

sustainable buildings

sustainable buildings

These are buildings designed to be good
For the environment and save resources
Like water, energy and materials.

sustainable buildings

Use solar panels to get power from the sun.

sustainable buildings

Made from recycled or natural materials.
Like bamboo or reused wood

sustainable buildings

A photograph of a modern building with a green roof, featuring large windows and a flat roof covered in lush green plants. The building is set against a clear blue sky with some light clouds. The foreground shows some greenery and a paved area.

Have green roofs.
(Plants growing on rooftops!)

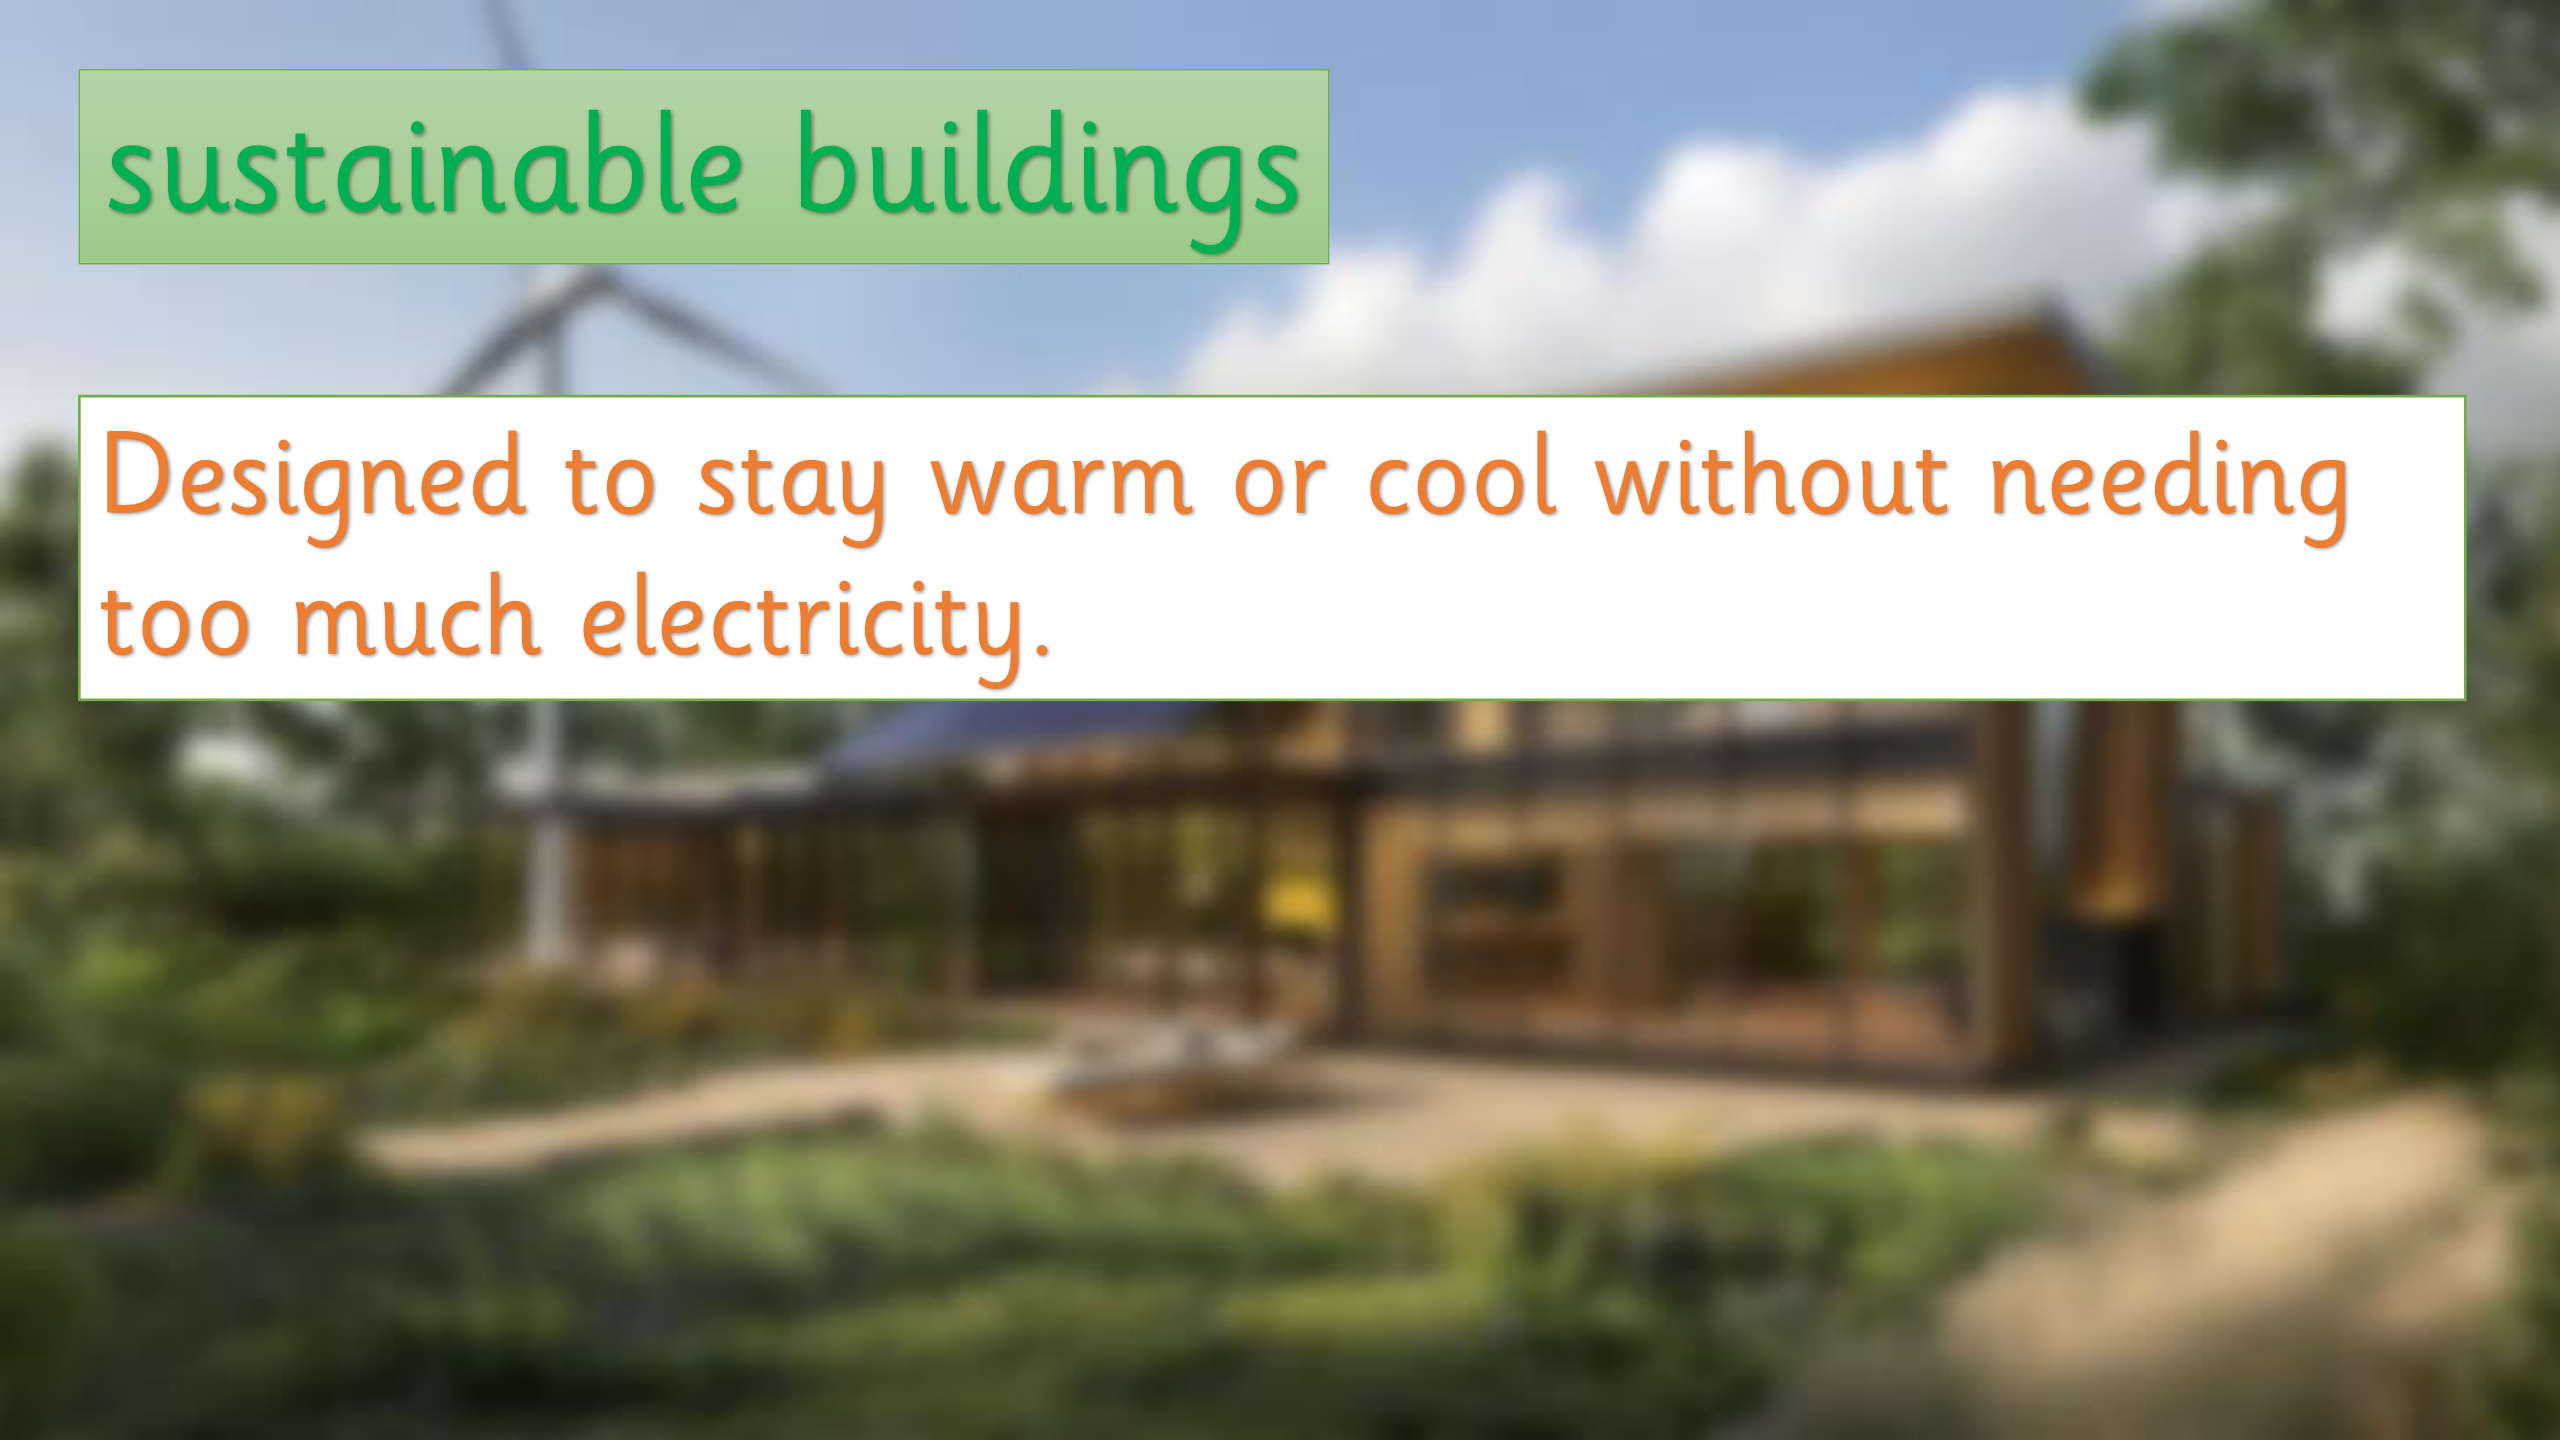

sustainable buildings

The background image is a blurred photograph of a residential property. In the upper portion, a house with a light-colored roof is visible, featuring several blue solar panels. In the lower portion, a large, cylindrical green water storage tank stands prominently. To the left of the tank is a lush green bush. The overall scene suggests a focus on sustainable home technologies.

