The Red Sea

The Red Sea is a tropical sea. The water temperature is 30 - 35°C in the summer and about 25°C in the winter. The warm temperature makes it perfect for swimming and scuba diving. Lots of people visit the Red Sea to see the beautiful beaches, coral reefs and all the animals.

This is a lionfish. It has got beautiful colours but it can sting!

The hammerhead shark eats lots of fish every day. Its eyes are far apart so it can see all the fish around it.

My name's Aiko and I live in Japan. There are often earthquakes in Japan. There will be more earthquakes in the future, but we've got strong buildings. We've also got tsunamis. They are big waves made by an earthquake under the water. There might be a tsunami next month, but it won't be very big or dangerous. We live near the coast, but we'll be safe in our flat.

I'm Dan and I live in Texas. There are often tornadoes in my town. A tornado is a storm with air that goes around very quickly. It's very warm and humid today, and so it might be stormy tomorrow. There won't be thunder or lightning, but there might be a small tornado. There are about one thousand tornadoes in the United States every year, and so we know what to do. We'll stay calm and we'll look for a safe place.
