# China

中国

## economics

China is a rapidly growing economy and is the second largest producer of agricultural products. China and the rest of the world are using computers. China produces more products than any other country. China exports a variety of products such as steel, oil, and coal. China's GDP in 2017 was \$14.7 trillion USD and the per capita was \$9,854 USD.

## politics

China is a communist country. The government is a one-party system. The Communist Party of China (CPC) is the only political party in China. The CPC is led by the General Secretary, who is also the Chairman of the Central Military Commission. The CPC is responsible for the political, economic, and social development of China.

The Great Canal is considered by many people to be the greatest engineering feat in the world. It is a man-made waterway that stretches 1,100 miles from Beijing to the Yellow Sea. It is the longest canal in the world and has been used for over 2,000 years.

## arts

Chinese calligraphy is a traditional art form that has been practiced for over 2,000 years. It is a form of writing that is both functional and artistic. Calligraphy is used for a variety of purposes, including writing poetry, creating scrolls, and decorating buildings.

## education

Education is highly valued in China. The government invests heavily in education and has made significant progress in improving the quality of education. China has a large and growing education sector, and is expected to continue to invest in education in the future.

## recreation

China has a rich and diverse cultural heritage. There are many traditional festivals and customs in China, and a wide variety of traditional arts and crafts. China is also a popular destination for tourists, and has a growing tourism industry.

## religion

China is a multi-religious country. The most common religions in China are Buddhism, Taoism, and Confucianism. There are also many smaller religions and sects in China. The government has a policy of religious freedom, and allows citizens to practice their religion freely.

## kinship

Family is highly valued in China. The family is the central unit of society, and is responsible for the upbringing and education of children. There is a strong sense of filial piety in China, and children are expected to respect and care for their parents.
