♥ Hello ♥

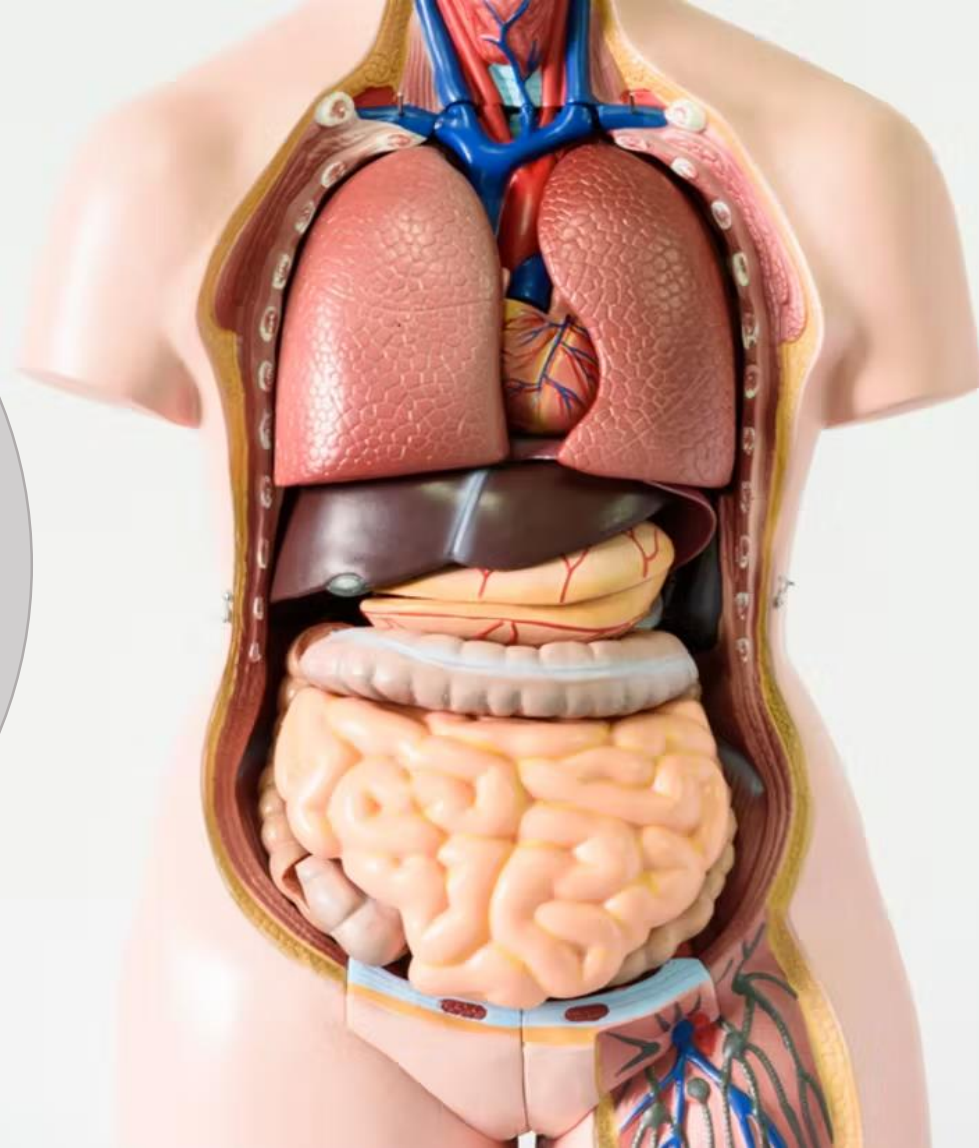

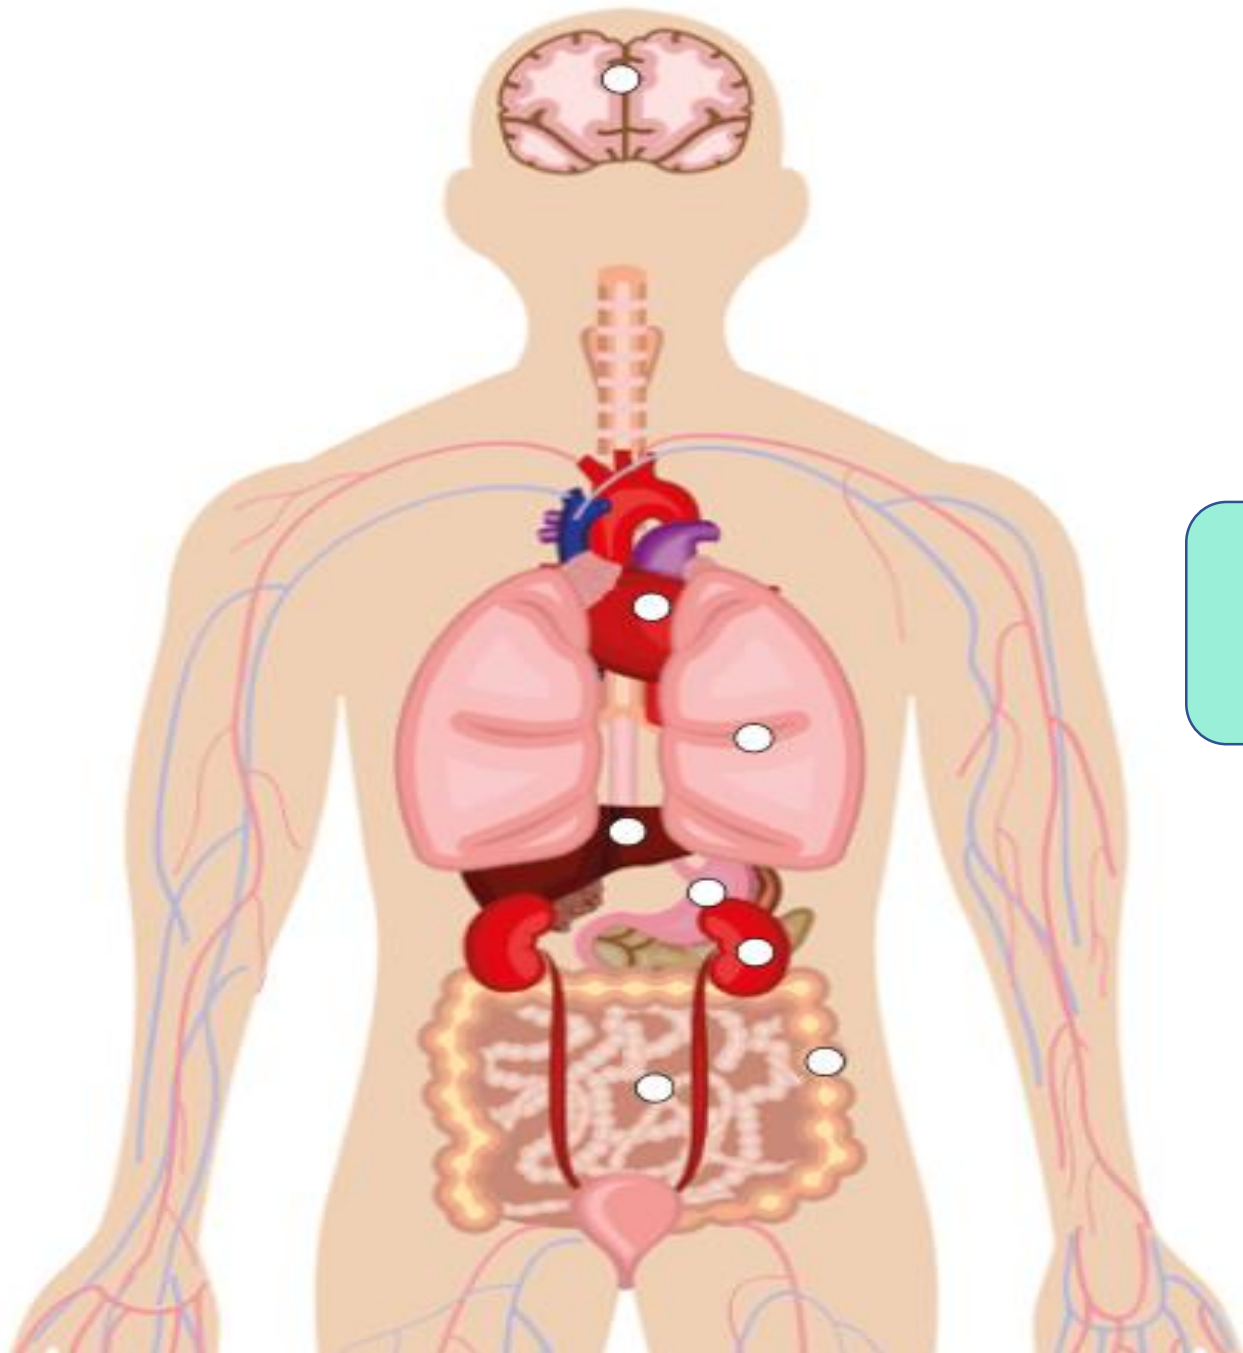

The parts
inside
your body
are called

....

