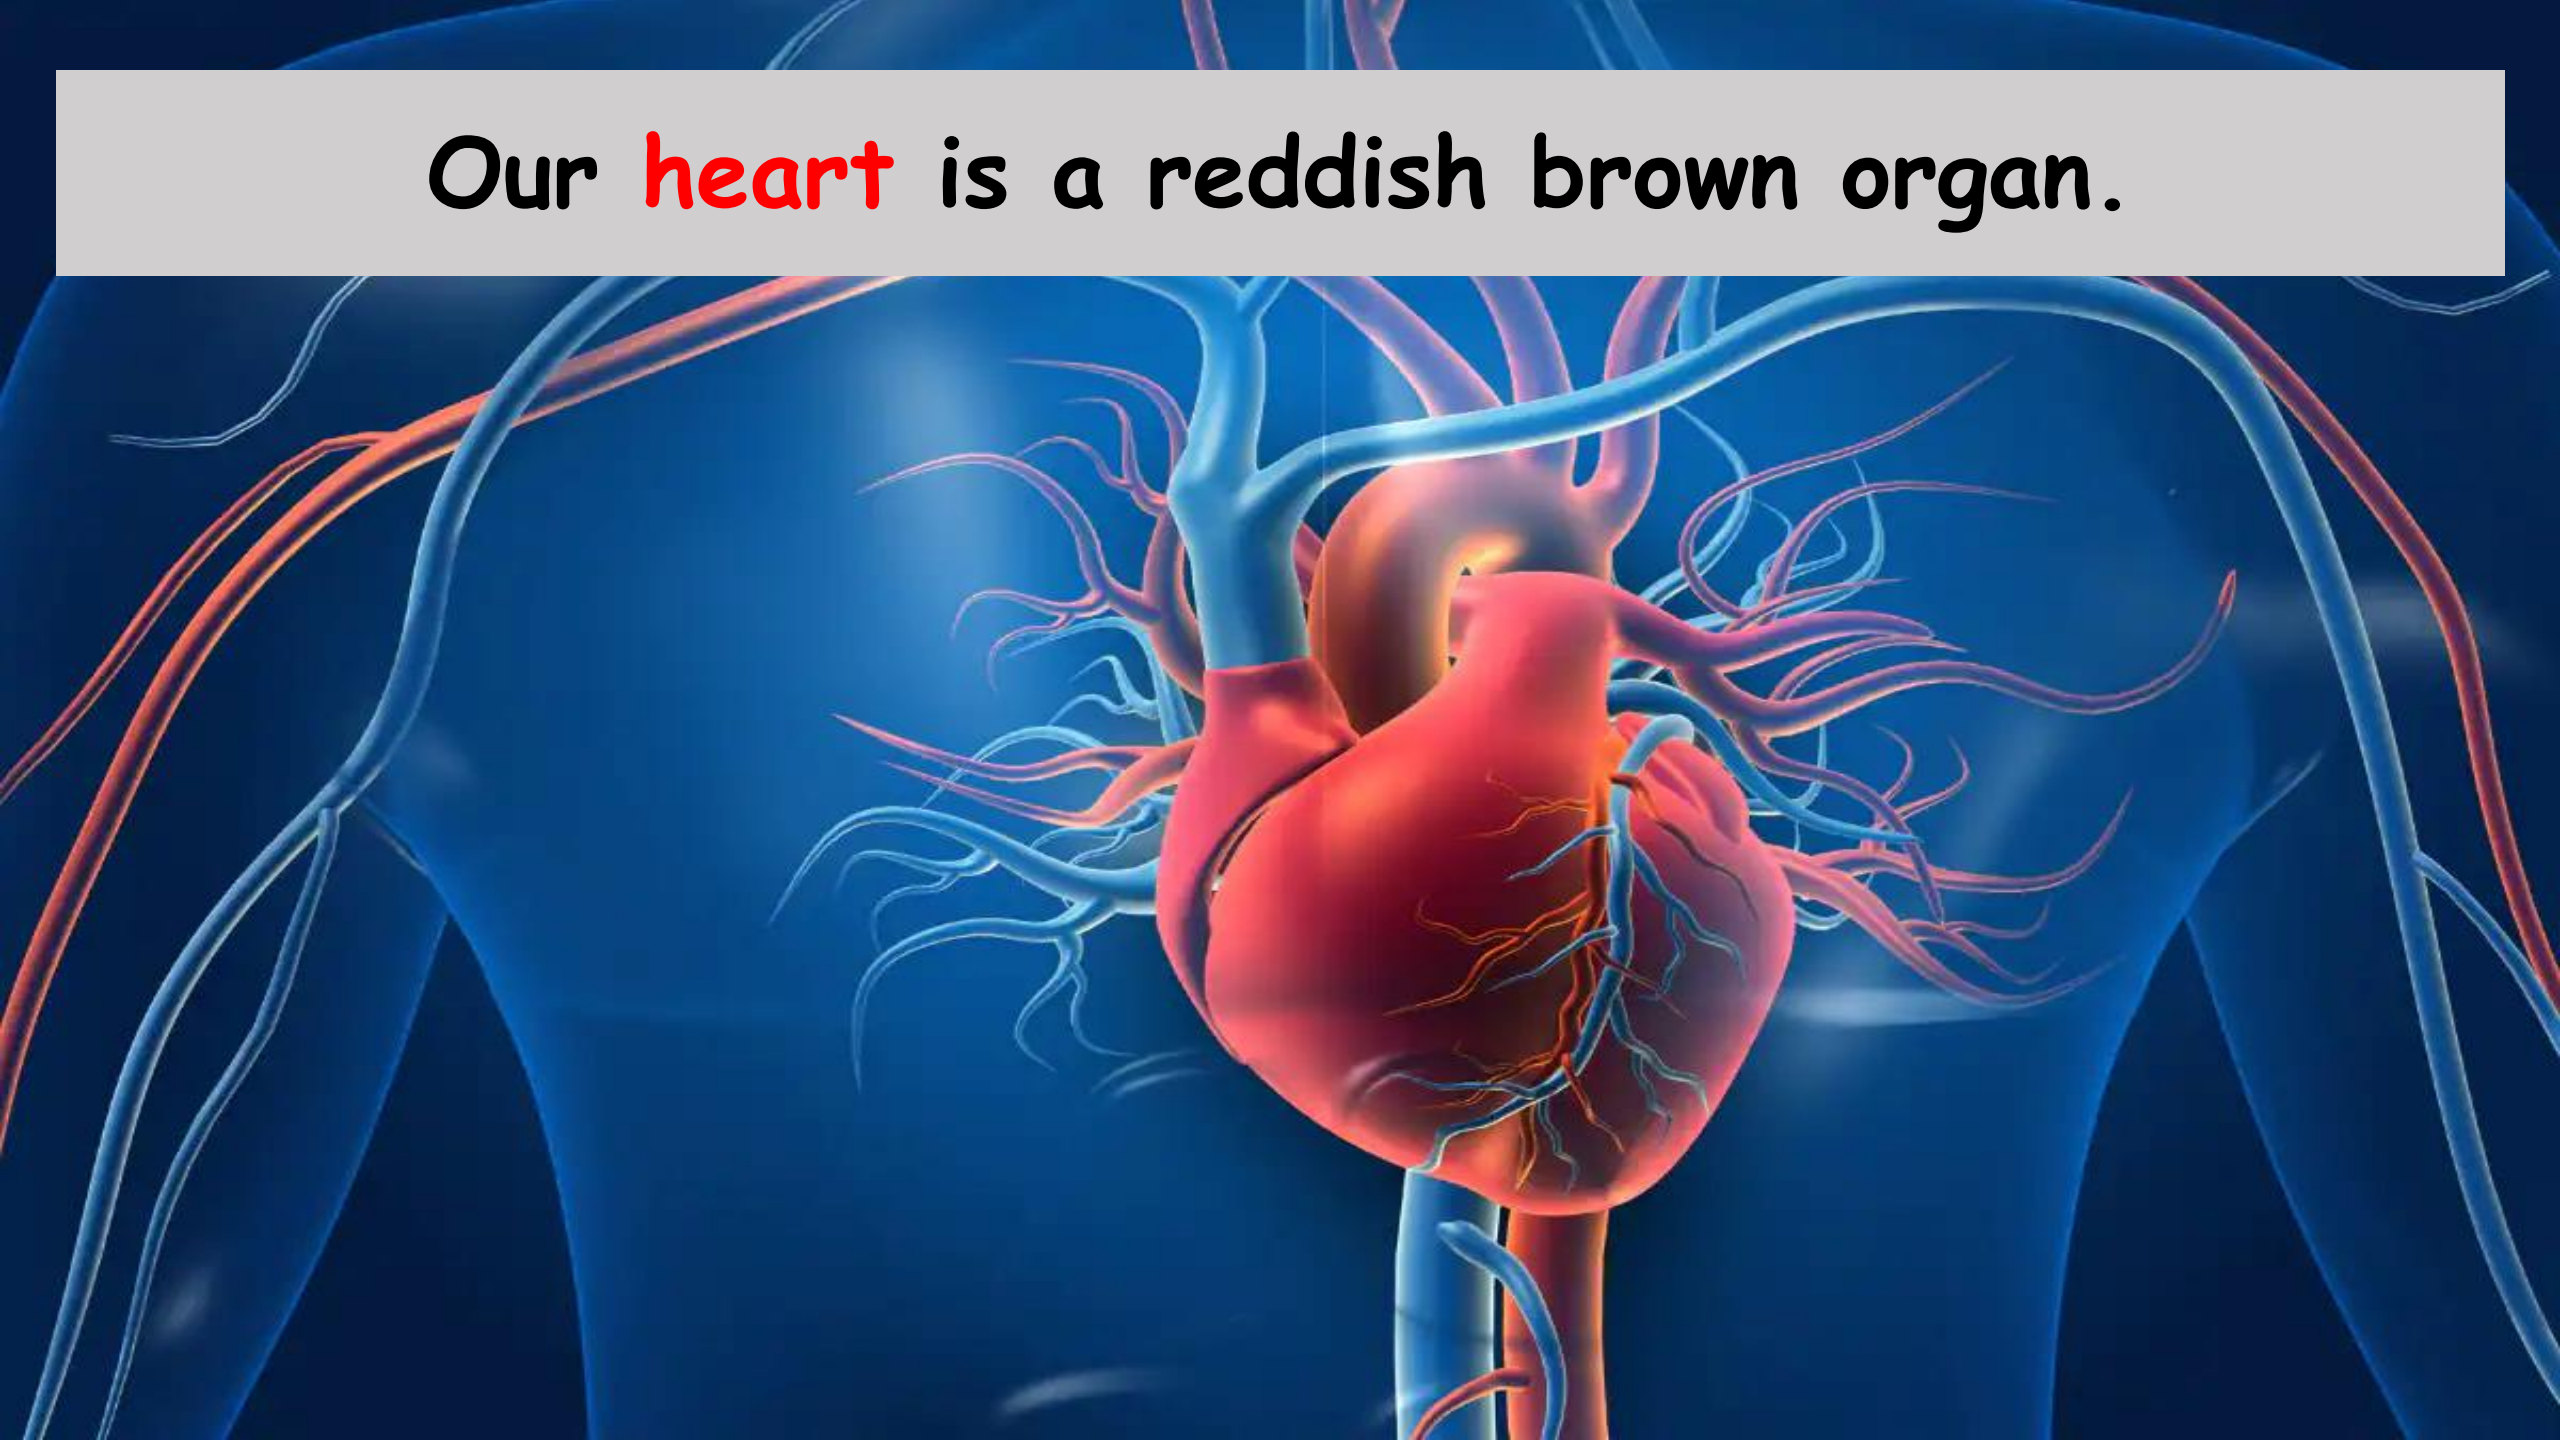

movement

