♥ Hello ♥

What do we
want to study?

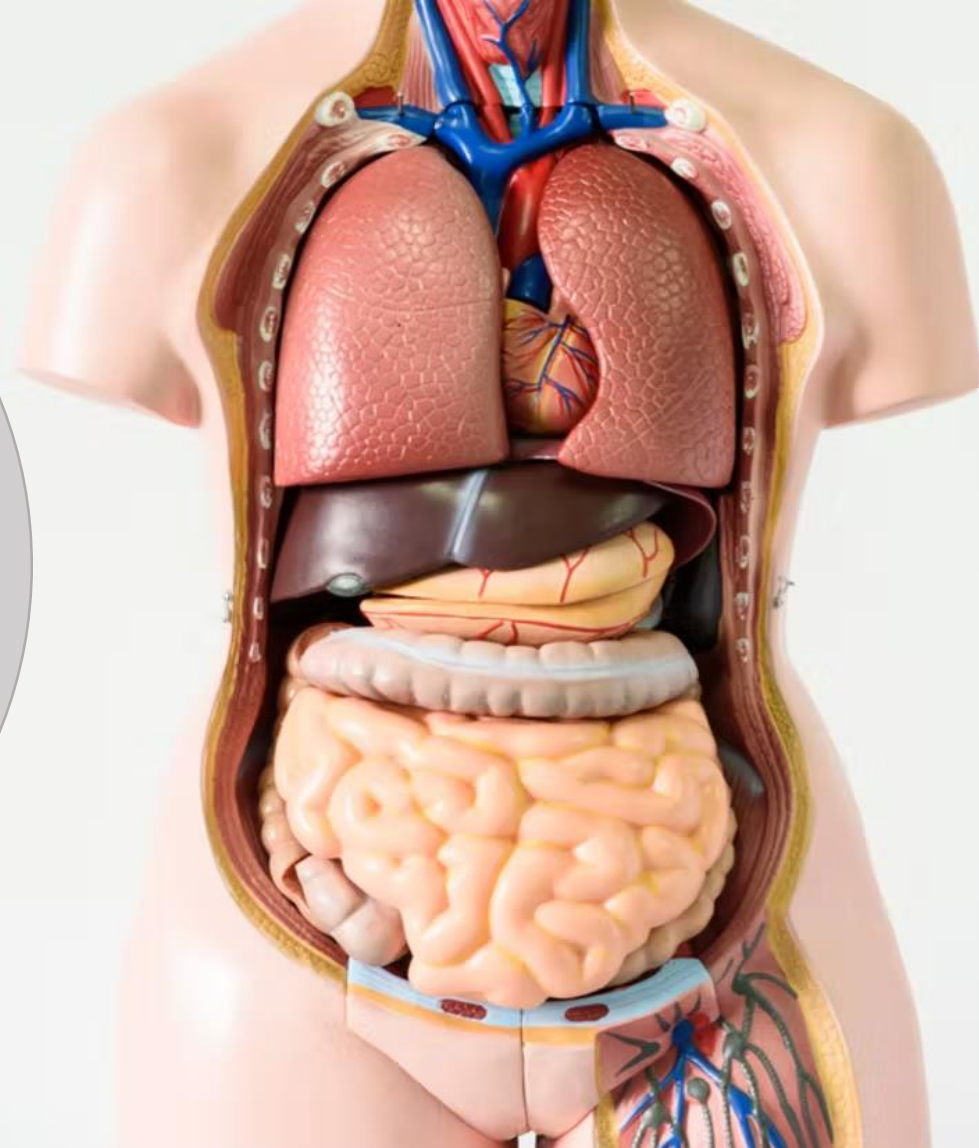

Remove

What's inside your body?