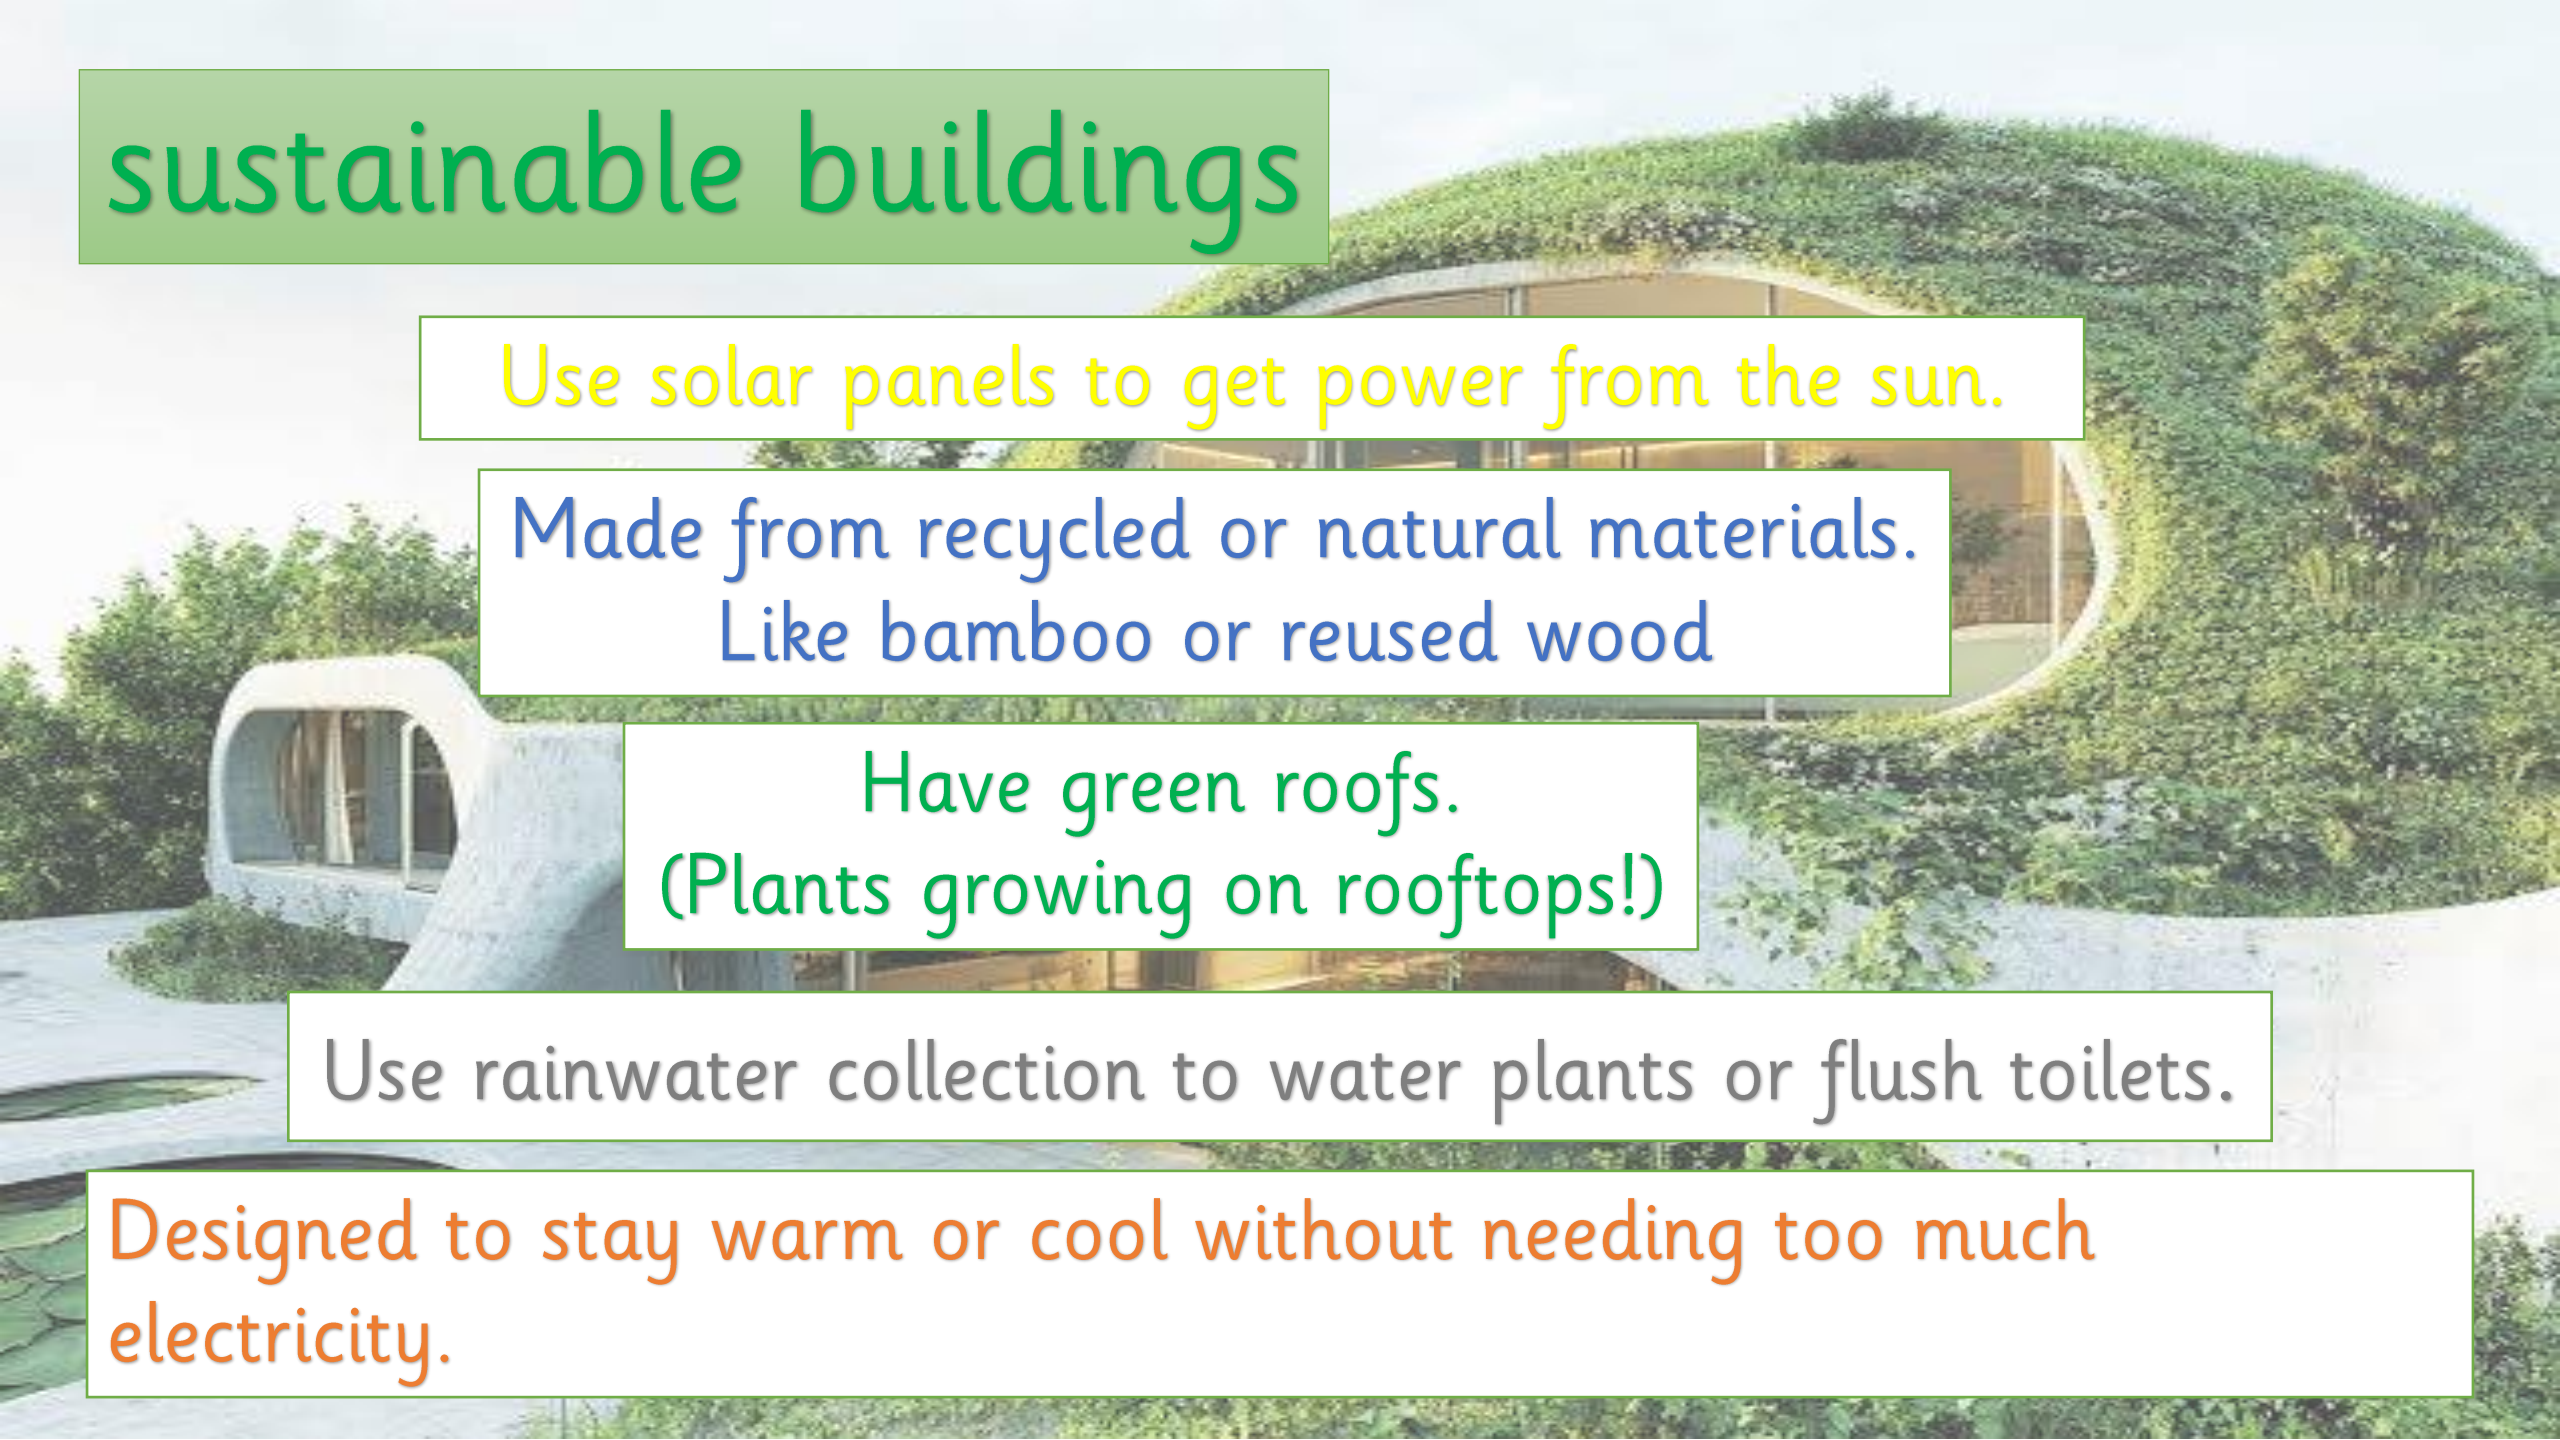

Use rainwater collection to water plants or flush toilets.

sustainable buildings

Designed to stay warm or cool without needing too much electricity.

sustainable buildings

The background image shows a modern sustainable building. It features a large, curved, white, pod-like structure in the foreground with a circular opening. Behind it is a larger building with a green roof covered in dense vegetation. The sky is overcast.

Use solar panels to get power from the sun.

Made from recycled or natural materials.
Like bamboo or reused wood

Have green roofs.
