HELLO

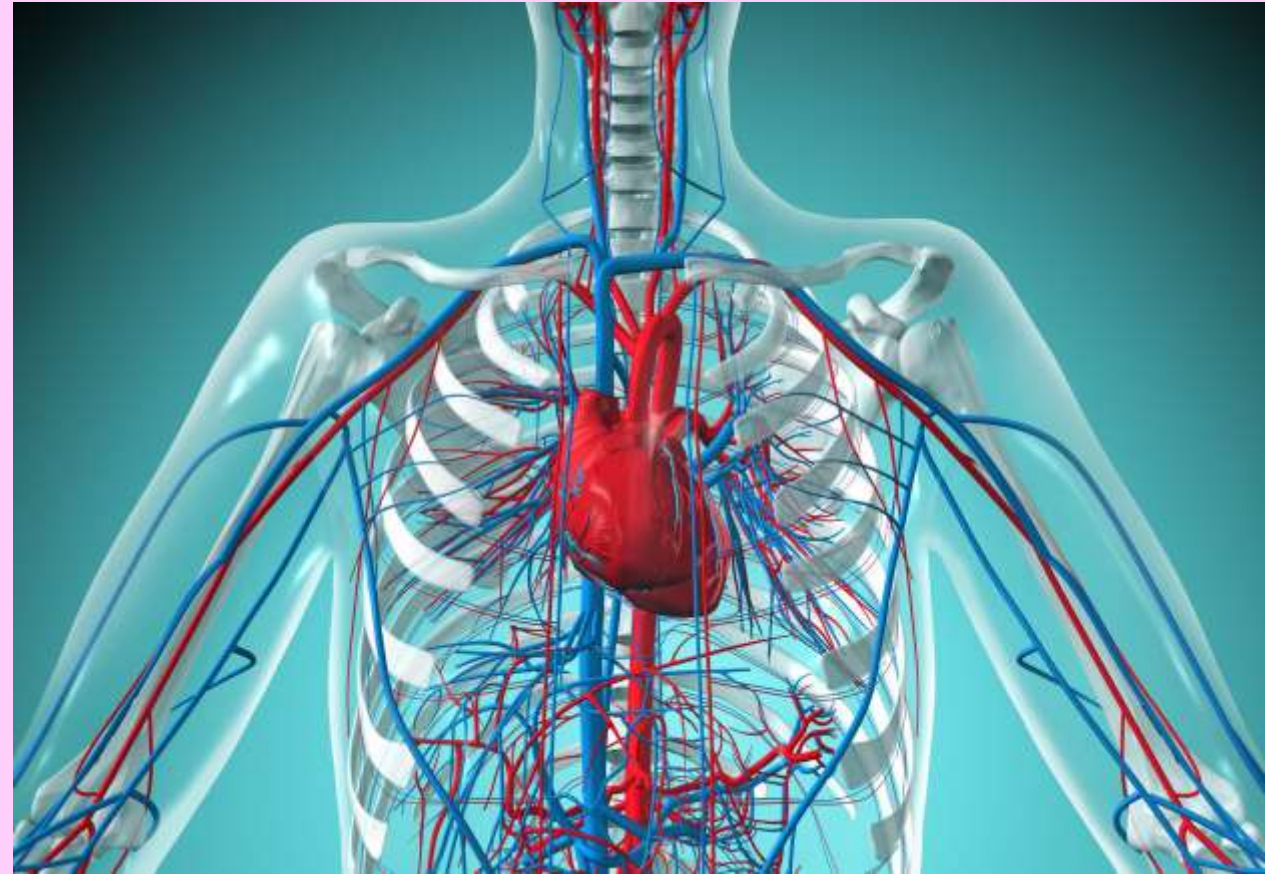

So what did you see in the video?

What are these lines in our bodies?