The parts
inside
your body
are called

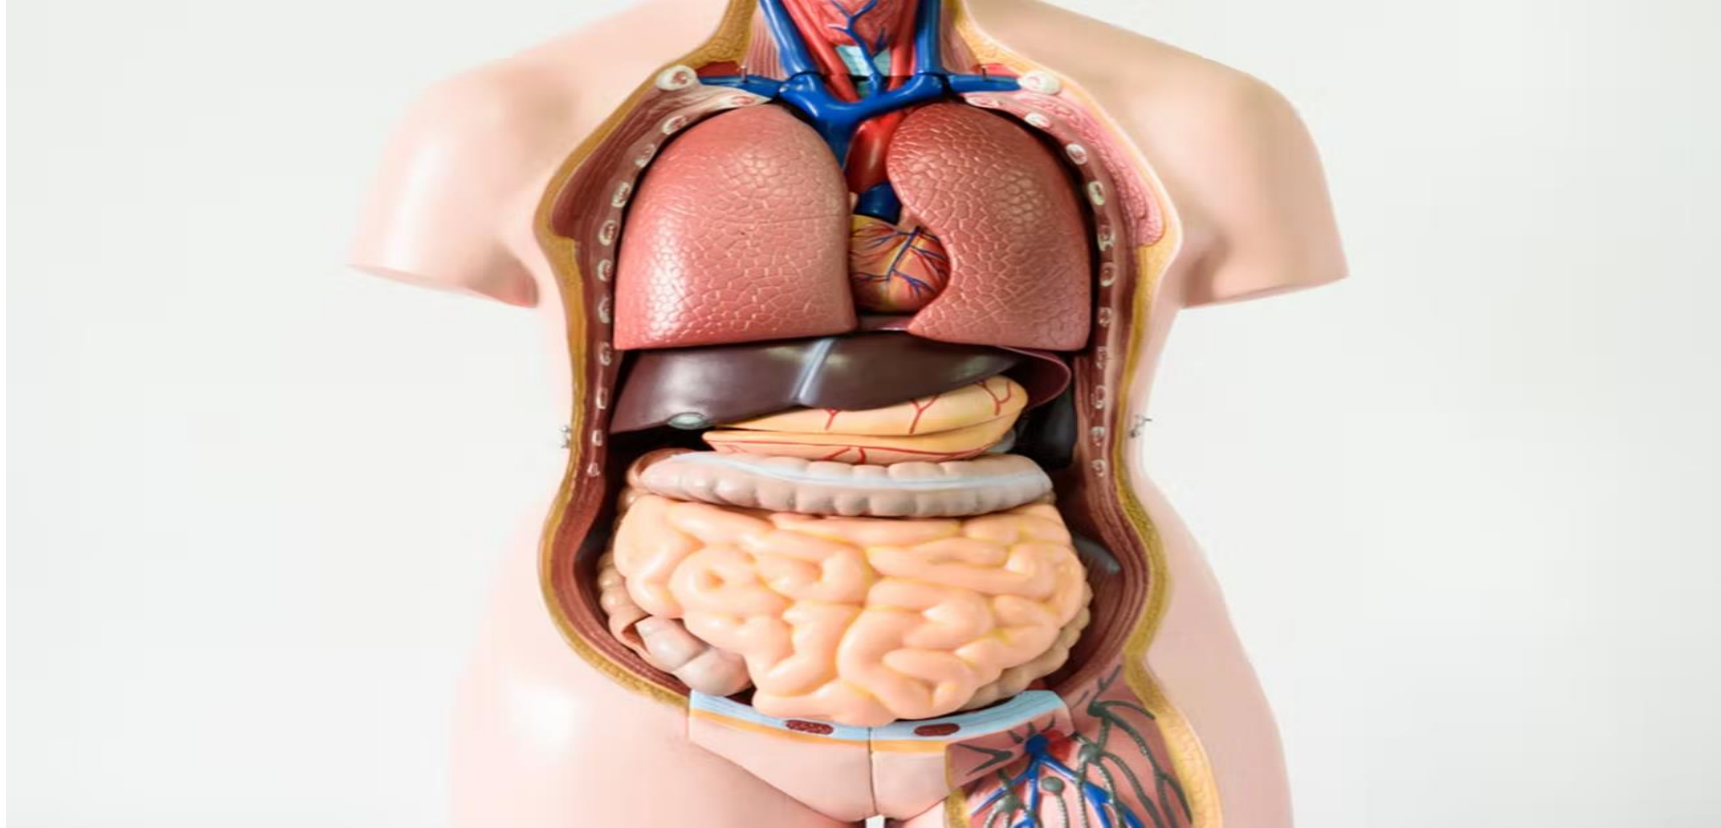

....

