

Humans and animals

1.1 Body organs

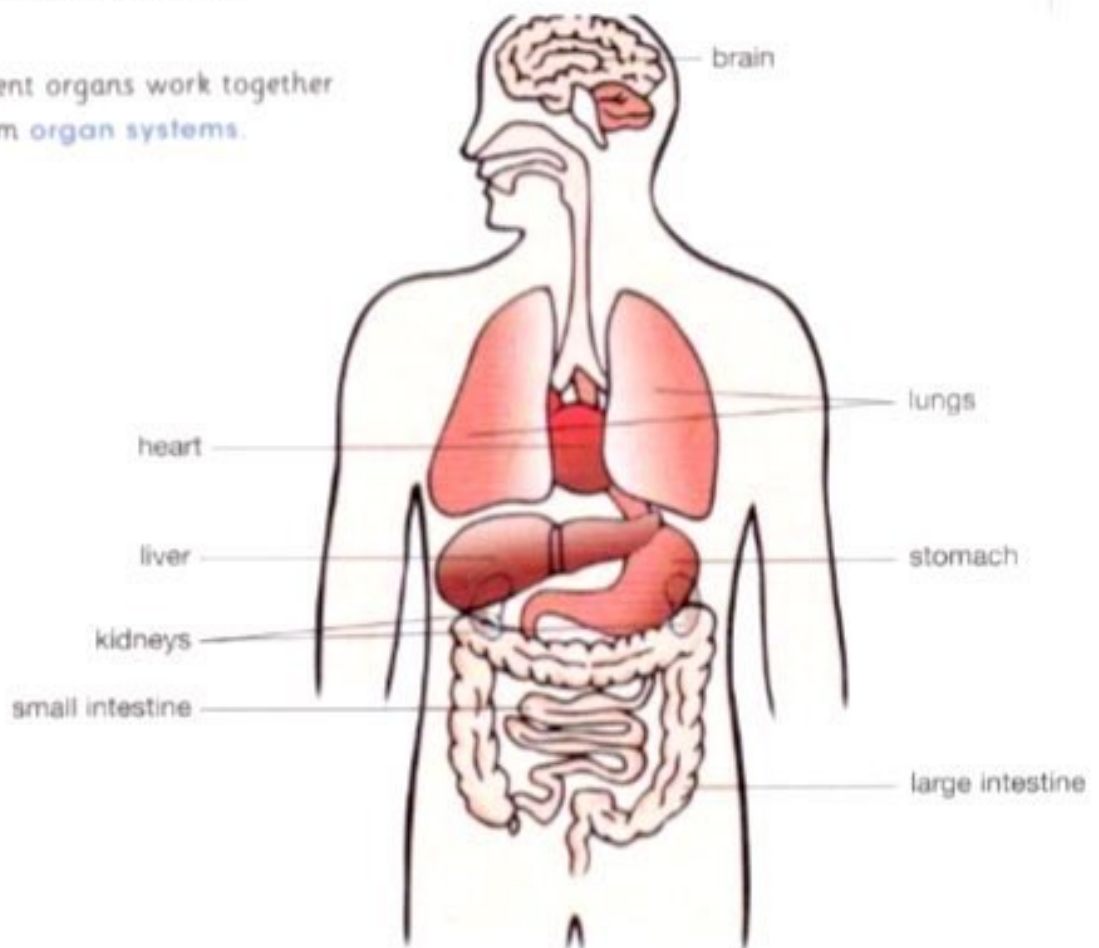

Words to learn
organs organ systems

You know what the outside of your body looks like. But what's inside your body? Think of as many inside parts as you can.

The parts inside your body are called **organs**. The body organs do different jobs to keep you alive and healthy.

Different organs work together to form **organ systems**.

What you have learnt

- ☞ The parts inside your body are called organs.
- ☞ The major body organs are the heart, stomach and intestines, lungs, kidneys and brain.
