Read. Match paragraphs 1-4 with the pictures.

a

b

c
RECYCLE

d

In one minute read the text and say how to protect the environment using computers.

People use computers every day. They use them for work, school and free-time activities. Computers are helpful, but we have to use them correctly and protect the environment.

1 We need to turn off computers when we aren't using them. This saves electricity and that's good for the environment. It also saves money!

2 We need to save paper, too. If we save paper, we will also save our forests. You shouldn't print things if they aren't necessary. Think before you print!

3 We need to recycle our old computers, tablets and phones. Don't put them in the rubbish bin. It's bad for our planet. Put them in the recycling bin

4 We need to recycle old batteries too. They can pollute our rivers and lakes. We must put old batteries in a special recycling bin. Please, don't forget!

Answer the question.

1 When do we need to turn off computers?
2 Why is it so important to save paper?
3 Where should we put old computers?
4 Why are old batteries dangerous?

good-bye
