

## 2.4 Food chains in different habitats

canopy

### Identify food chains in a tropical forest habitat

Look at the diagram of a tropical forest habitat.

Producers

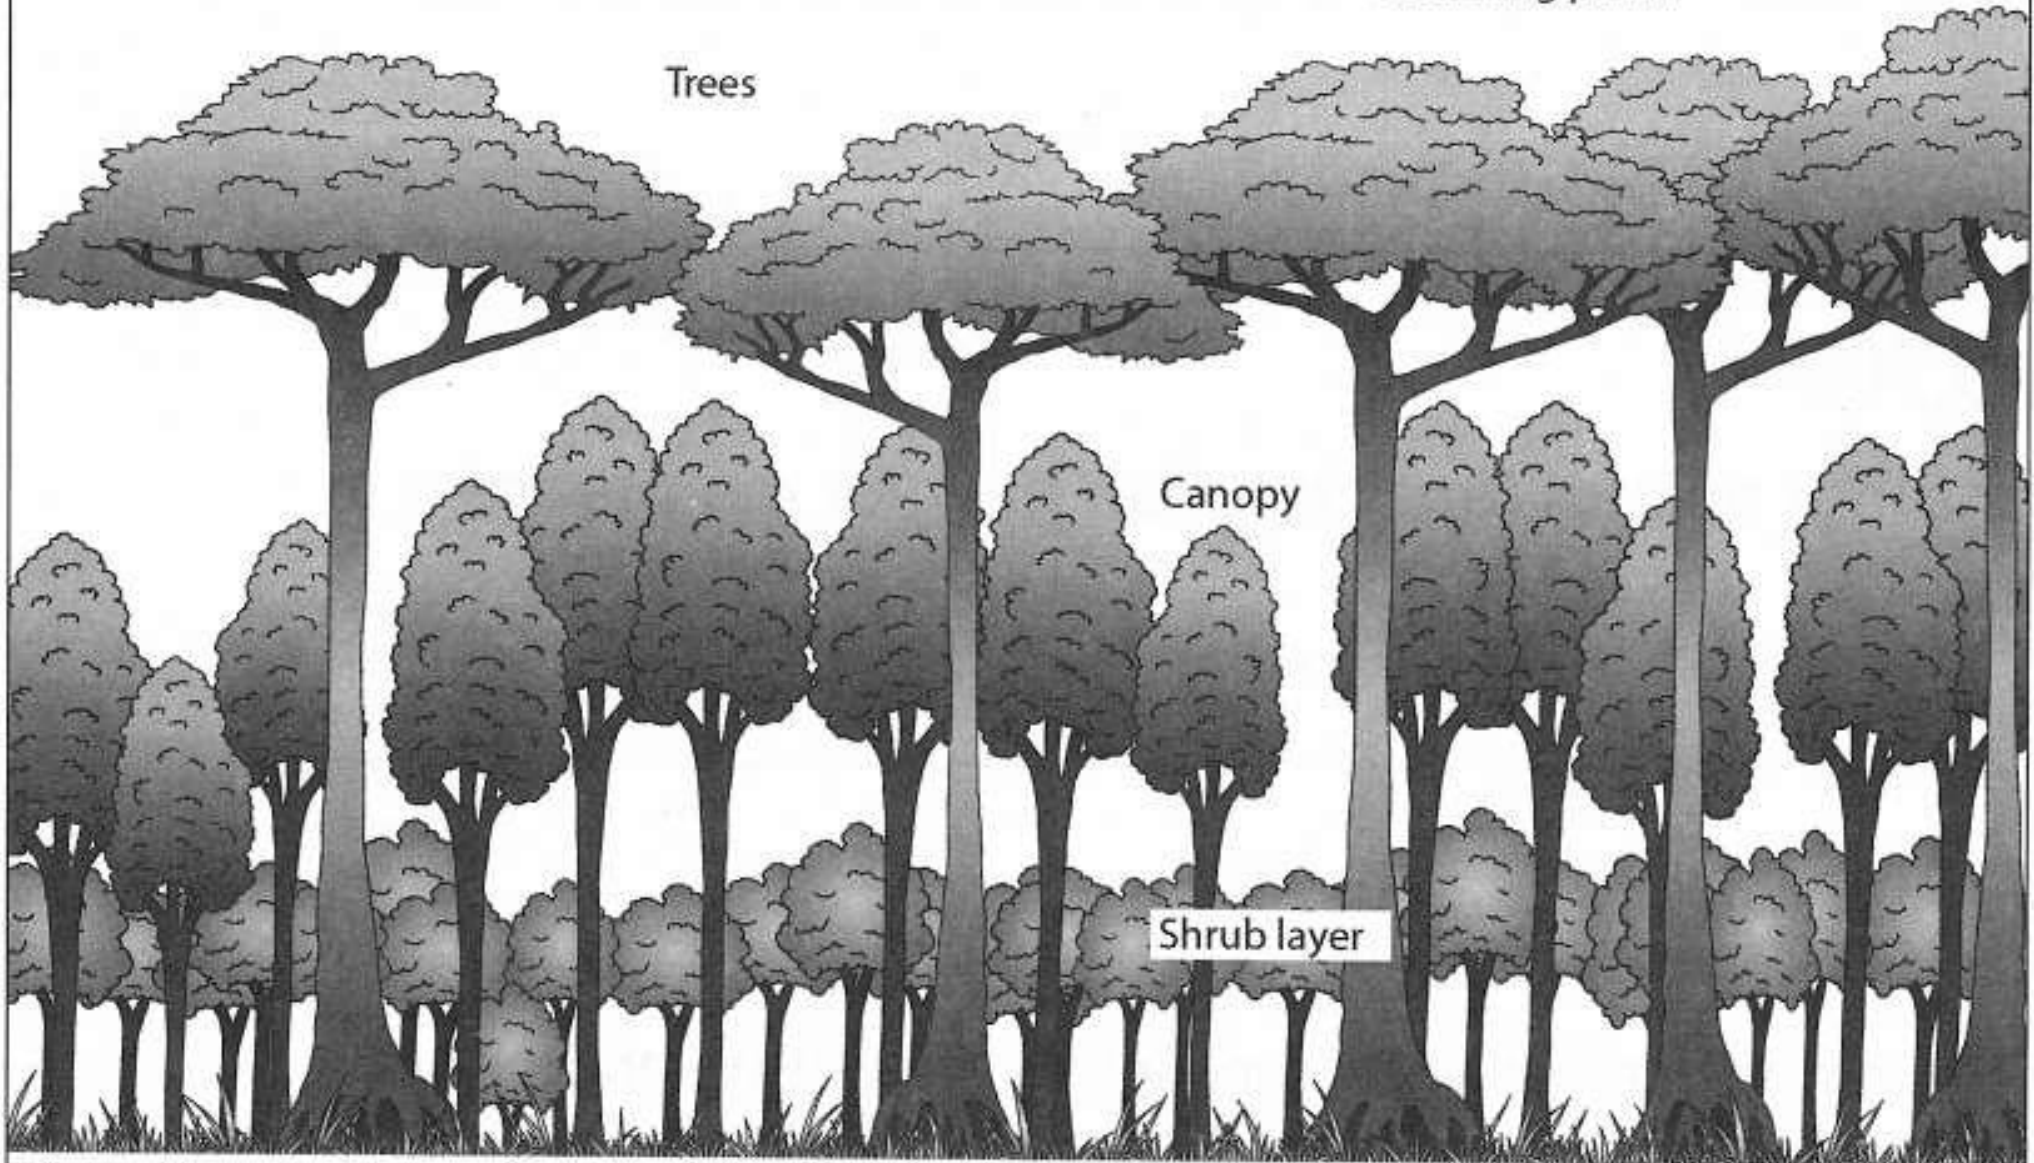

Vines  
Flowering plants

Trees

Canopy

Shrub layer

Ground layer

**1 a** List the types of producers in the tropical forest.

---

---

---

**2** Draw three food chains between a producer and a consumer, using examples from the diagram.

---

---

---

**3** Rewrite this food chain in the correct order.

slug → leaves → lizard

---