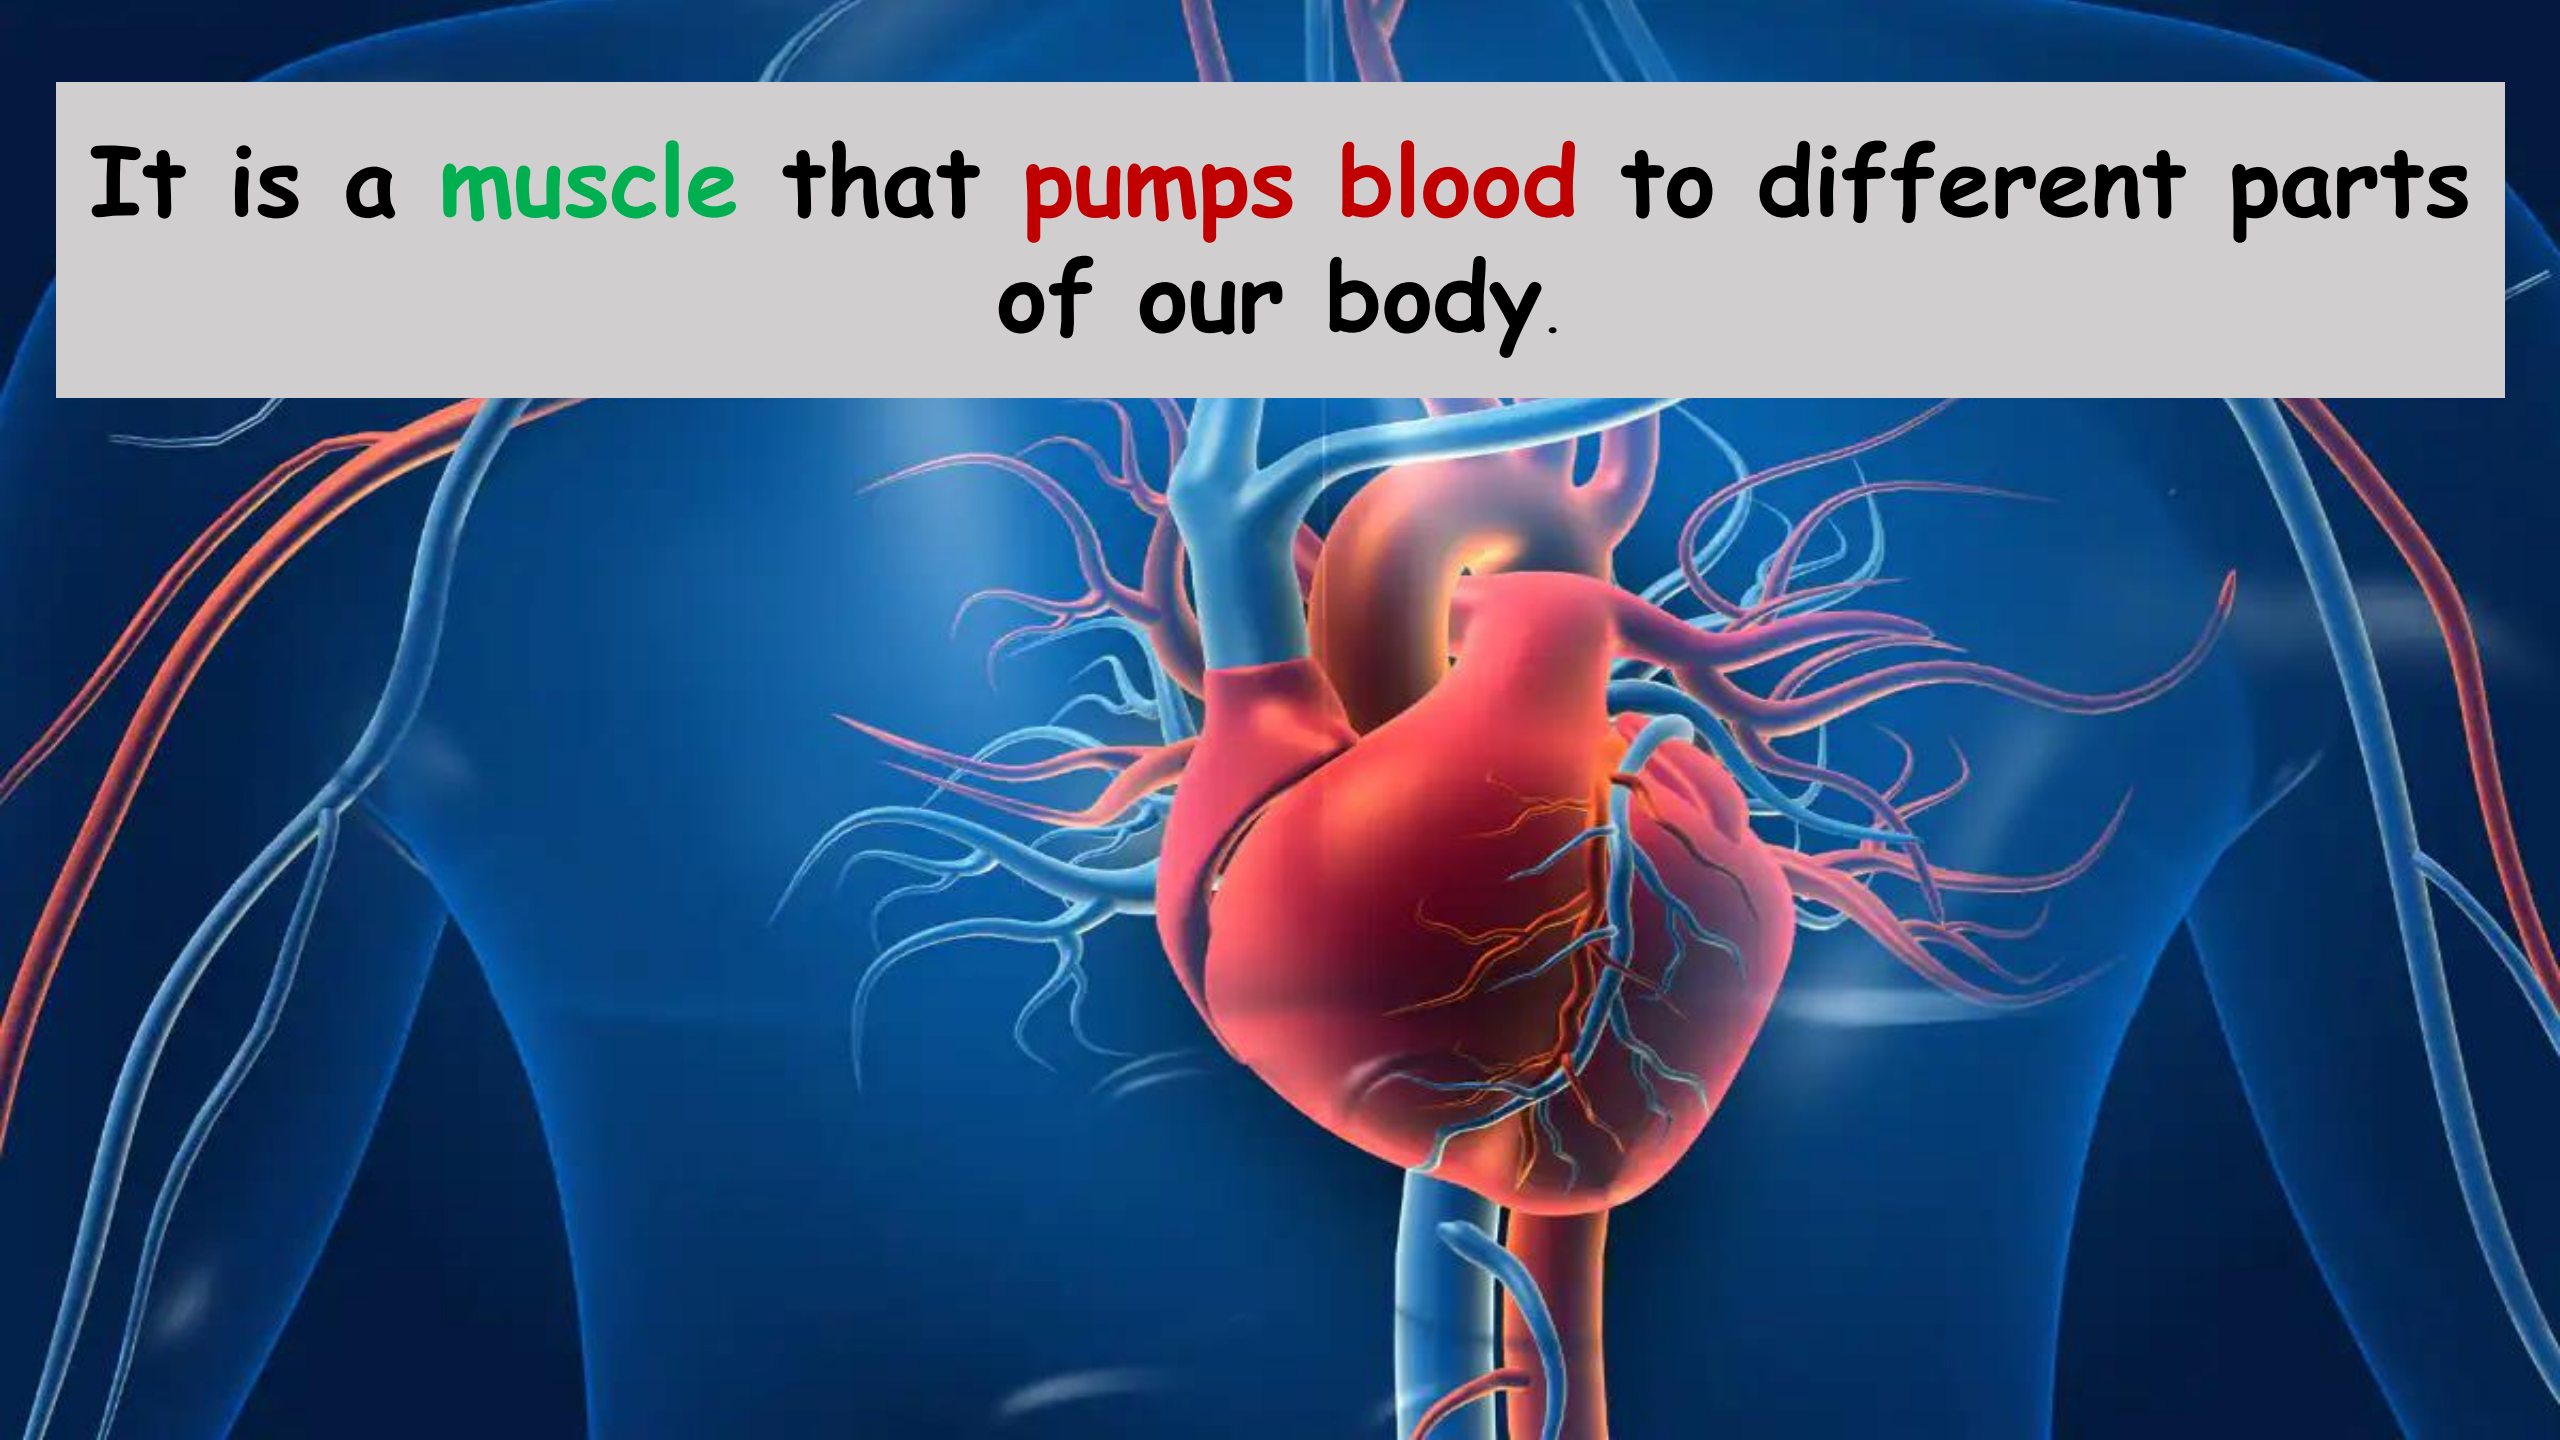

All our body activities including
heartbeat, **breathing**, **movement**
are controlled by the **brain**.

Our **heart** is a reddish brown organ.

It is a **muscle** that **pumps blood** to different parts of our body.

Our heart is
protected inside
our **rib cage**.