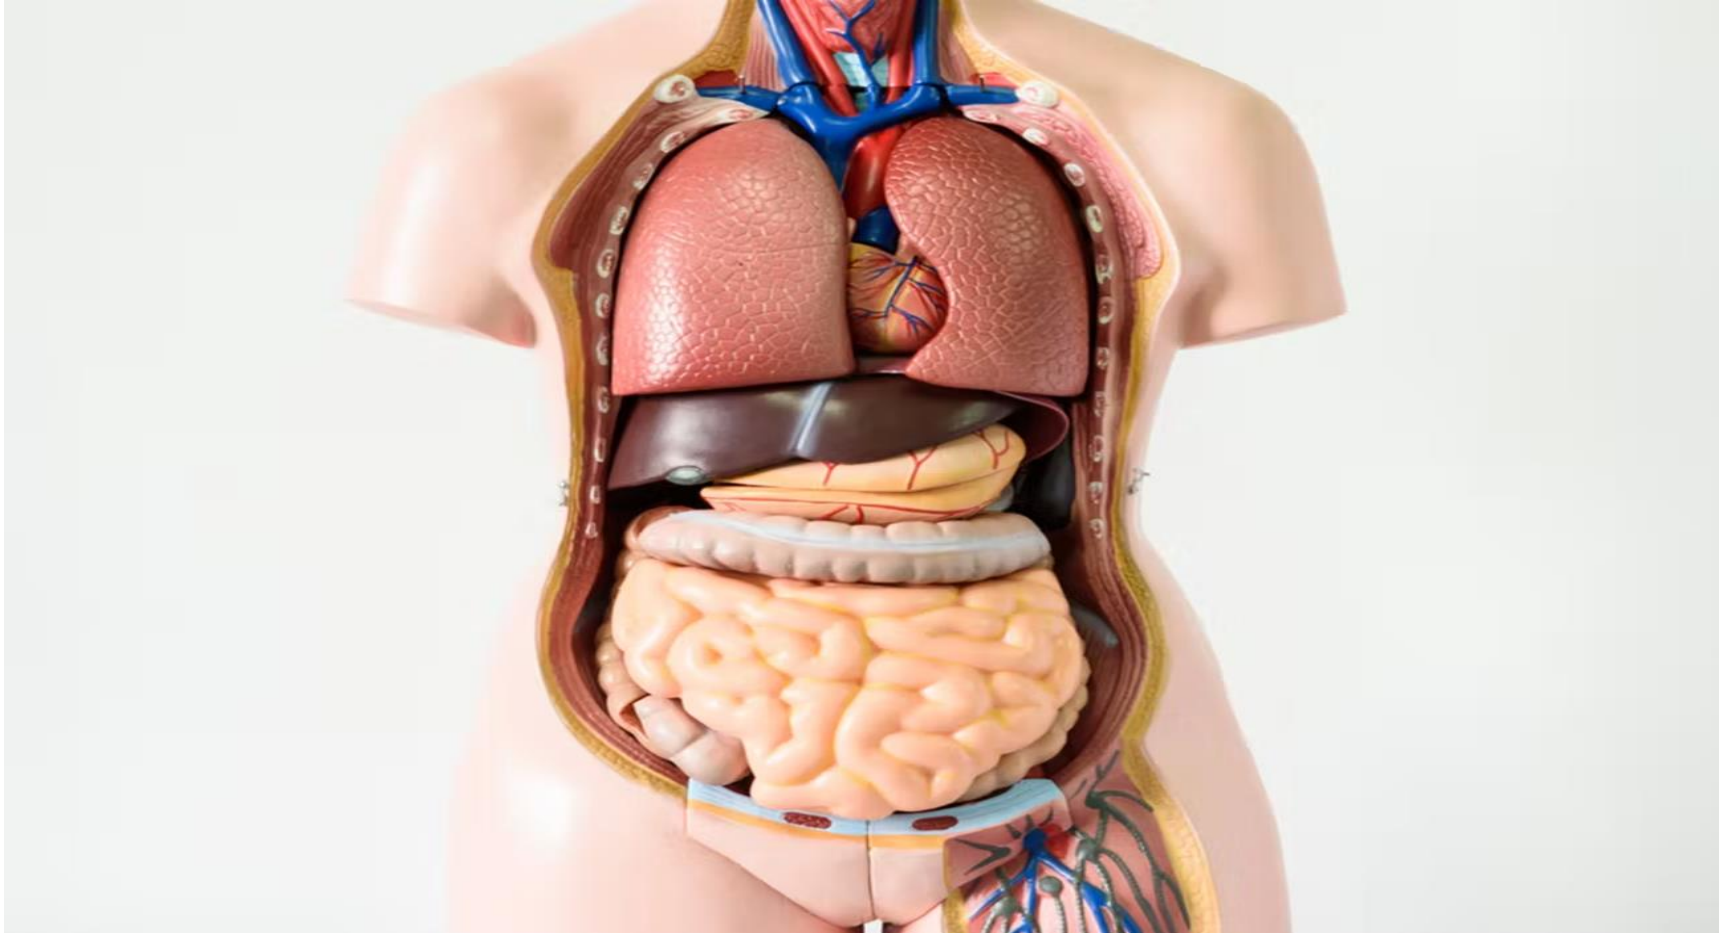

organs

Why do you
need these
organs?