vessels

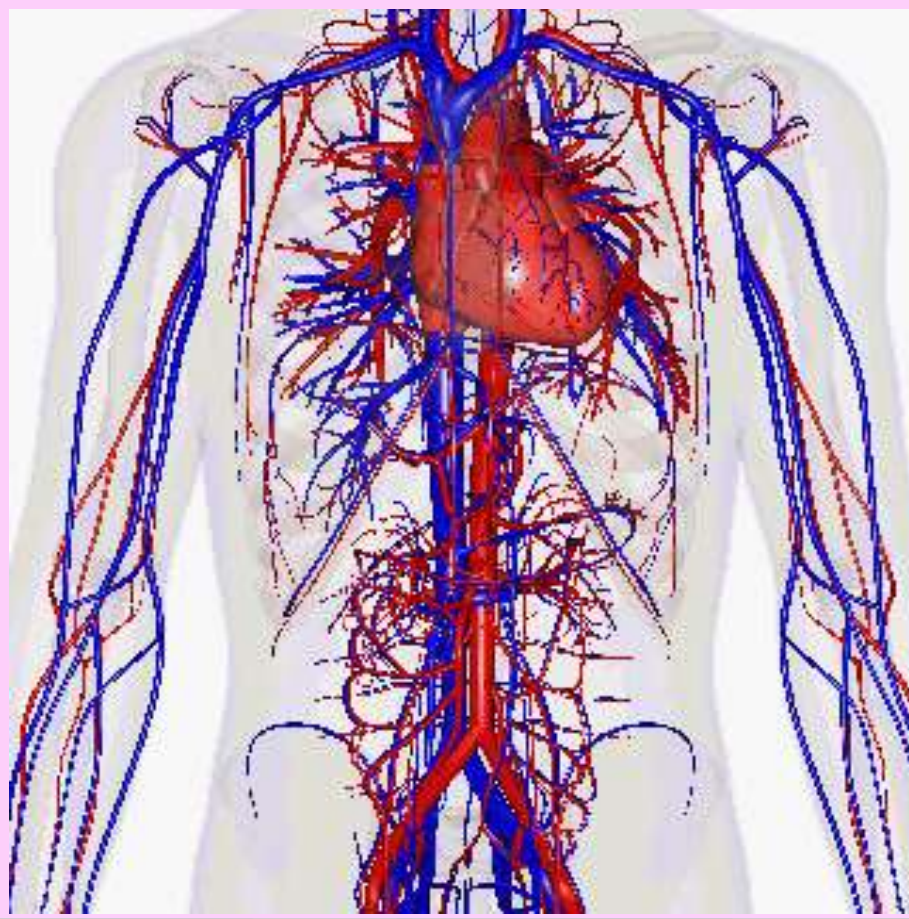

What is blood?

Blood is a red liquid that flows around the body in **blood vessels**. Look at the inside of your wrist.

blood vessels. Look at the inside of your wrist. Sometimes you can see the blood vessels through your skin.

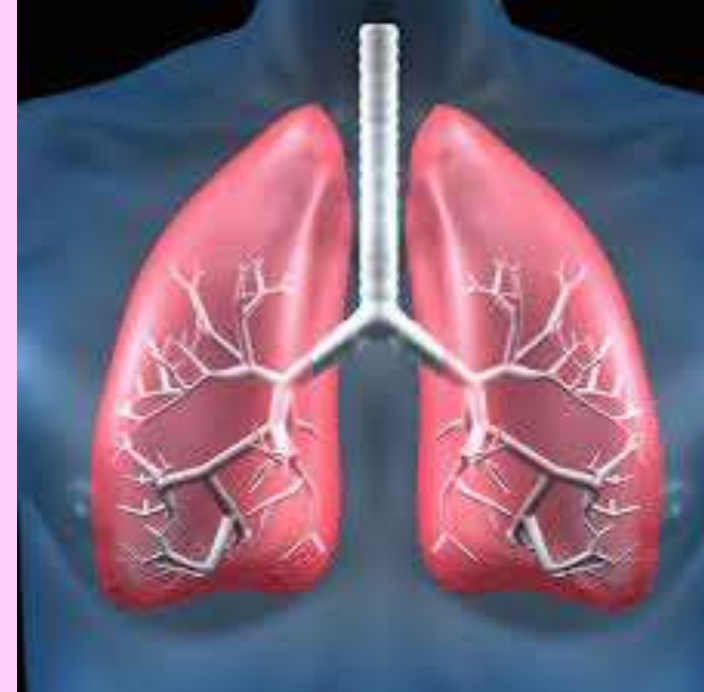

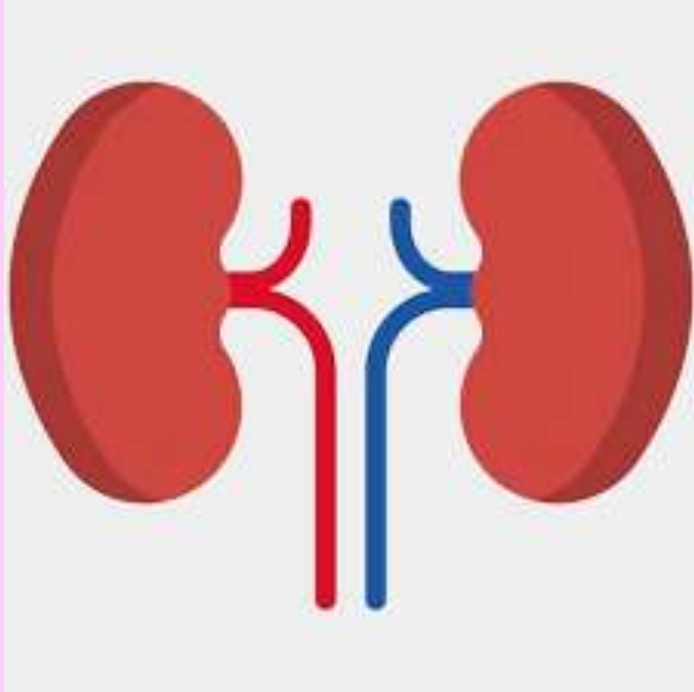

Blood vessels run from the heart to the lungs, around the body and back to the heart.

What does blood carry?

The blood carries **food** and **oxygen** to all parts of the body.

