

Unit 7

- 1 Look at the text below. What is it?
a an email b a conversation c an itinerary

- 2 Look and read. Why are these dinosaurs dangerous?

Jamie: Wow! That's a tyrannosaurus rex, isn't it?

Marcus: Yes. It's really big! It was one of the largest dinosaurs in the world.

Jamie: I'm happy I didn't live in the time of the dinosaurs. It was probably very scary!

Marcus: Look at that velociraptor! It may be small, but it was extremely dangerous.

Jamie: It was also one of the fastest dinosaurs, wasn't it?

Marcus: I think so. They had really sharp teeth and claws, too. They needed these because they were meat eaters, just like the tyrannosaurus rex.

Jamie: The velociraptor wasn't very heavy. The tyrannosaurus was a much heavier dinosaur.

Marcus: Yes. I think it was the heaviest dinosaur in the world!

Jamie: Dinosaurs were reptiles, weren't they?

Marcus: Yes. They laid eggs and had scales on their body. In fact, crocodiles and tortoises are animals that are descendants of the dinosaurs.

Jamie: Well, luckily there aren't any reptiles that still exist which are bigger than a tyrannosaurus rex!

Marcus: I know! Dinosaurs were probably the scariest animals ever, so I'm happy to learn about them in the safety of the museum!

- 3 Read and choose the best answer.

- 1 A tyrannosaurus rex was a very big dinosaur, ...
a isn't it? b weren't they c wasn't it?
- 2 A velociraptor was fast, ...
a small and dangerous b big and dangerous c big and scary
- 3 Both dinosaurs were ... a very heavy b very tall c meat eaters
- 4 Crocodiles and tortoises ...
a are also dinosaurs b also lay eggs c also run fast
- 5 Marcus thinks that dinosaurs were probably ...
a the scariest animals b the fastest animals c the largest animals

- 4 Read, think and discuss.

- 1 Why do you think the dinosaurs are now extinct?
- 2 Which animals of today have got similar body parts and features to the dinosaurs?

- 5 Find these words and expressions in the text. What do they mean? Check in your dictionary. Write the definitions in your notebook.

extremely descendant exist