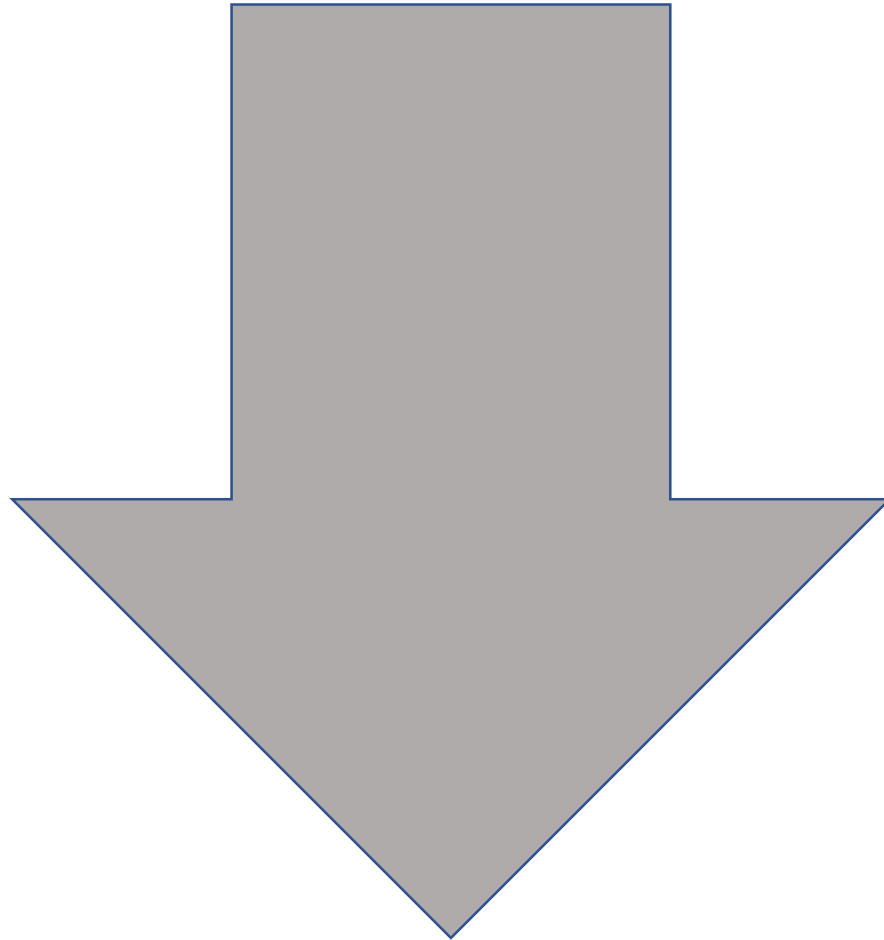

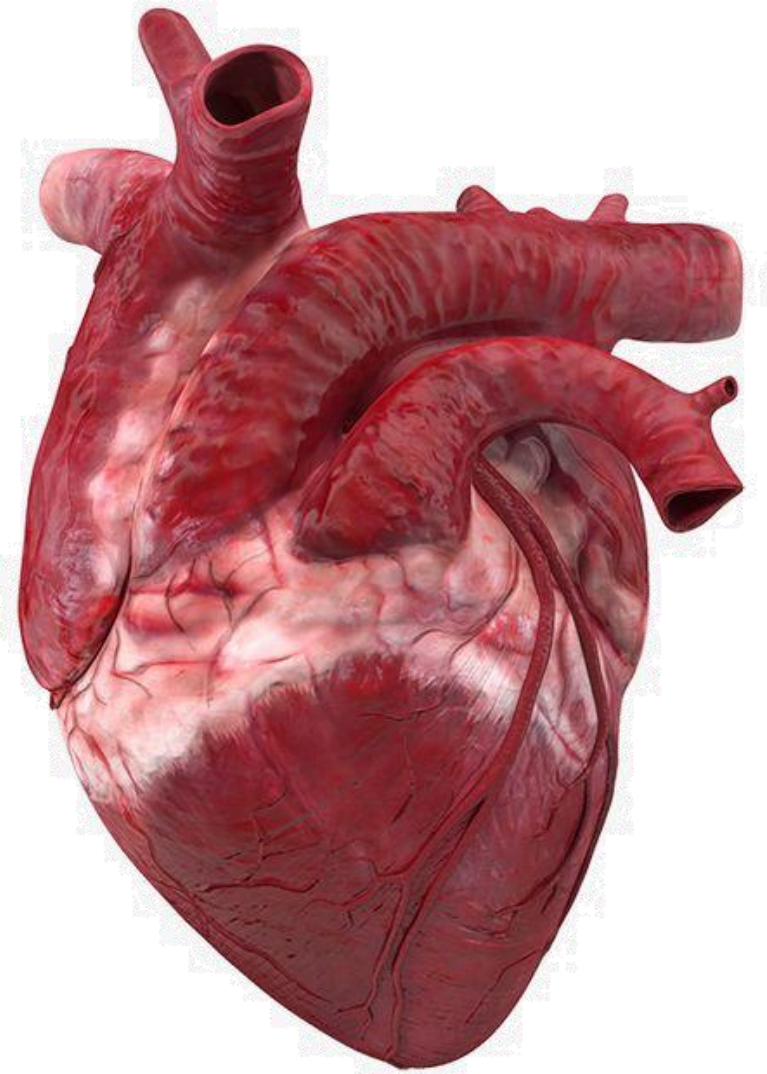

The **body organs** do different jobs to keep
you **alive** and **healthy**.

Different organs work together to form
organ systems.

The major body organs are...