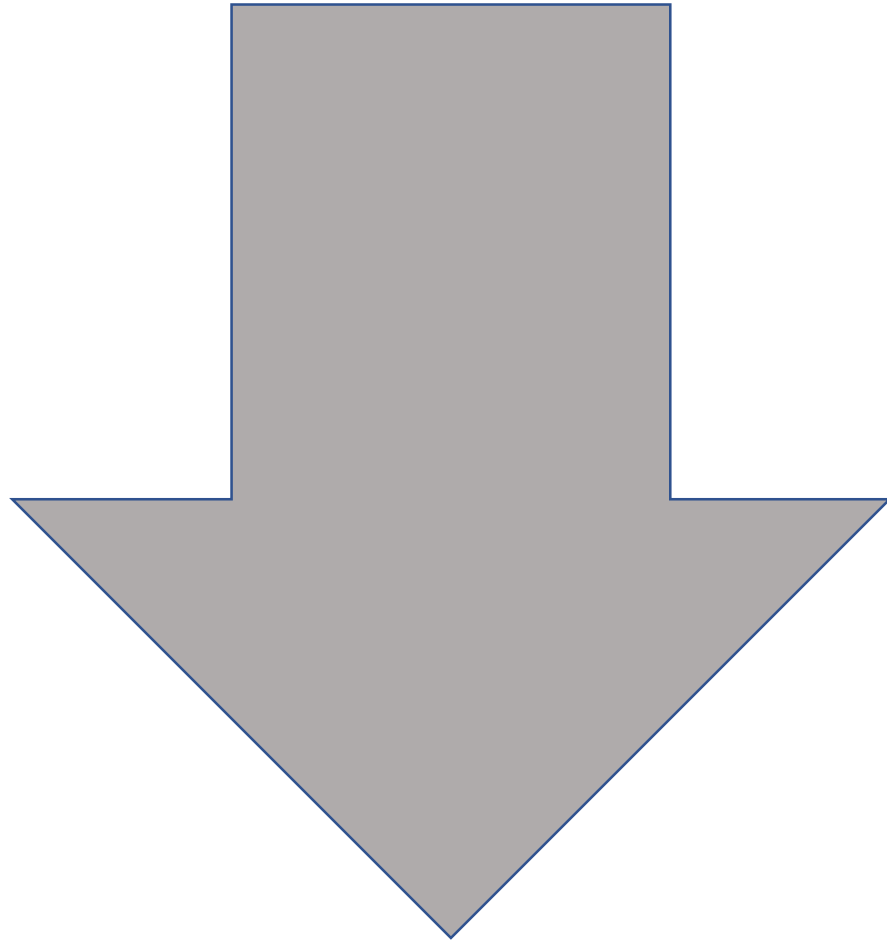

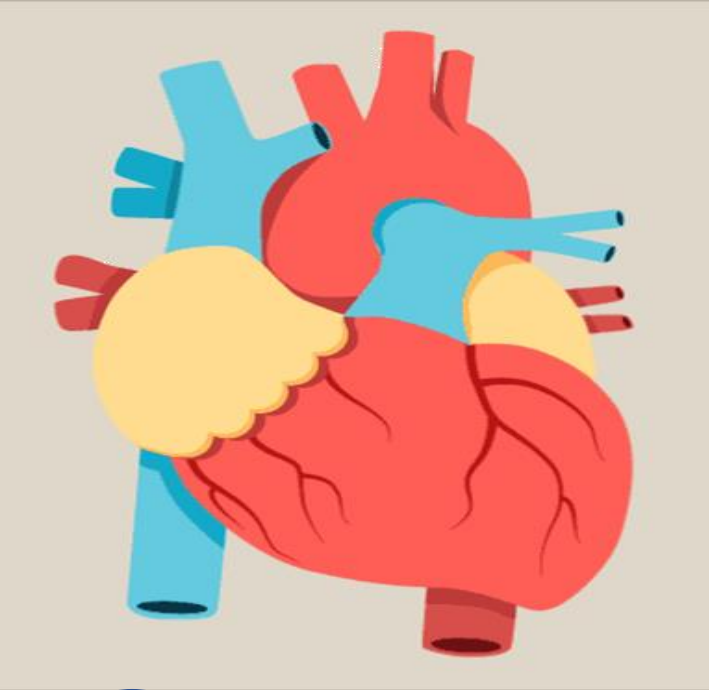

organs

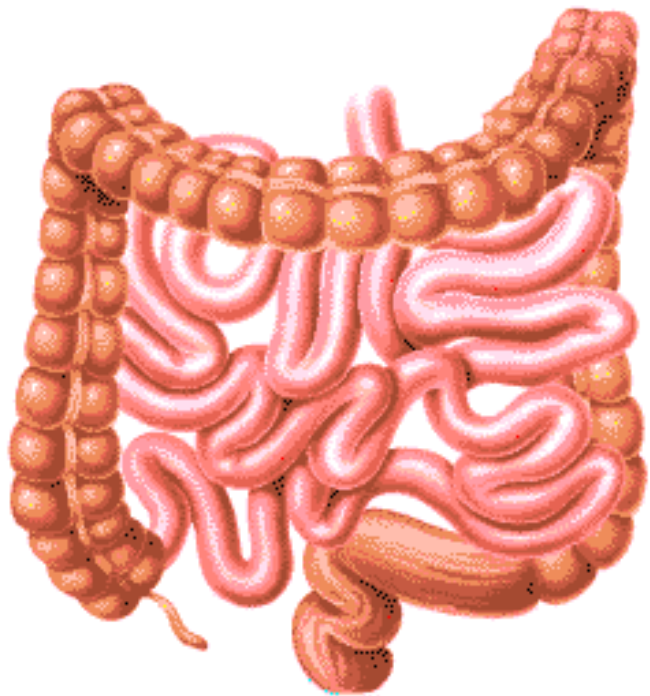

Body organs keep you
..... and

The major body organs are...

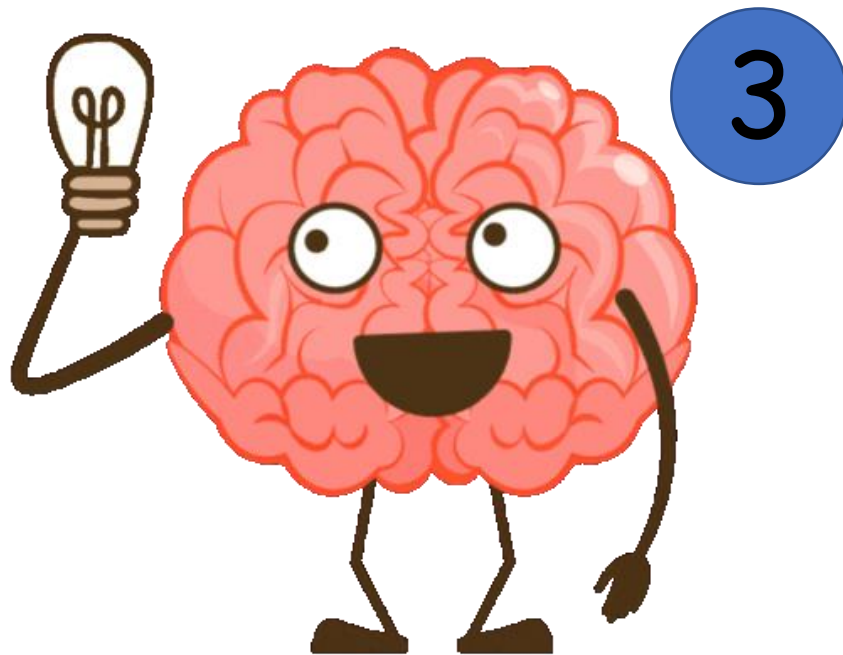

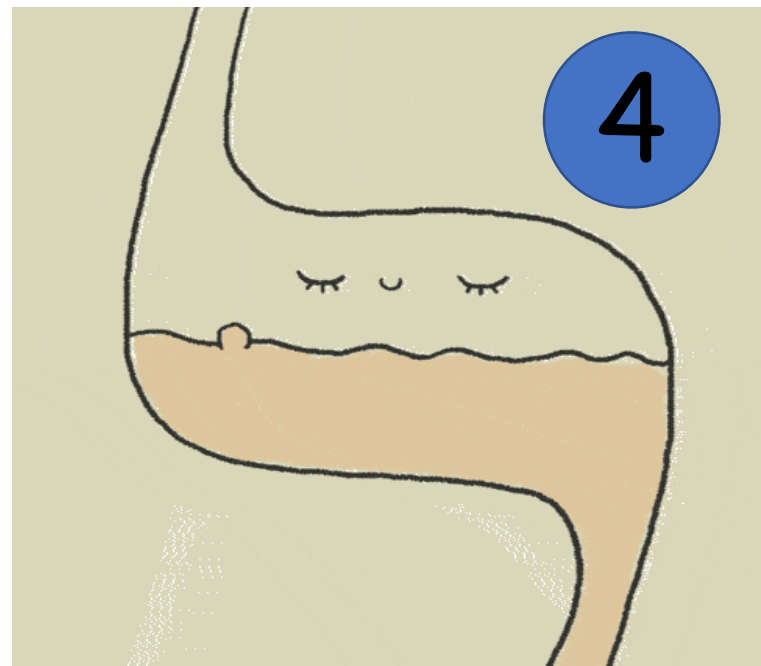

1

2

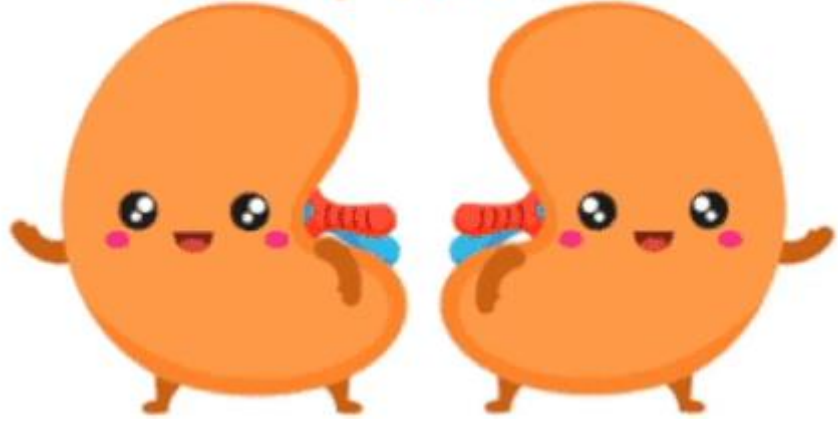

3

4

Hi!

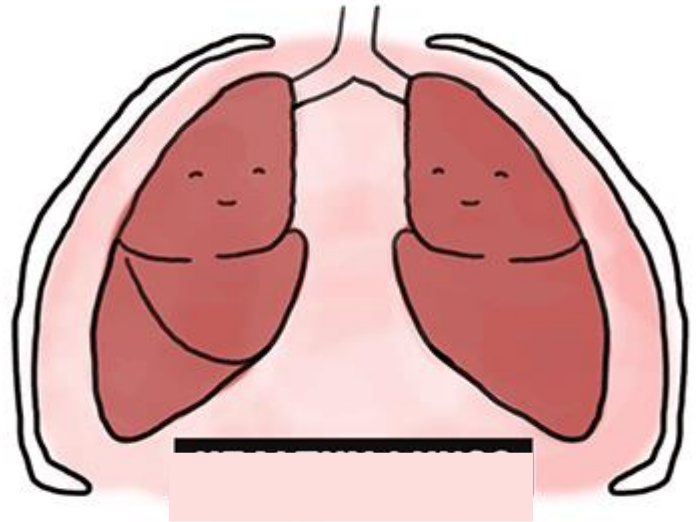

1

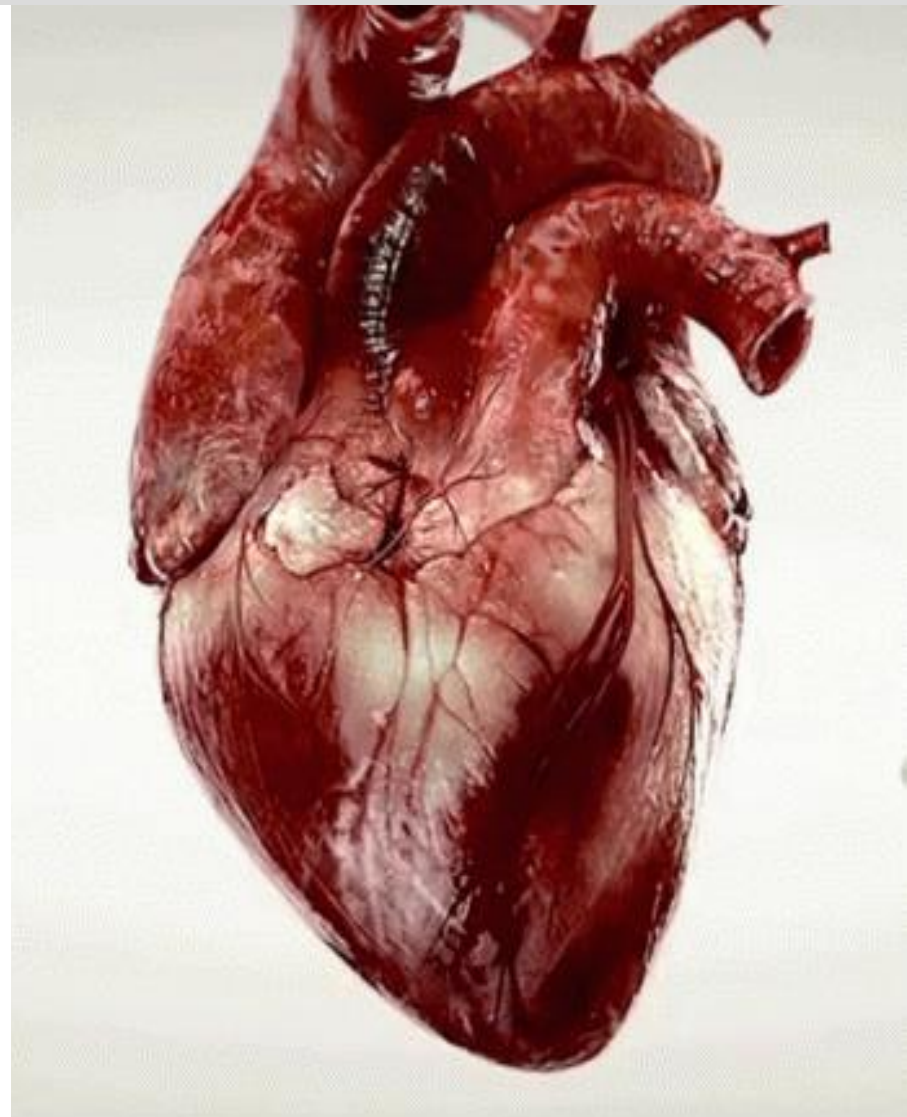

2

3

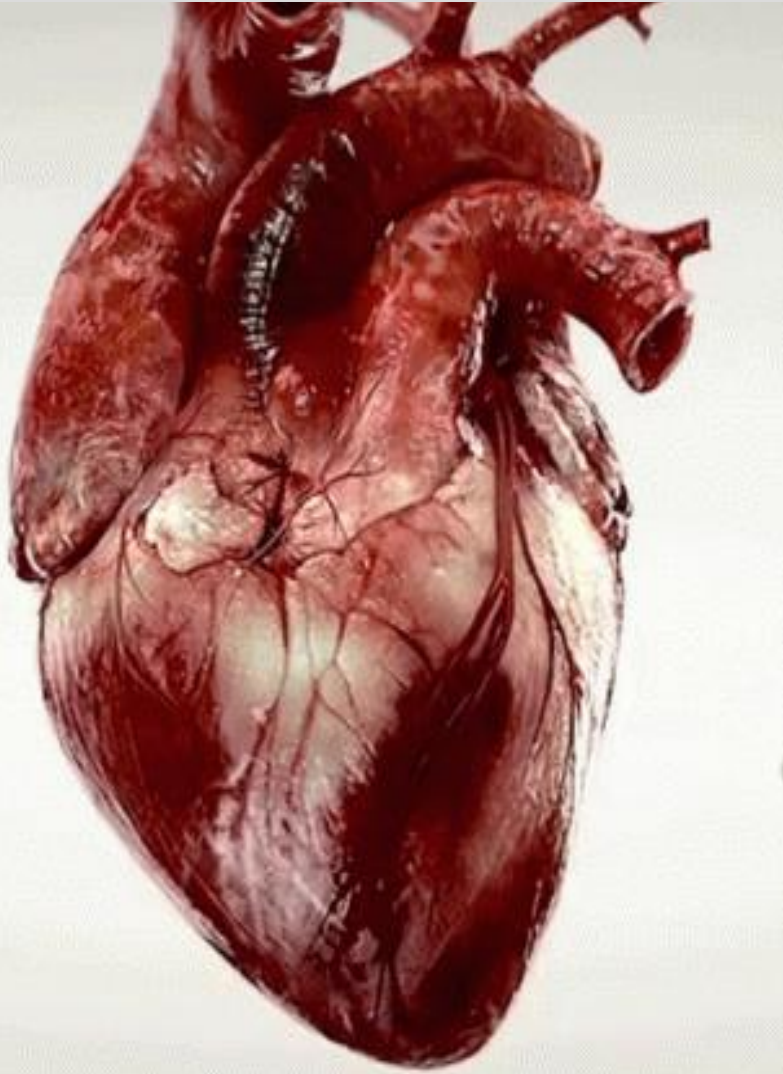

Put your hand on your chest.

