

Everything that is alive

- uses oxygen
- has senses
- can produce young
- need food and water
- moves
- grows
- produces waste products

Living or non-living?

Look at the pictures. Are these things living or non-living?

A car can move but it is non-living.

It's alive!

Observe things outside.

Fill in the table. Two examples have been given, but you must decide if they are living or non-living.

The bear cub
is a baby bear.

The kitten is a
baby cat.

The tadpole is a baby frog.

Plants grow in stages.

A seed is
planted.

The seed begins
to grow.

A young plant
develops.

The young plant
becomes a fully
grown, flowering
plant.