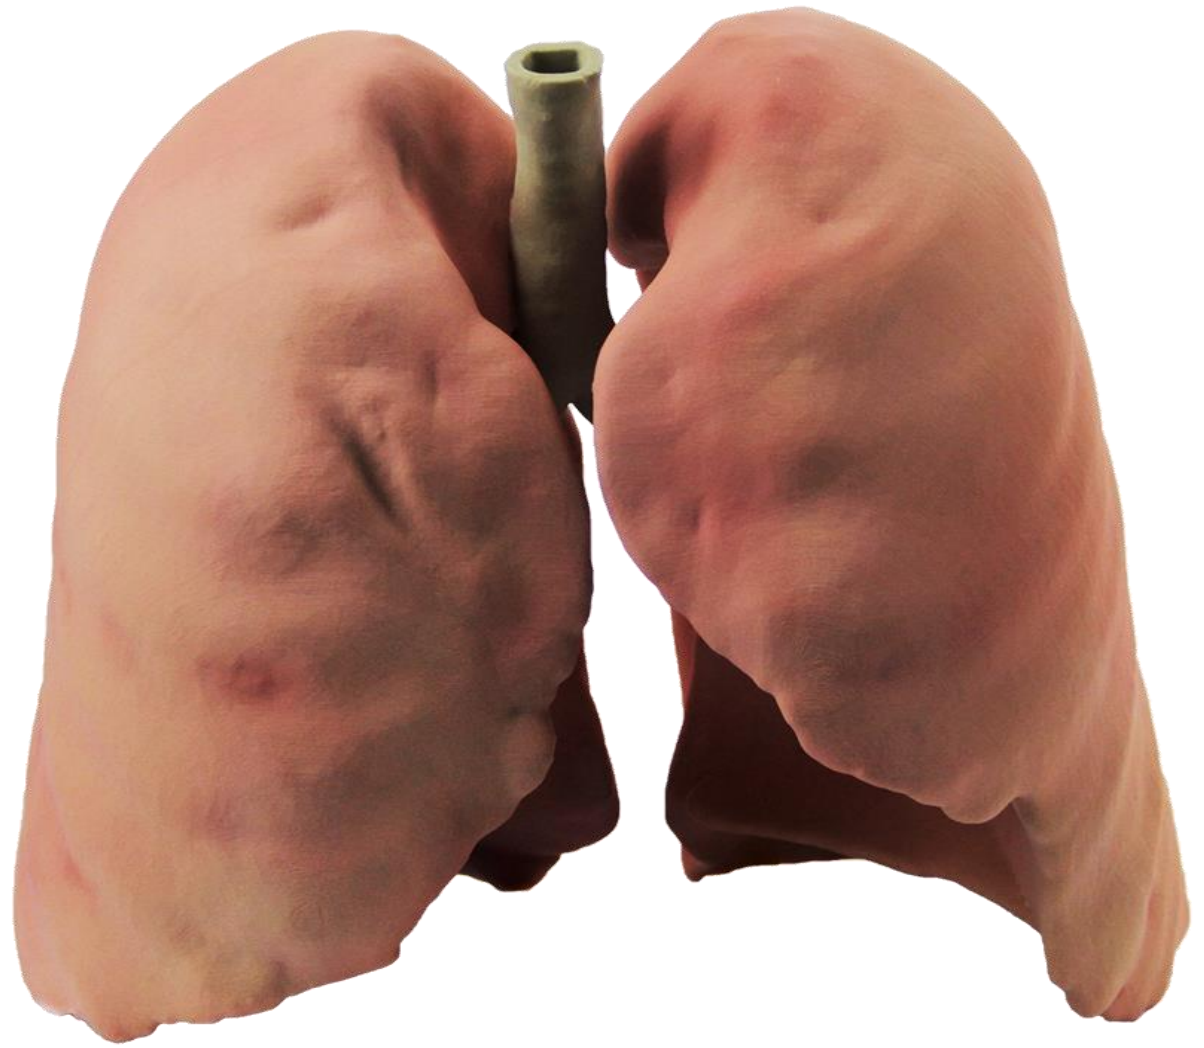

heart

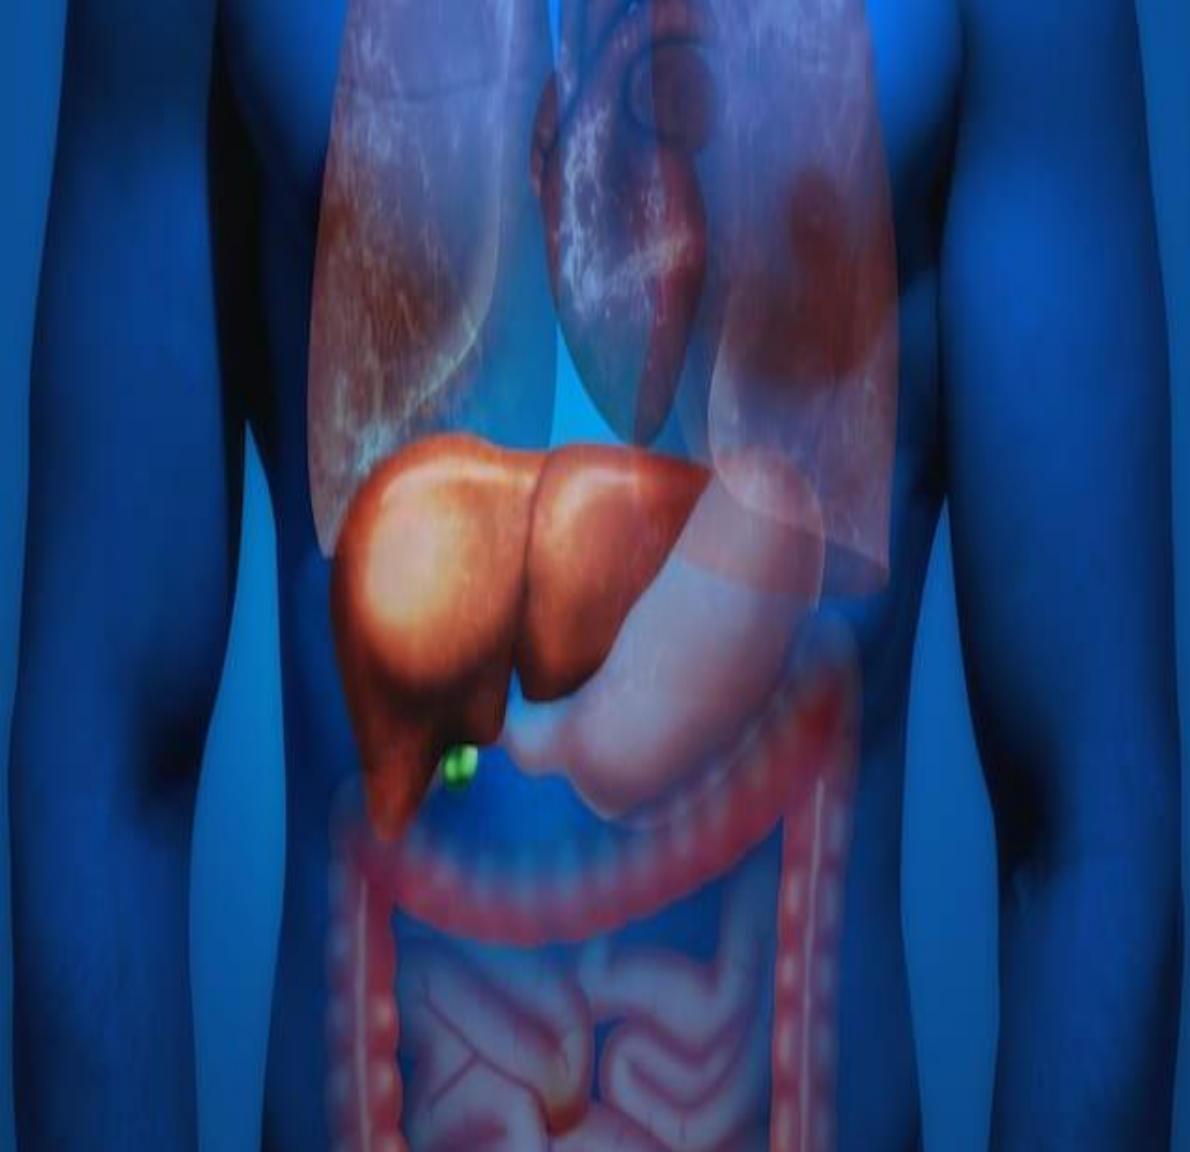