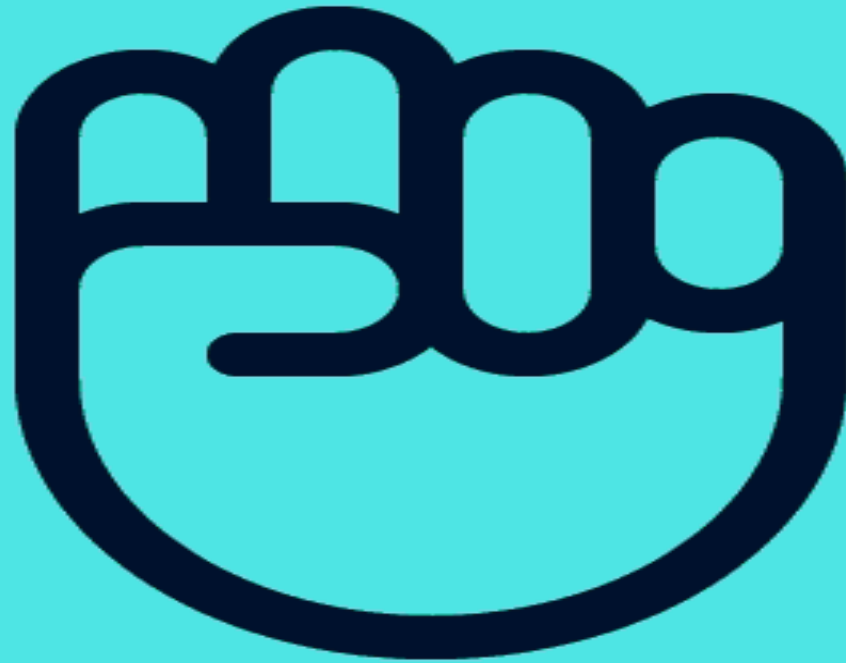

Can you feel your heart **beating**?

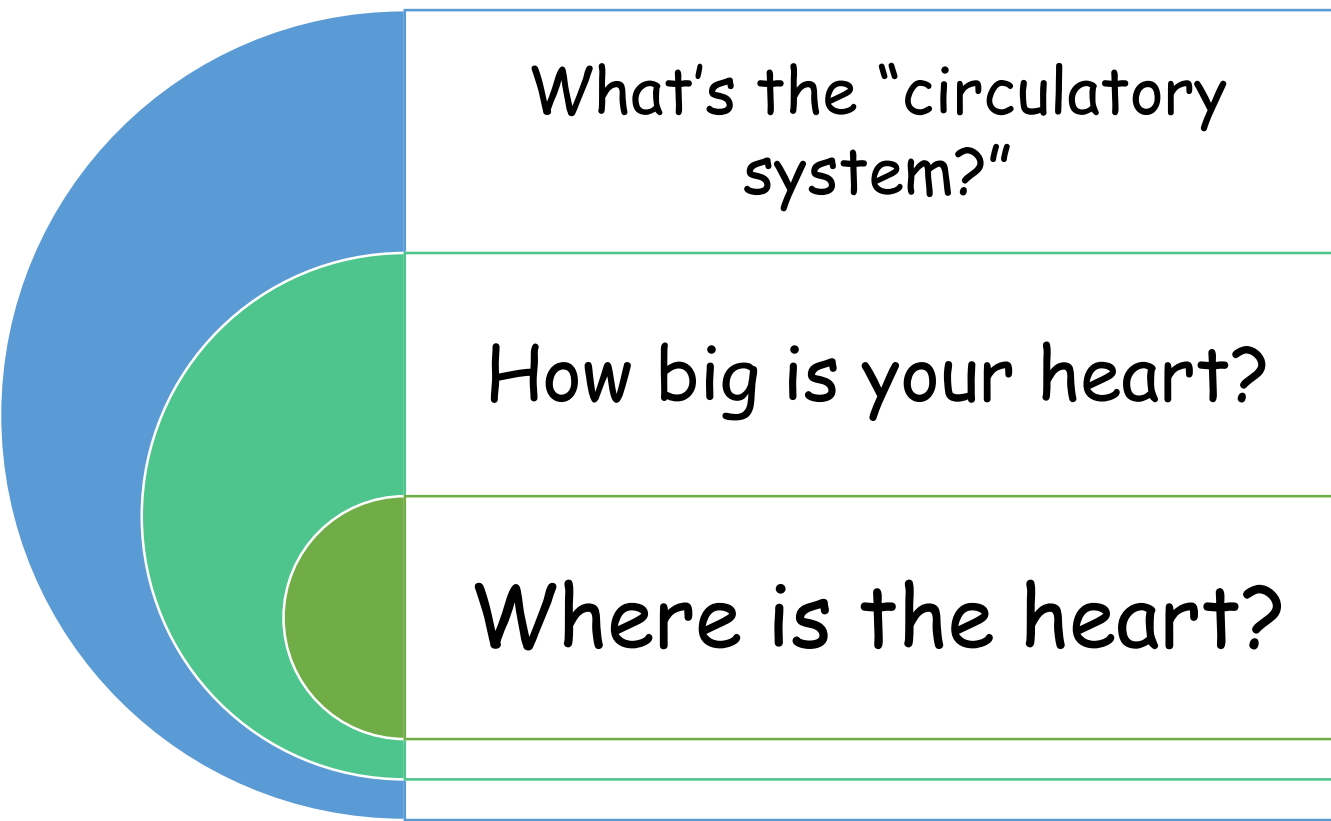

Place two fingers at wrist.

Can you feel your heart **beating**?

How many times does your heart **beat** per minute?

What's the "circulatory system?"

How big is your heart?

Where is the heart?