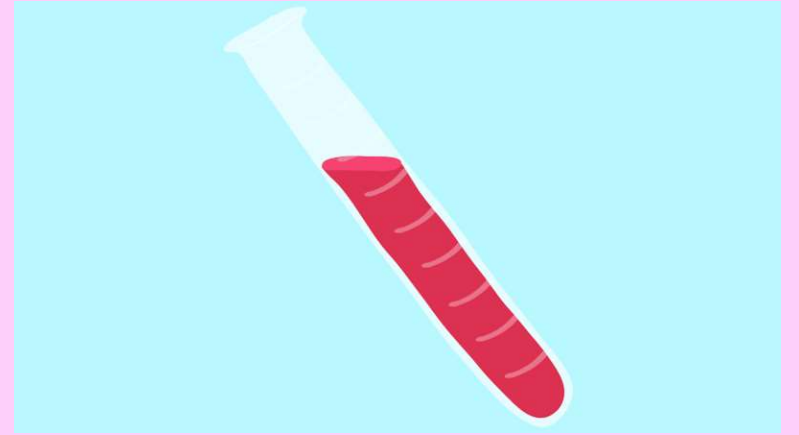

unusable
material

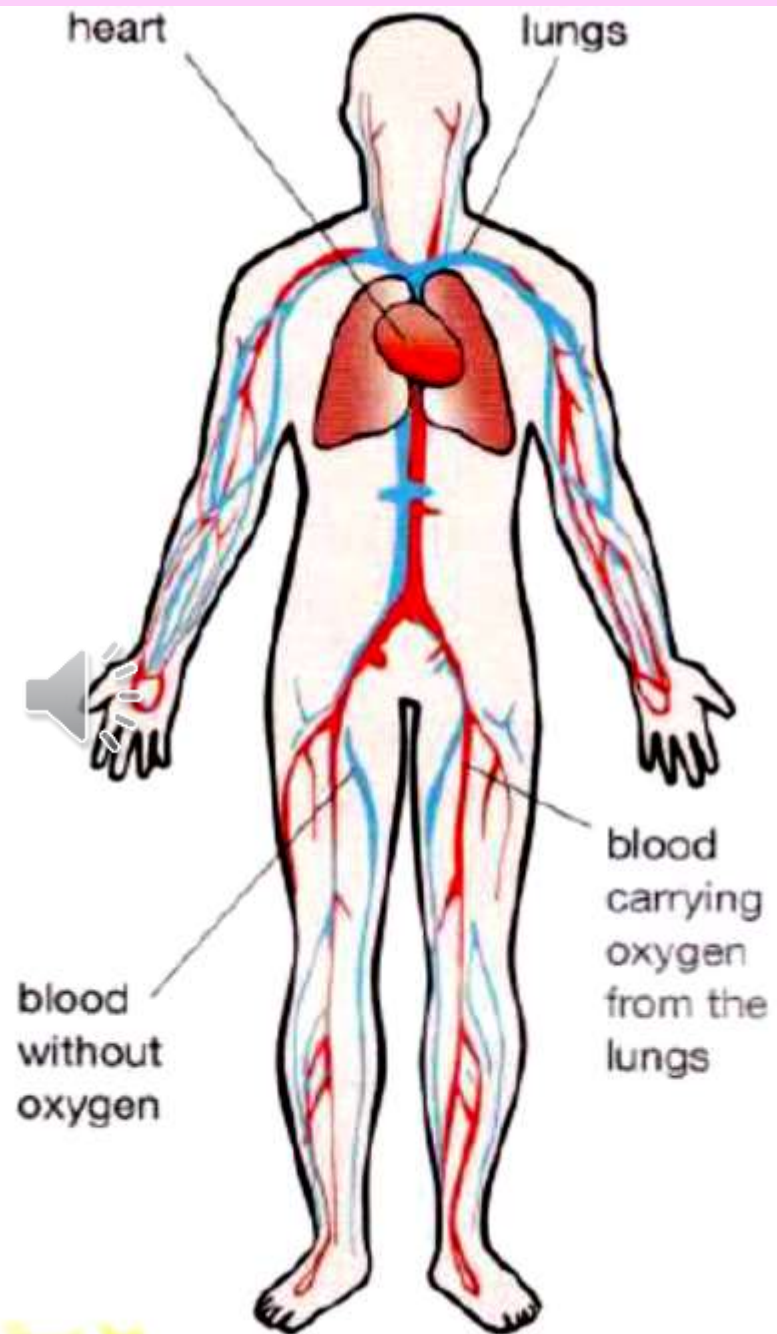

It also picks up waste products from the body and carries them to organs which can get rid of them. The **kidneys** and **lungs** are two of these organs.

What is the circulatory system?

The heart, blood vessels and blood form the circulatory system.

Now look at
this picture.

Put the words in the blanks.

kidneys

blood

lungs

oxygen

blood
vessels

food

circulatory
system

1. is a liquid that flows in our body.

2. It carries and

3. It runs in small line called

4. Blood, blood vessels and heart are called
.....

5. Blood picks up the waste products and send it
to organs such as and

Now it's your turn

What is blood?

What does blood
carry?

What is the
circulatory system?

Where do the waste
products go?

Thank

you