brain

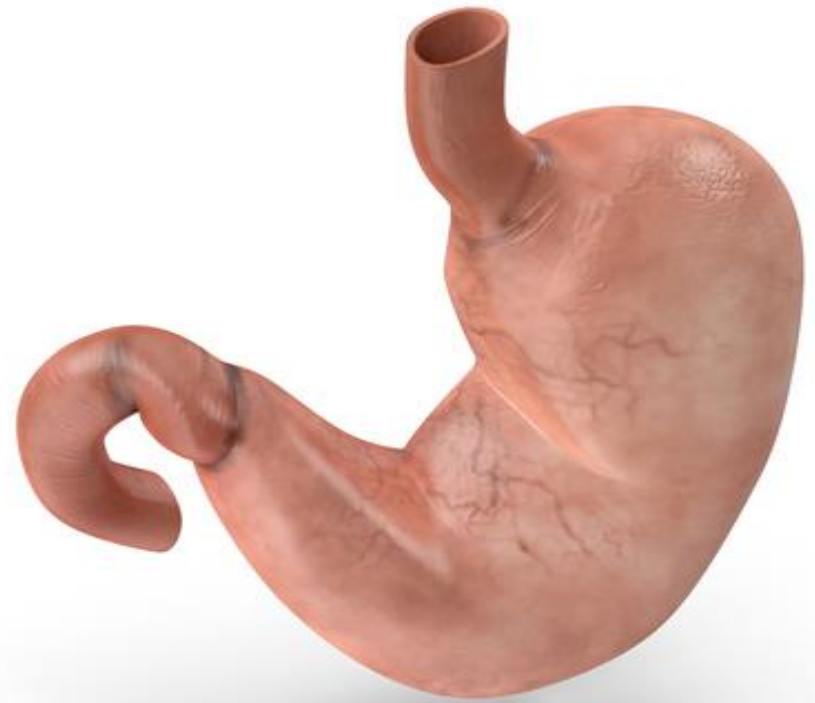

lungs

kidneys

liver