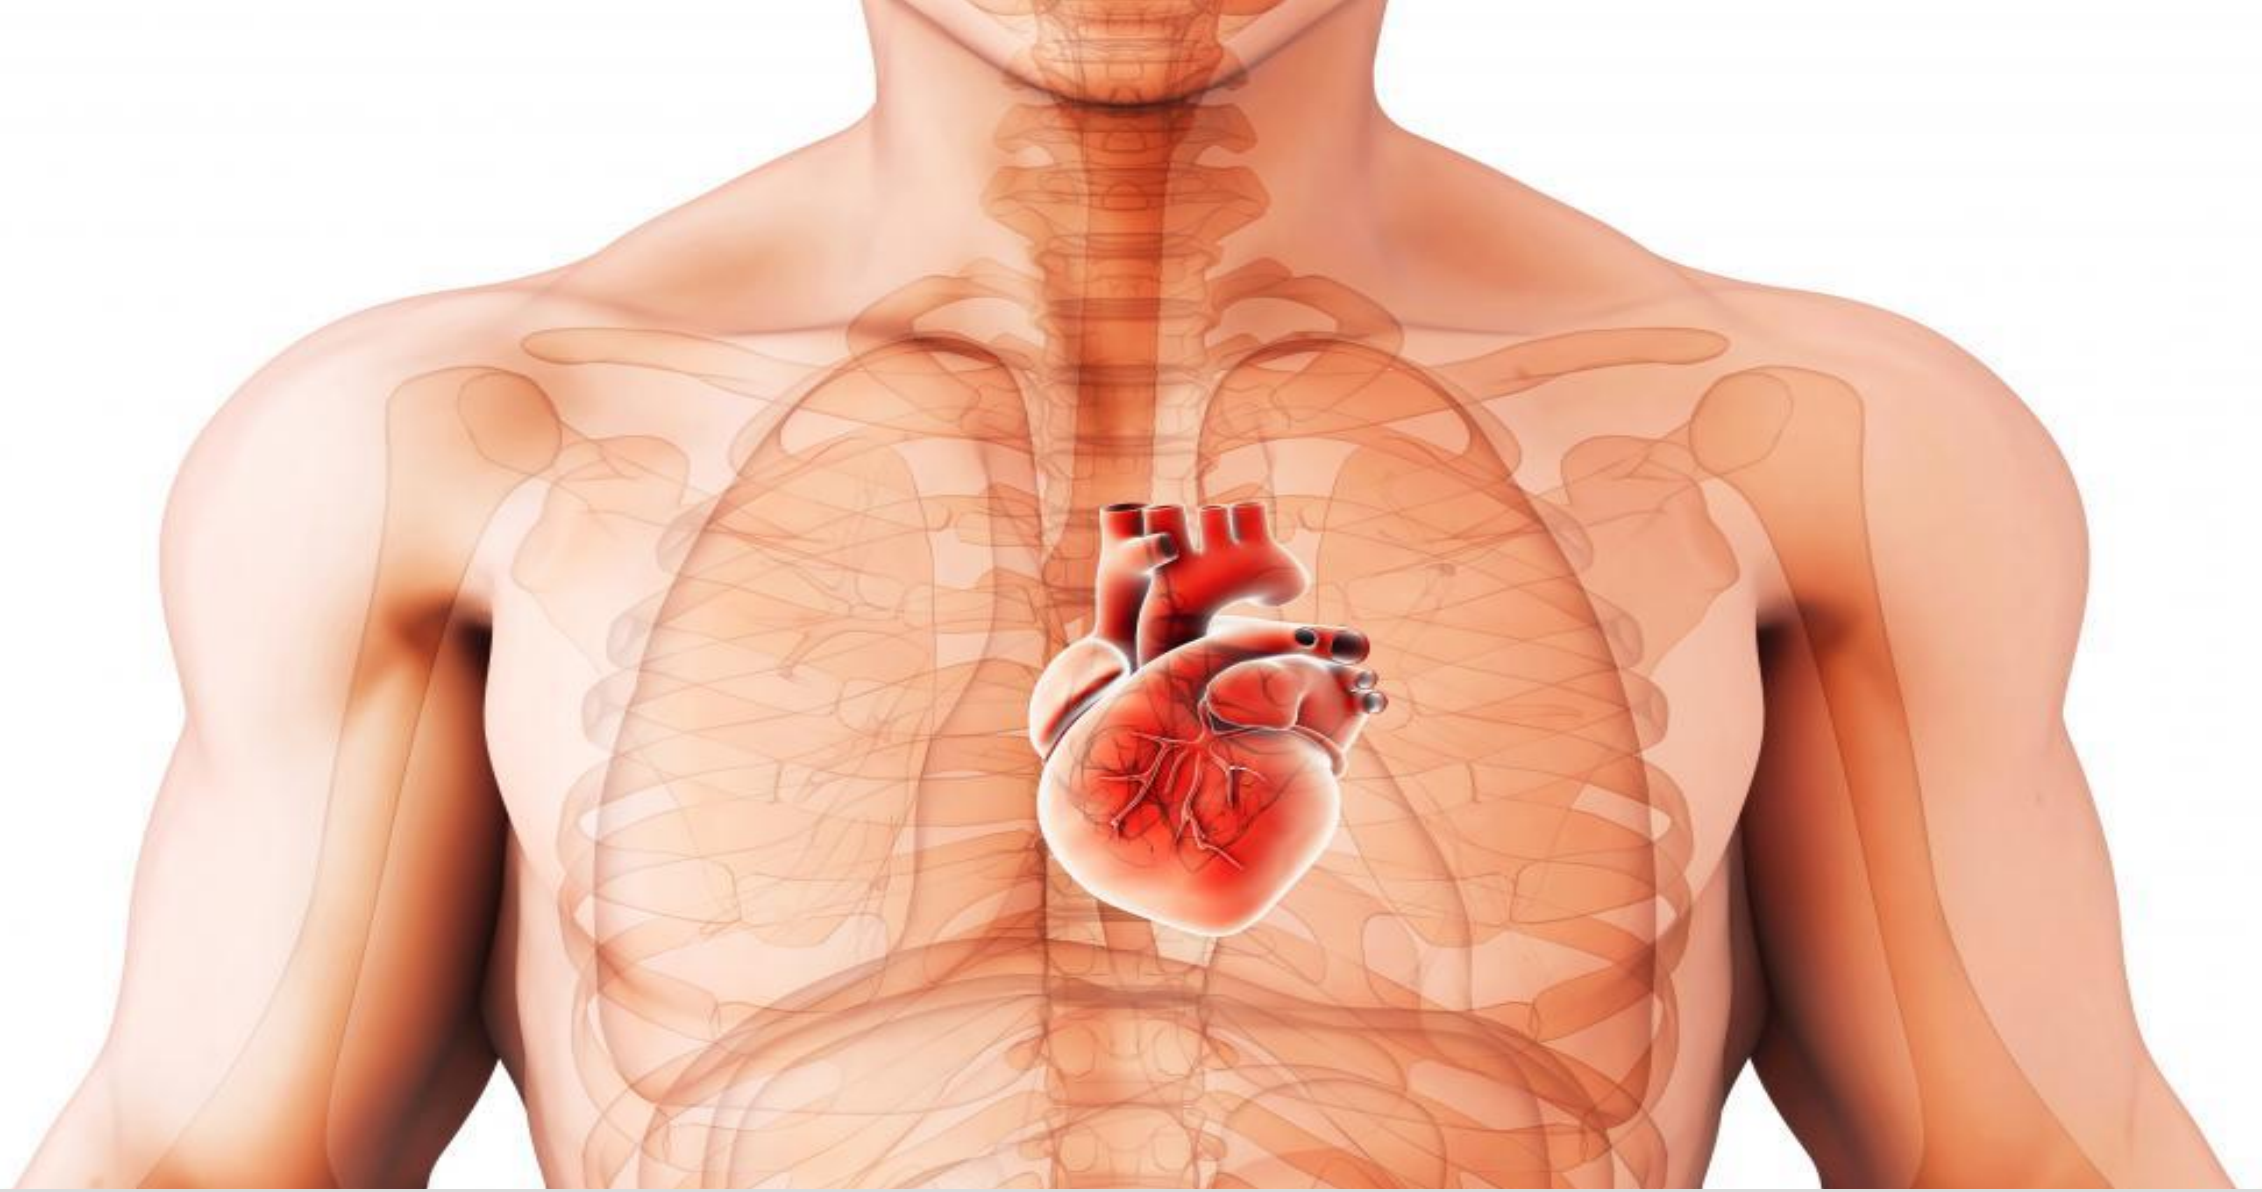

Watch a video
and answer
the questions:

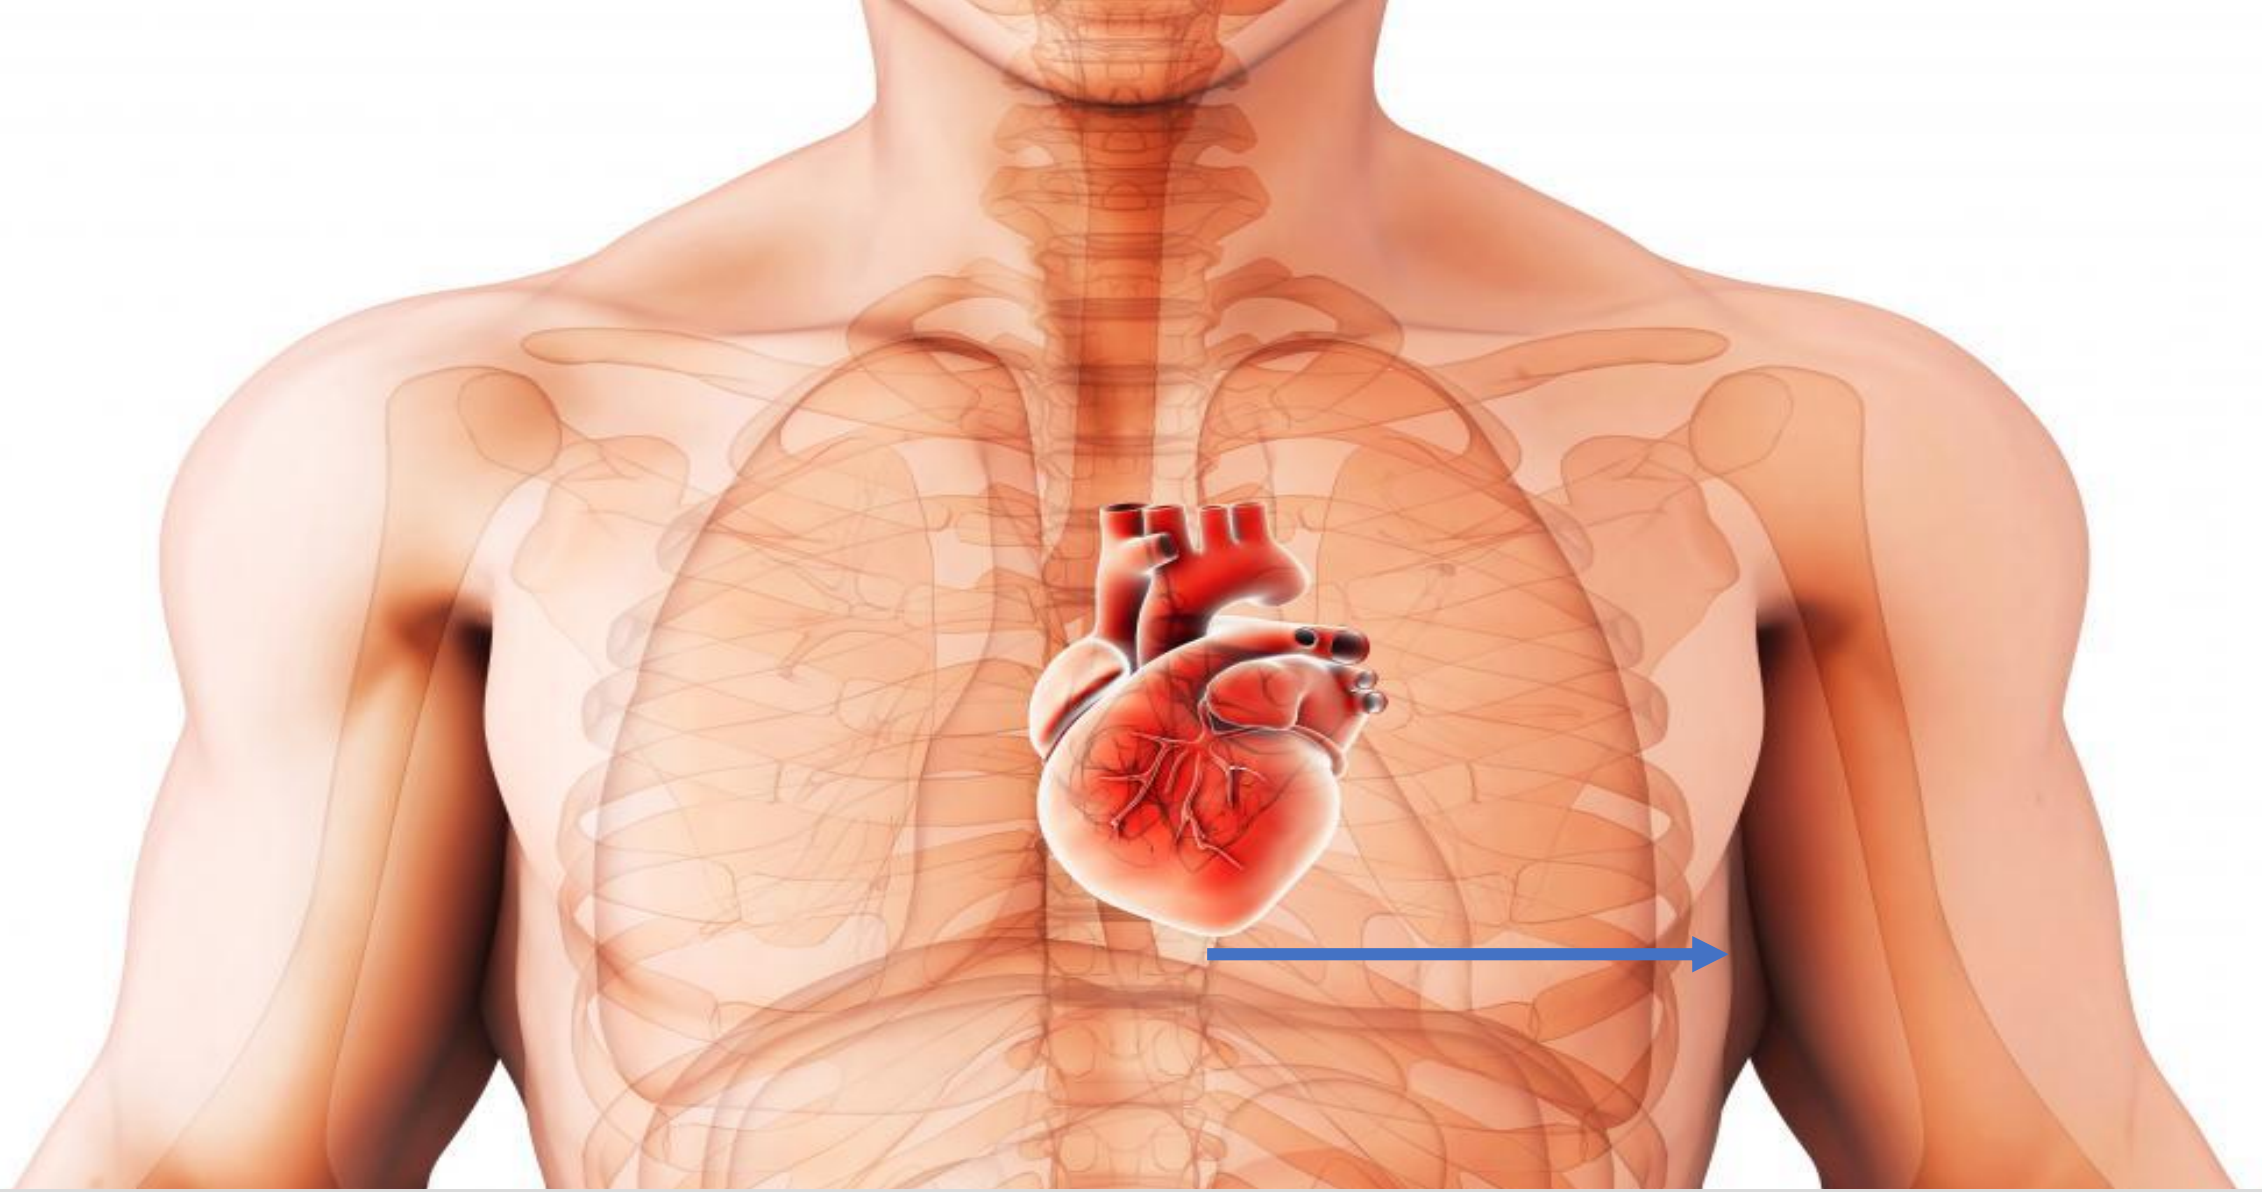

Make a fist with your hand.

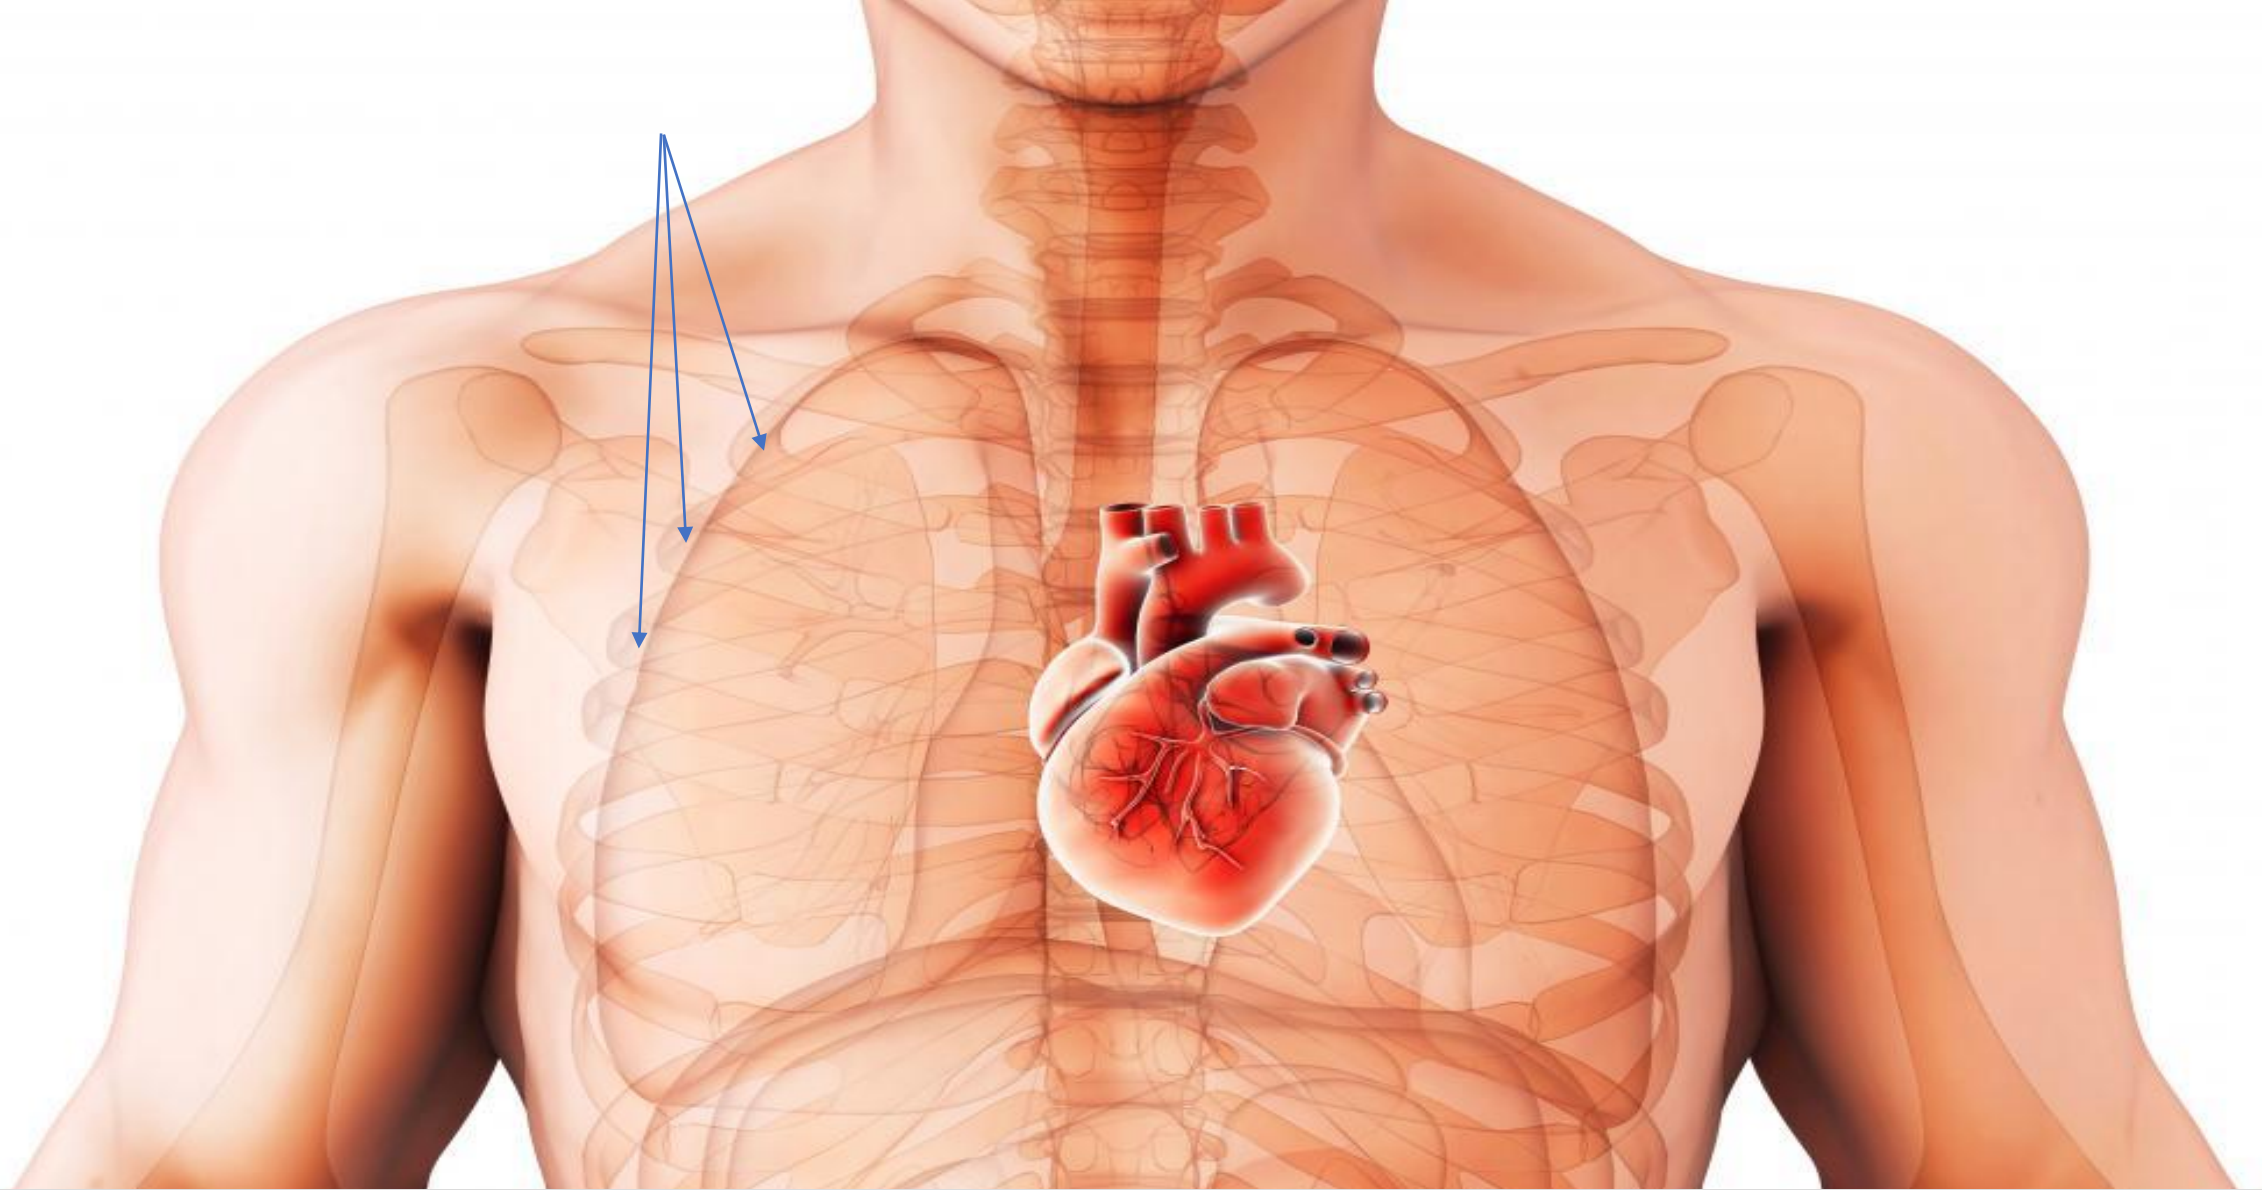

That's how big your heart is: **the size of your fist.**

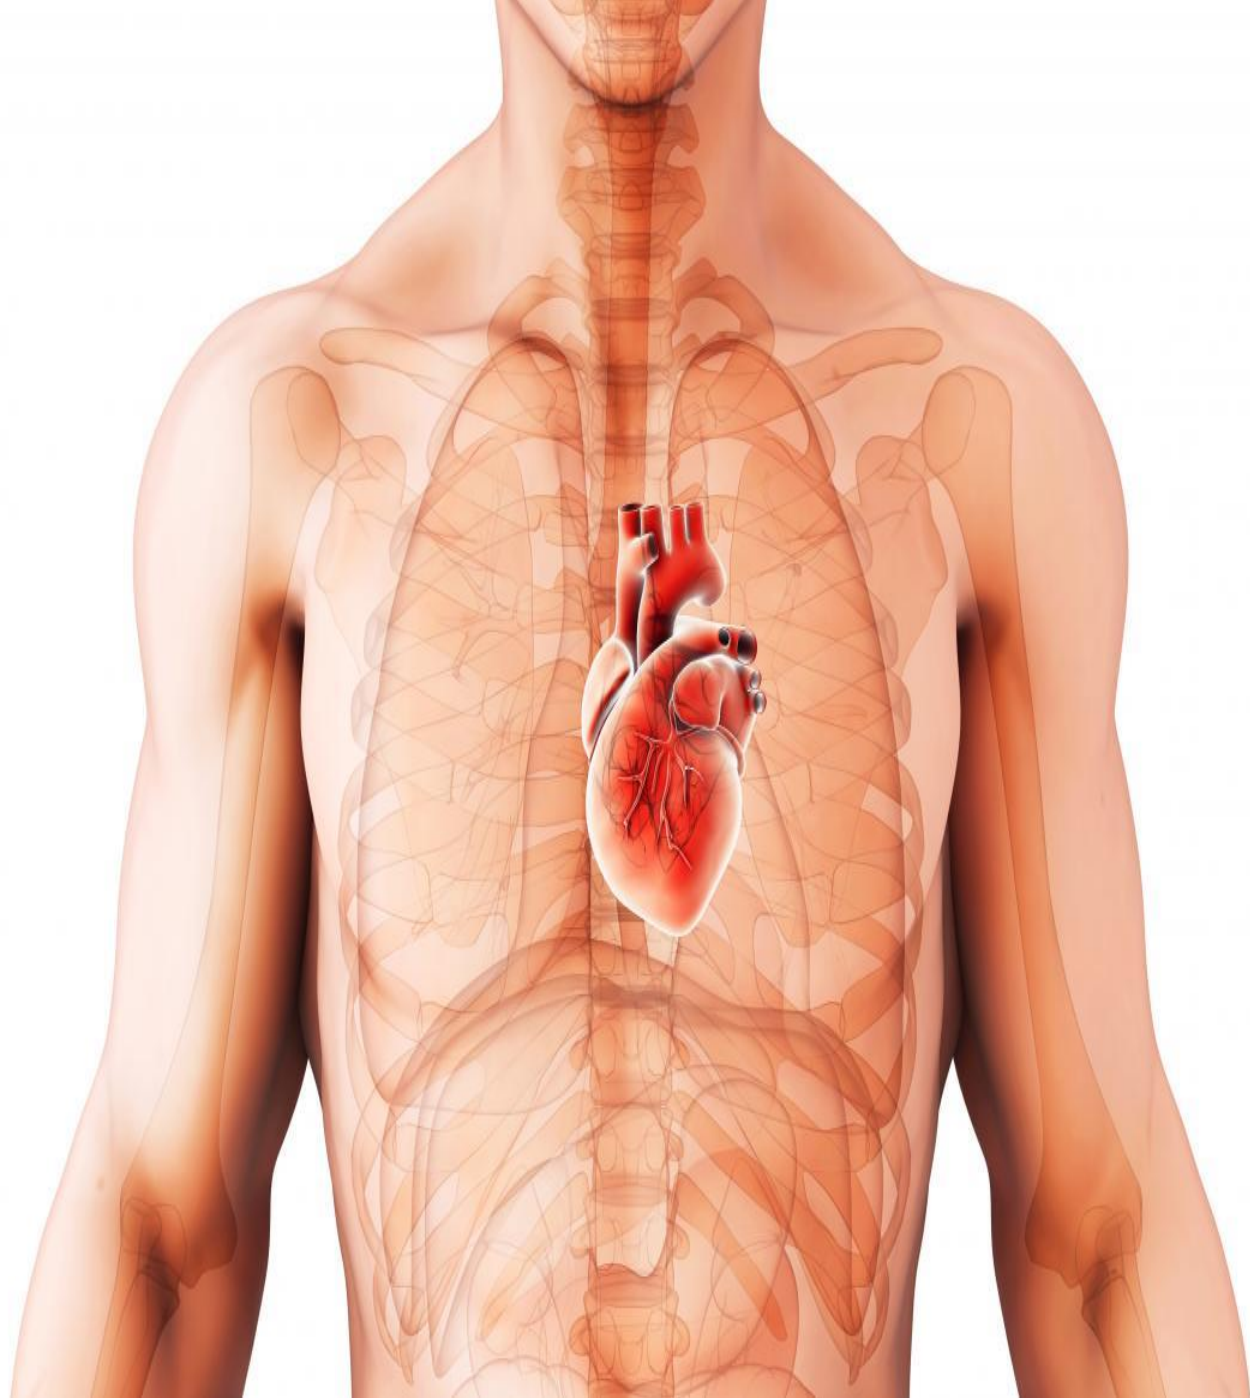

The heart is inside your chest,

slightly to the **left**.