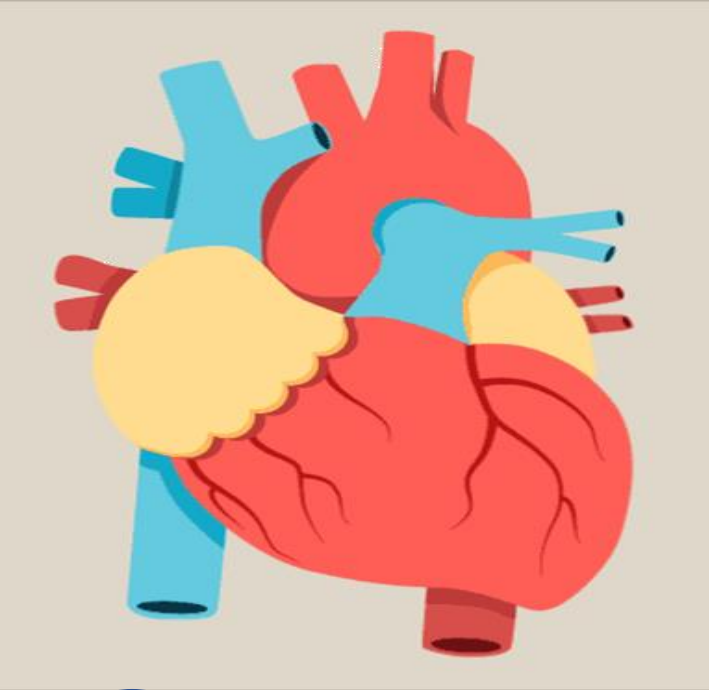

stomach

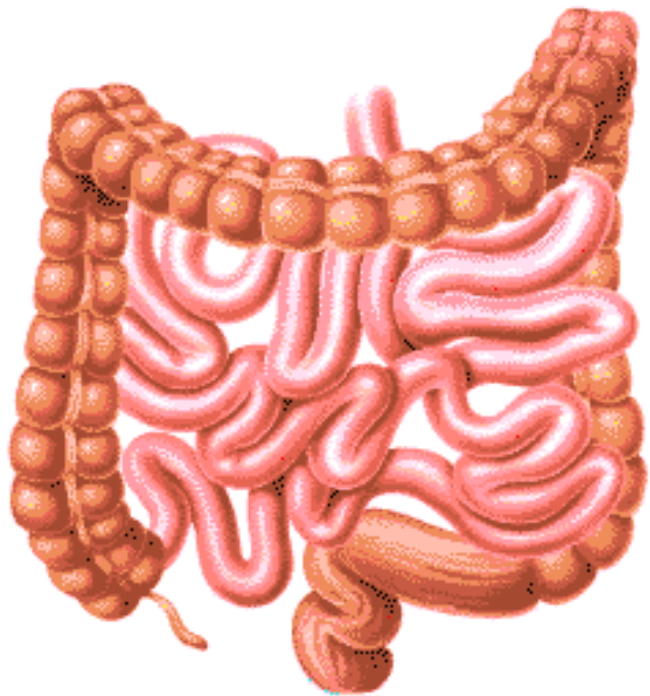