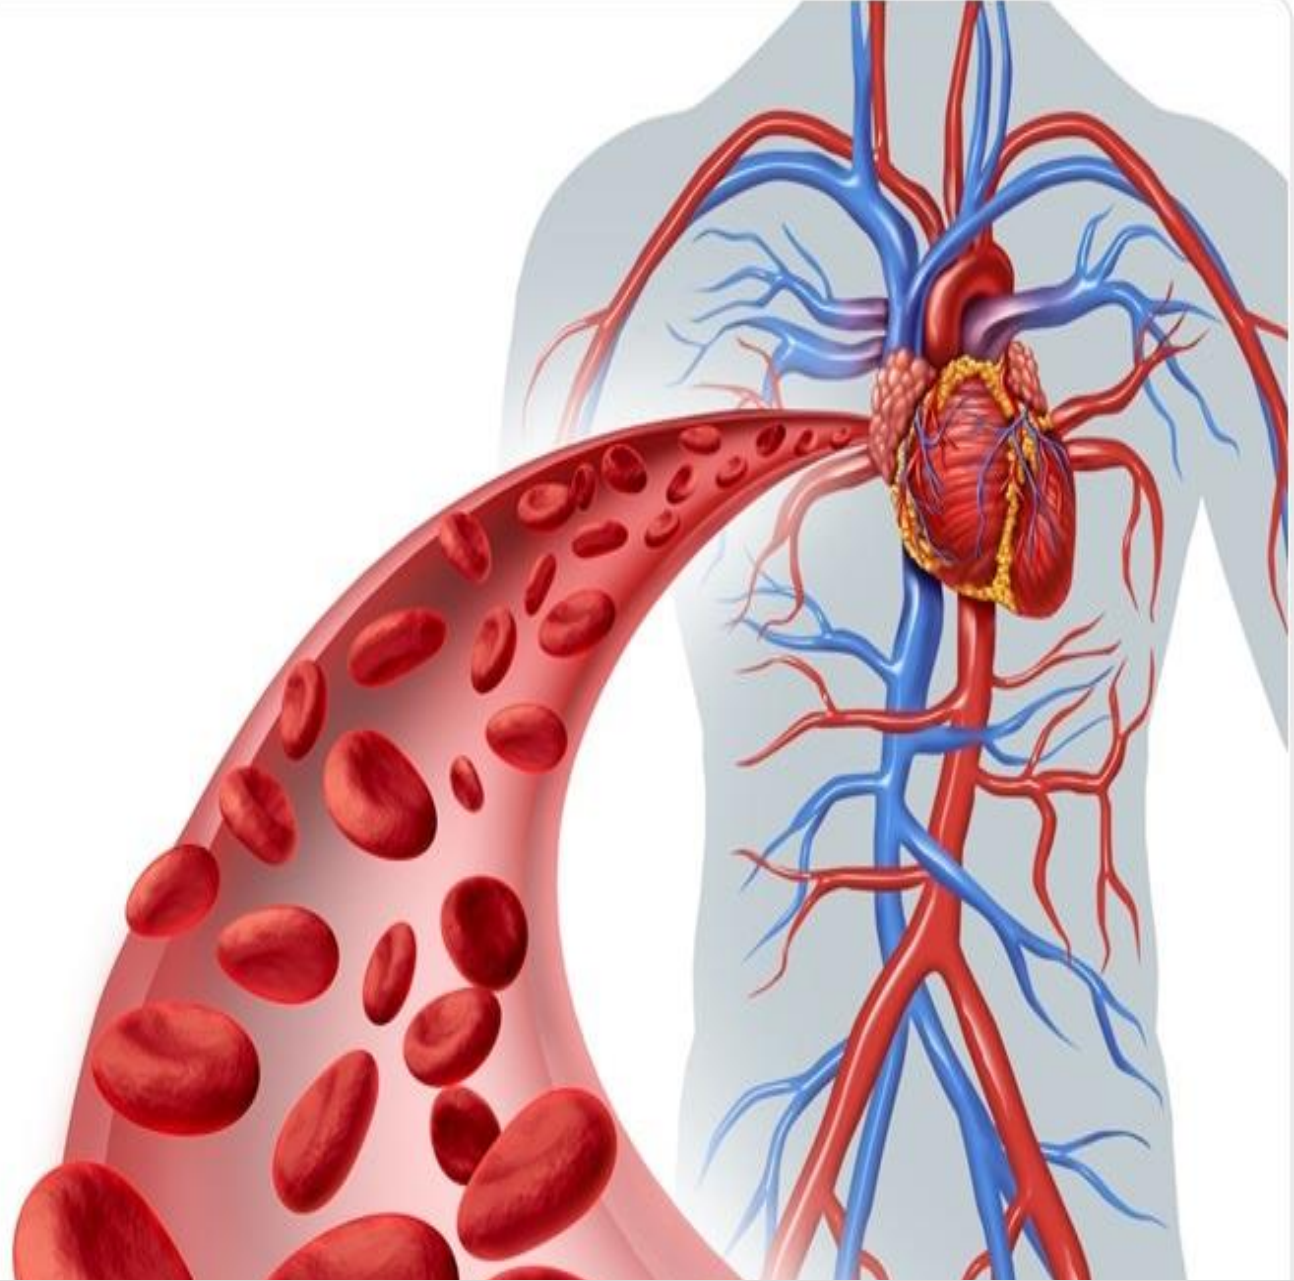

It's protected by **the ribs**.

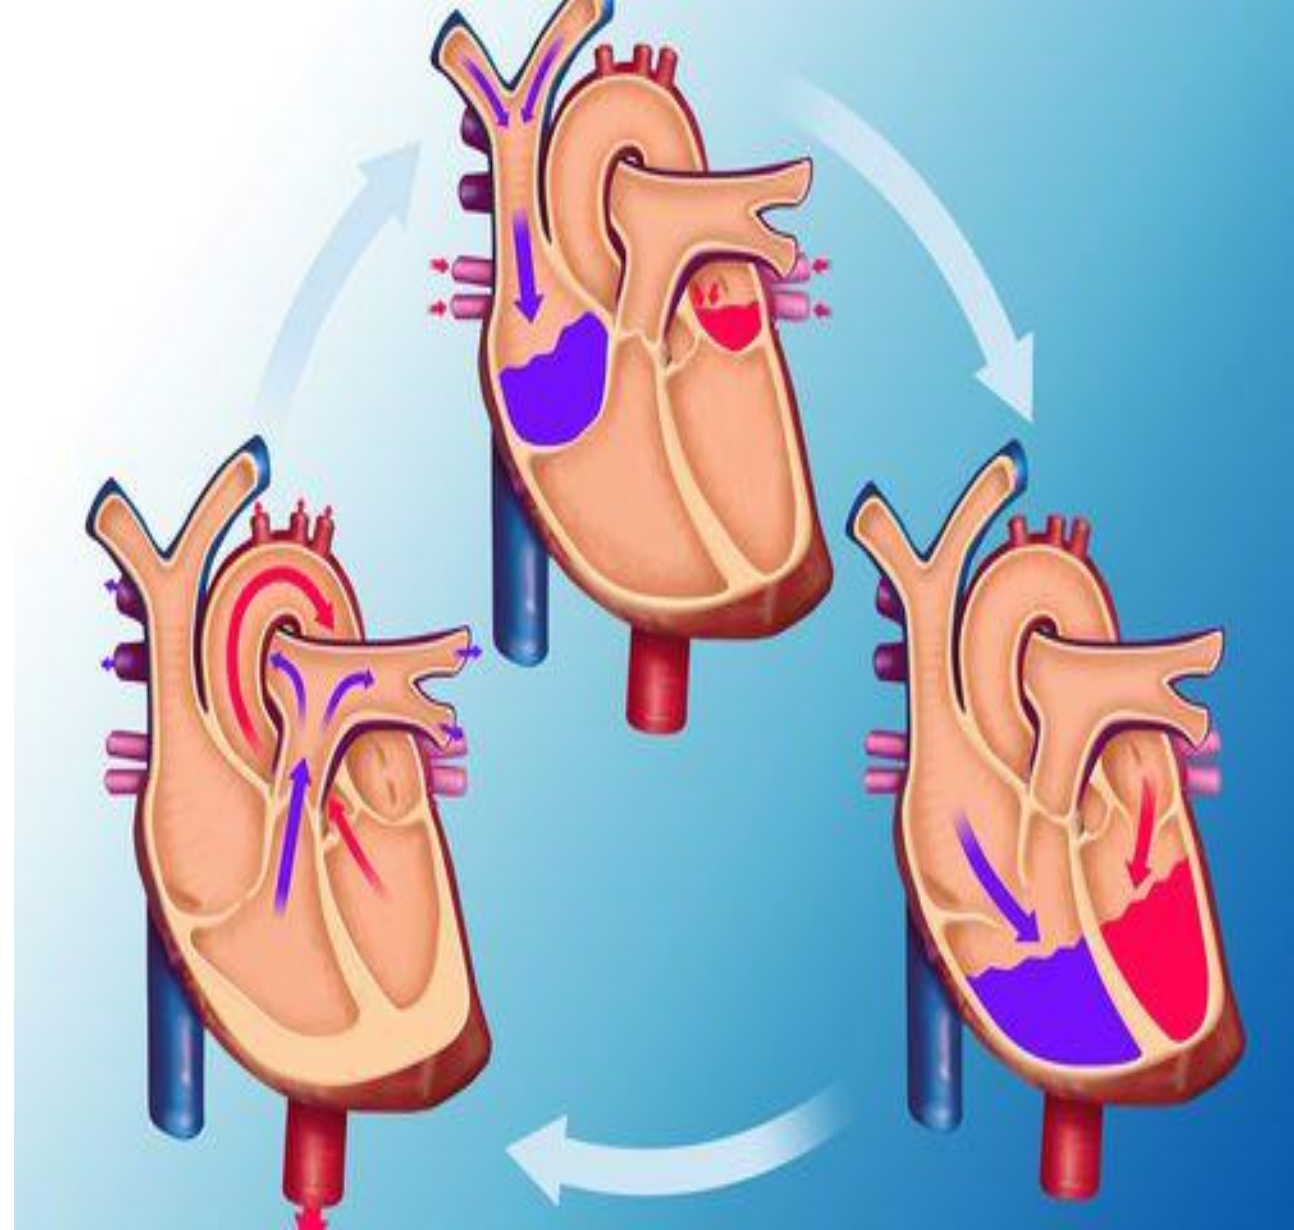

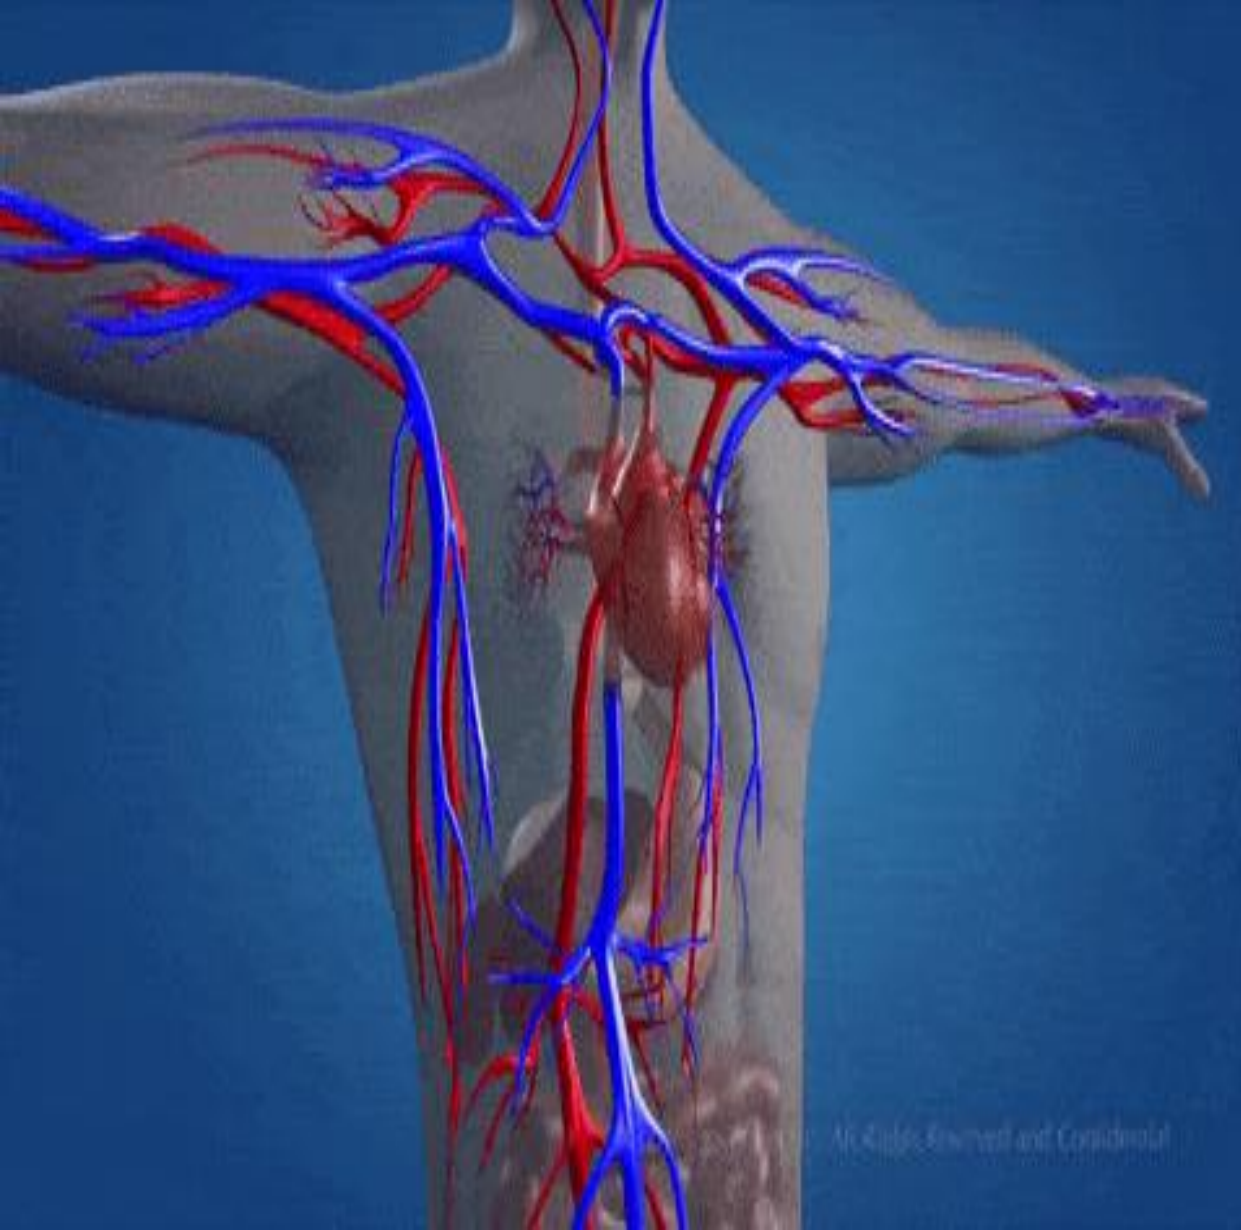

The heart is,
slightly to
It's protected by

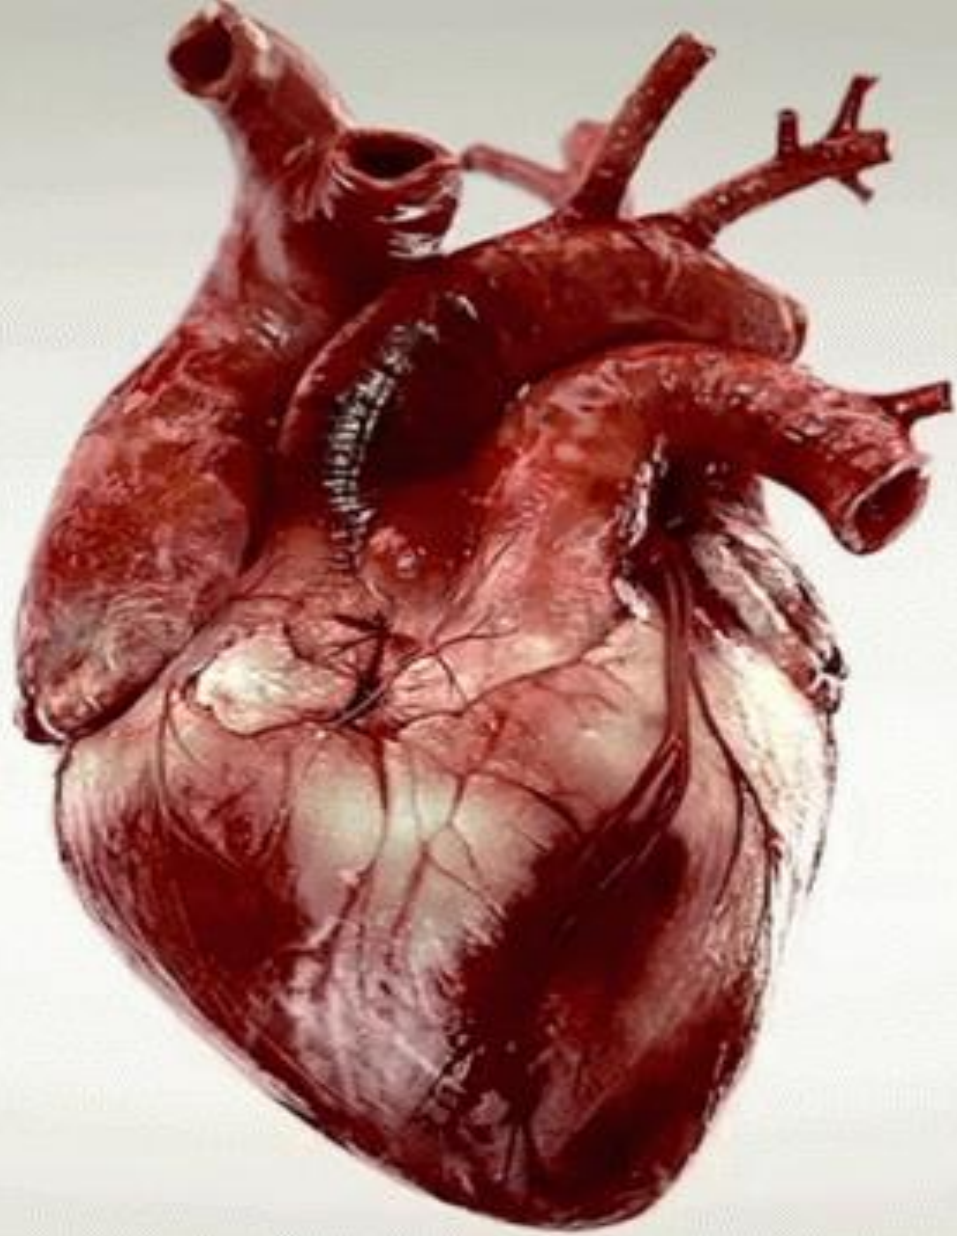

Why does the heart beat?

The heart pumps blood through your body.

This process is called **blood circulation**.