large intestine

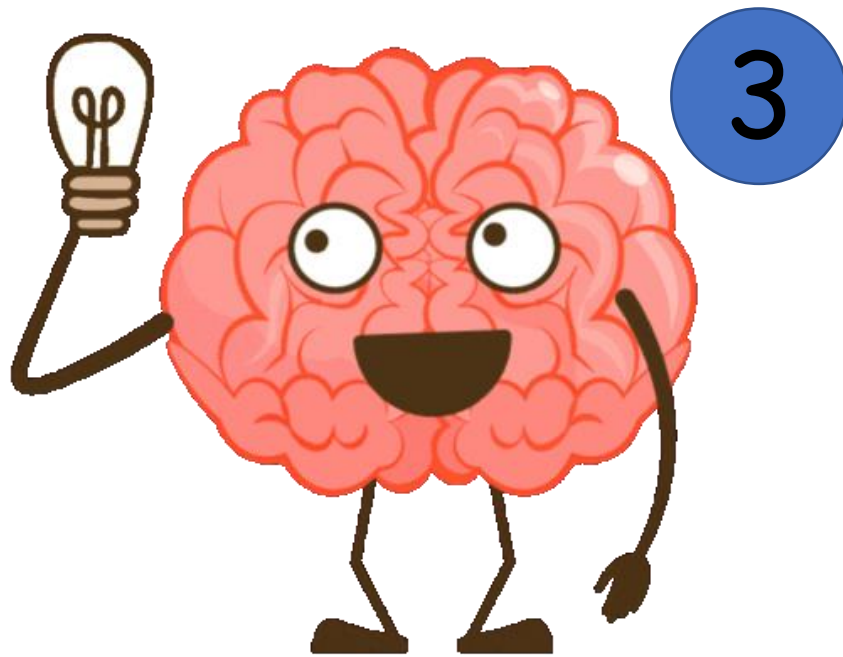

small intestine