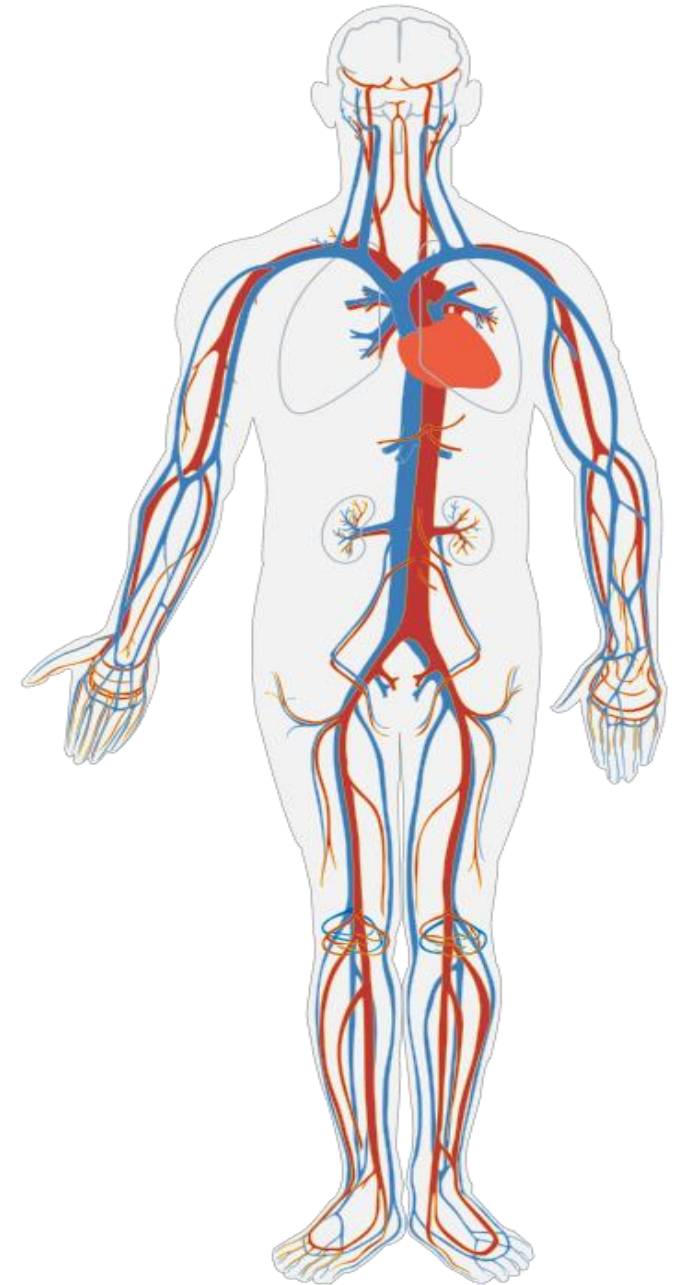

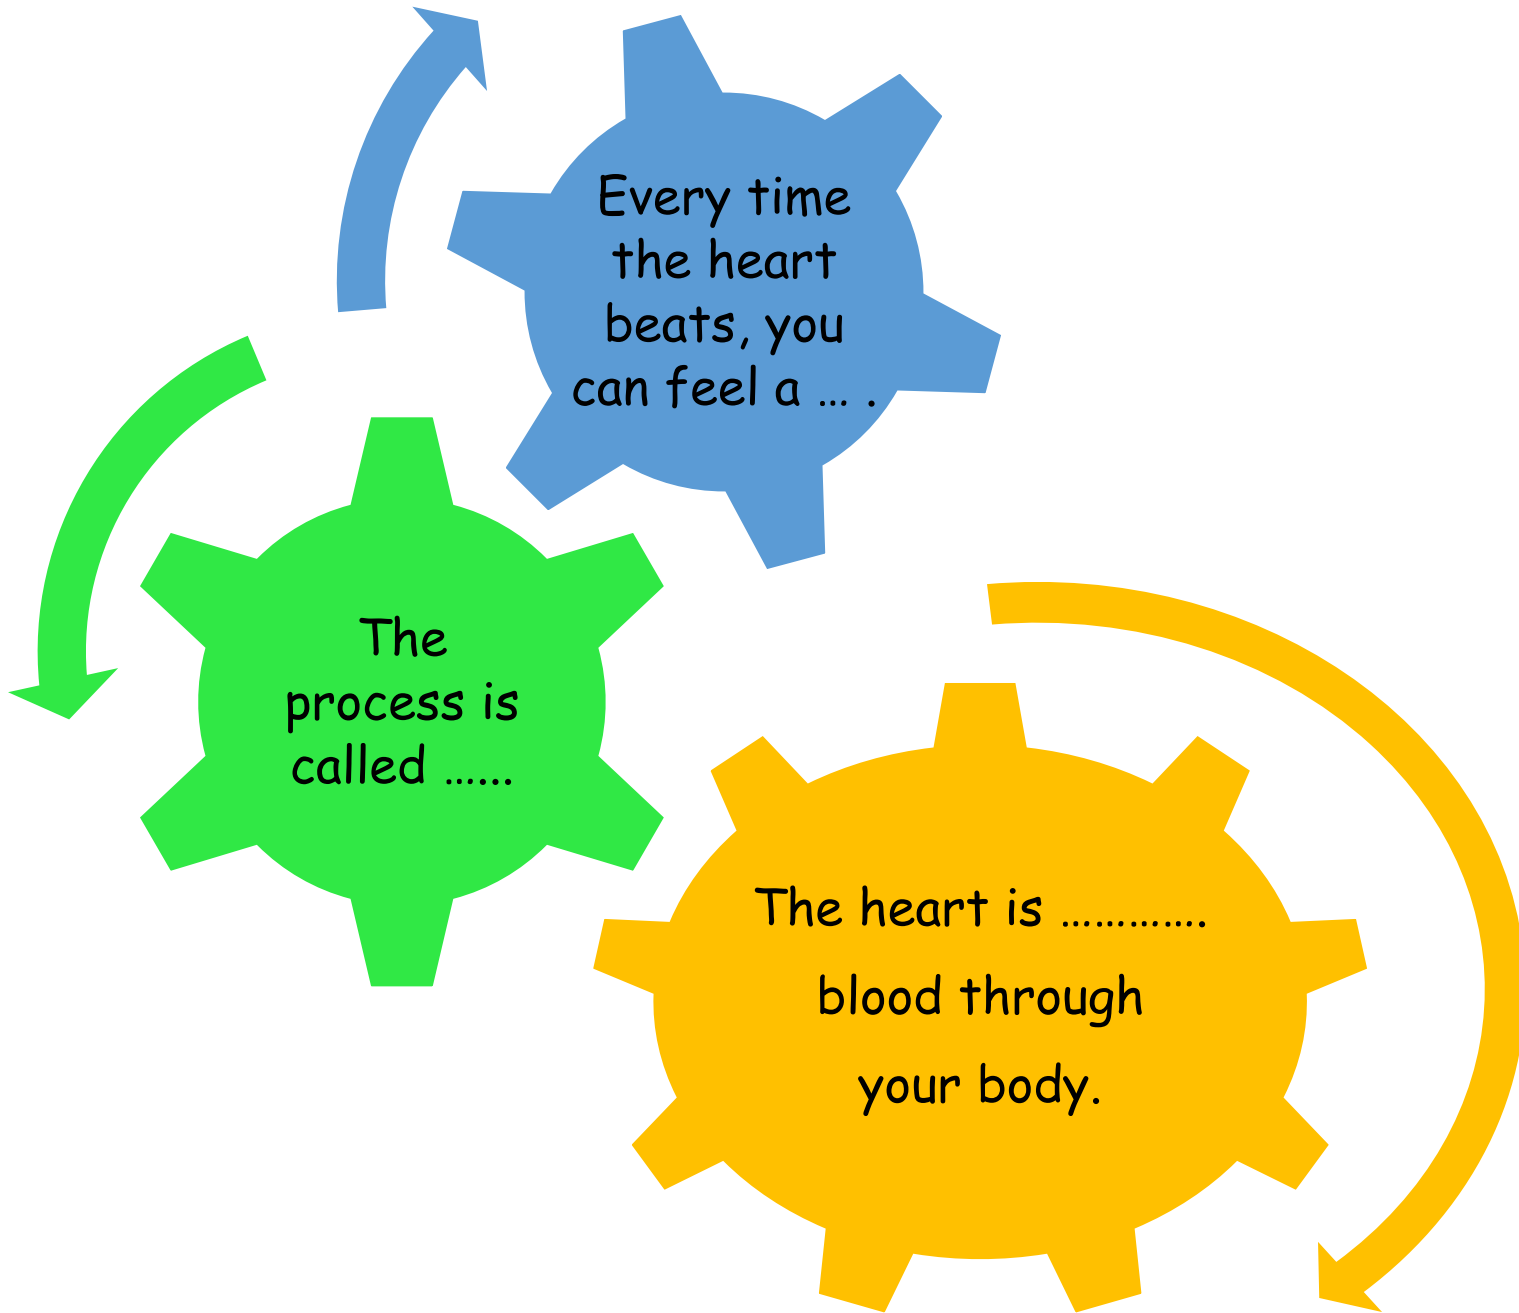

Every time the heart

pumps blood,

you can feel

a **heartbeat**.

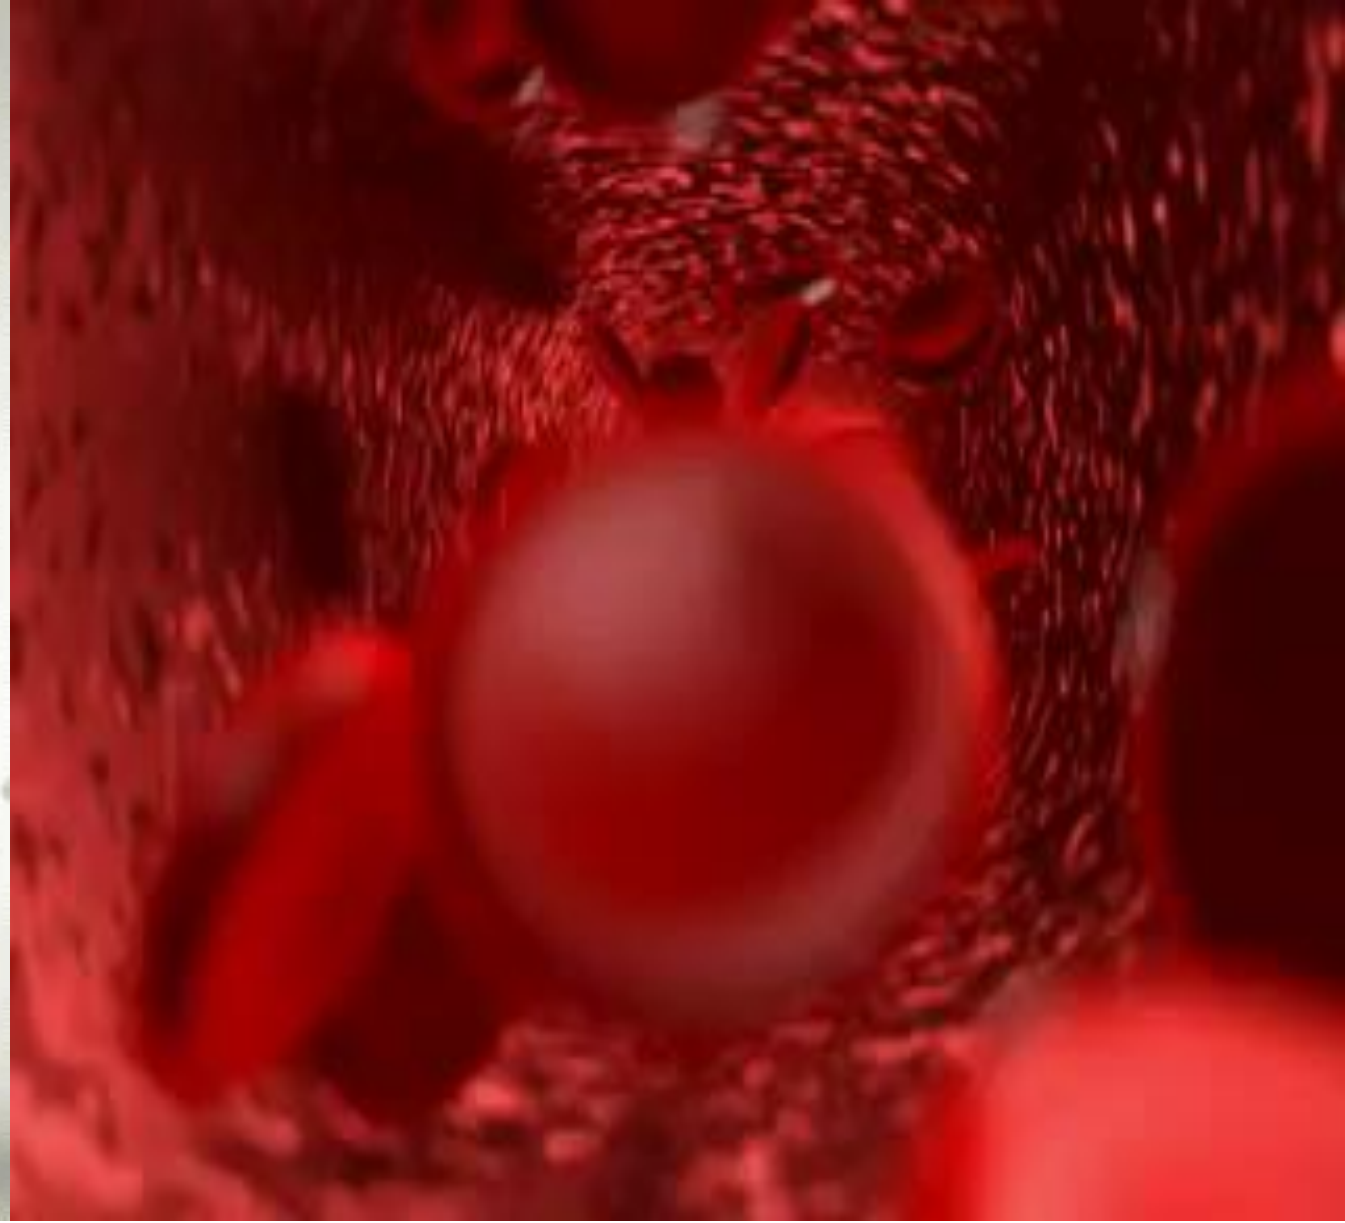

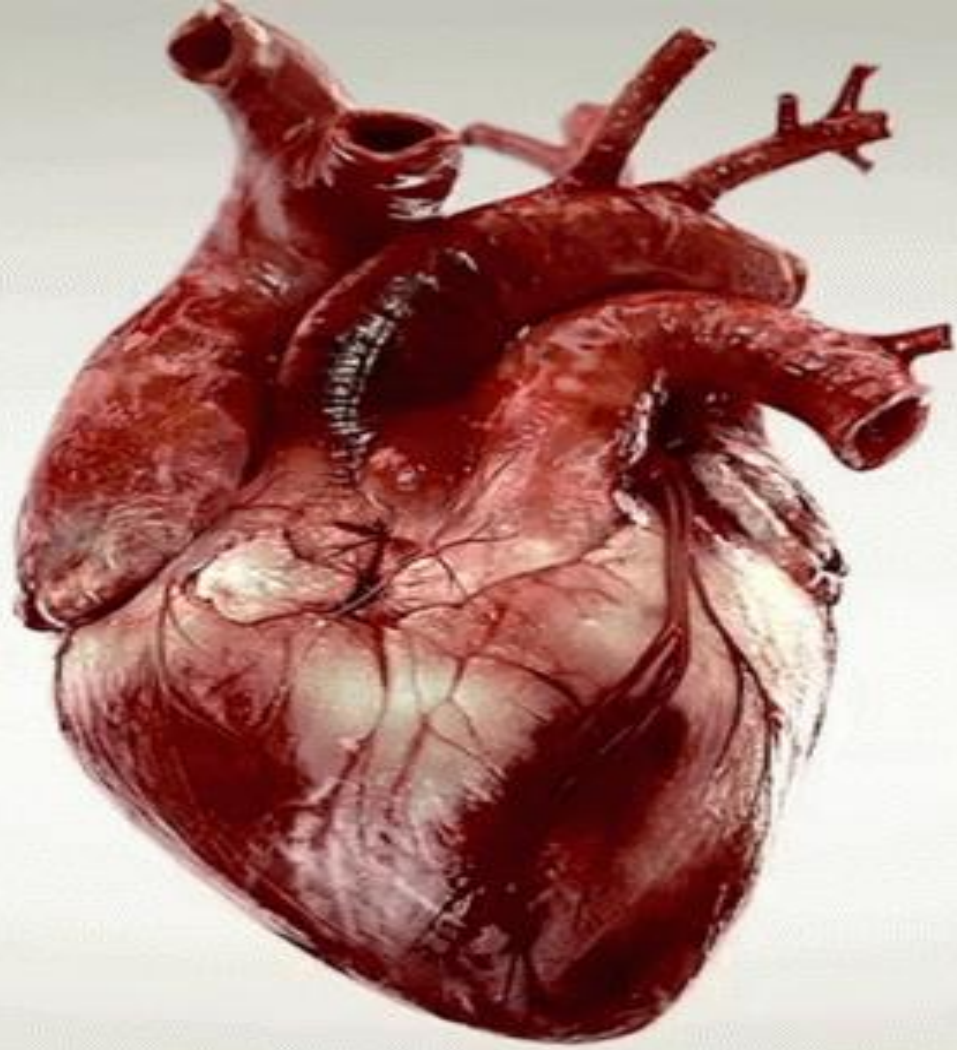

a less than 5 minutes

b less than 1 minute

c less than 3 minutes

How long do you think it takes the heart to pump body to all parts?

The heart pumps blood to all parts in less than a minute.

Fill in the
gaps.

The heart is(1)

slightly to (2).

It's protected by (3)

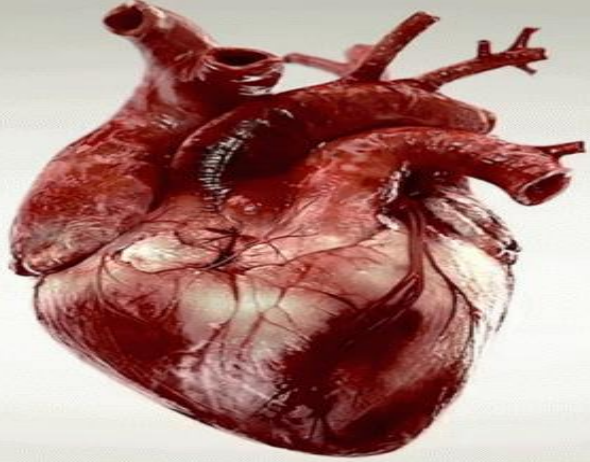

It's the size of your (4)

The heart pumps blood(5)

This process is called (6)

The heart pumps blood to all
parts..... (7)

1. the ribs
2. in less than a minute.
3. through your body
4. blood circulation.
5. the left
6. inside your chest
7. fist

The heart is inside your chest slightly to the left.
It's protected by the ribs.
It's the size of your fist.
The heart pumps blood through the body.
This process is called blood circulation.
The heart pumps blood to all parts in less than 1 minute.
