time

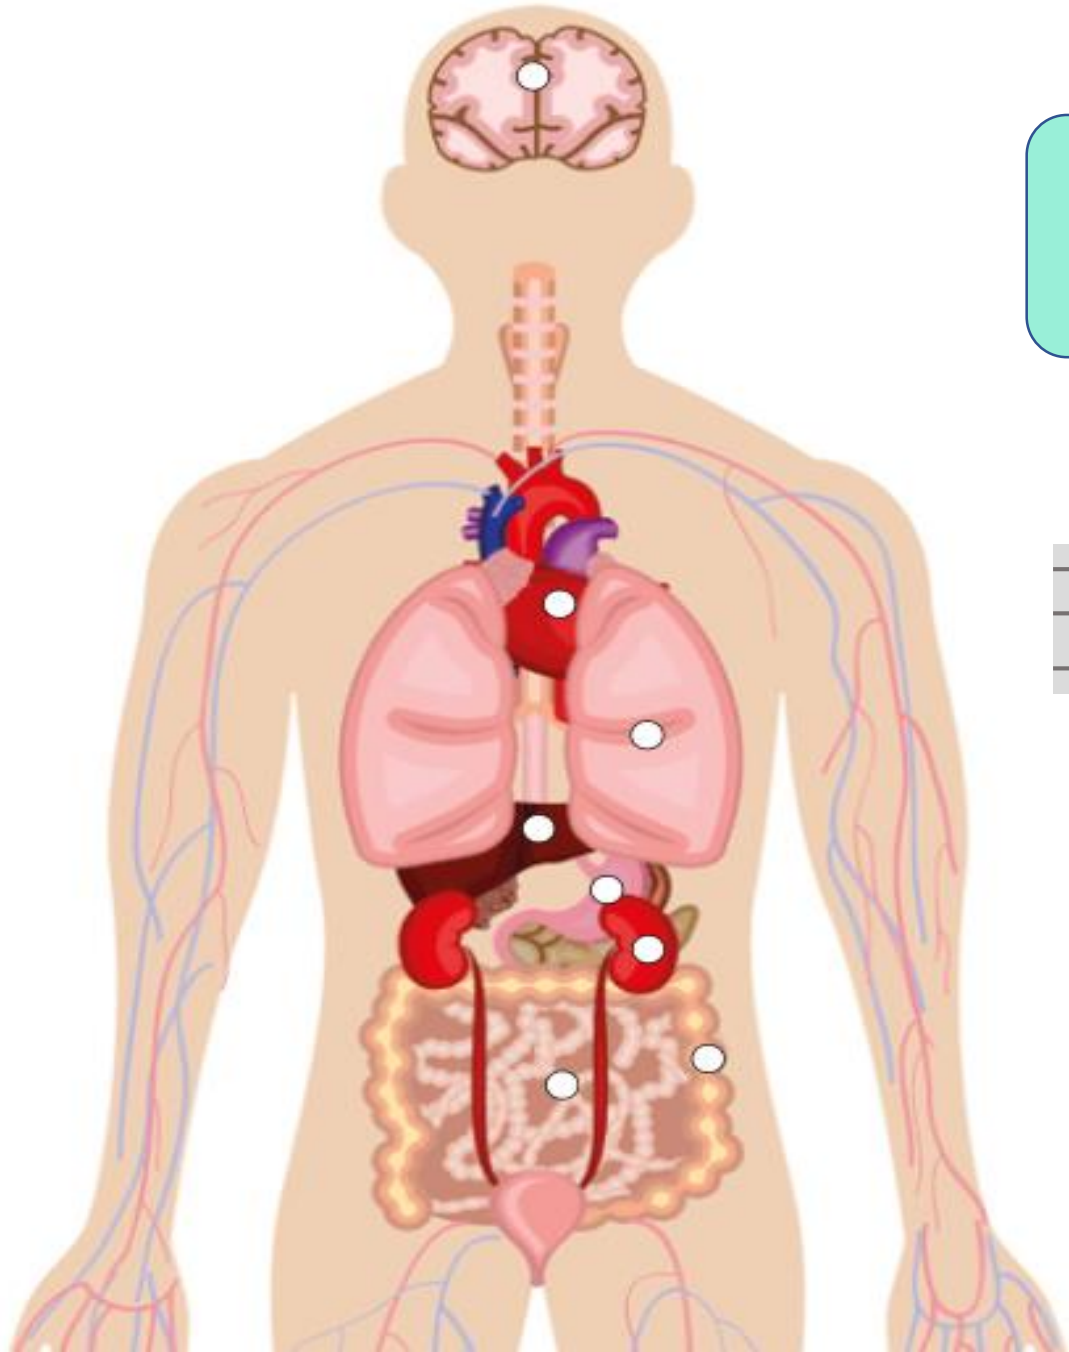

The parts
inside
your body
are called

....

organs

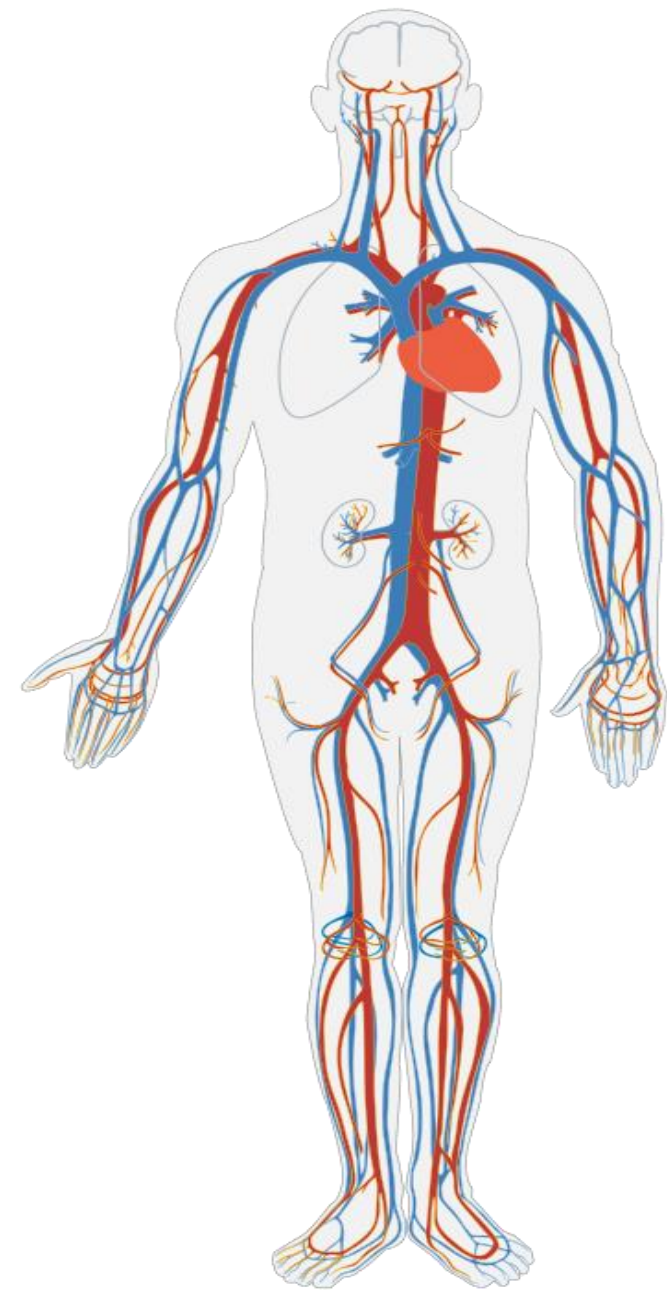

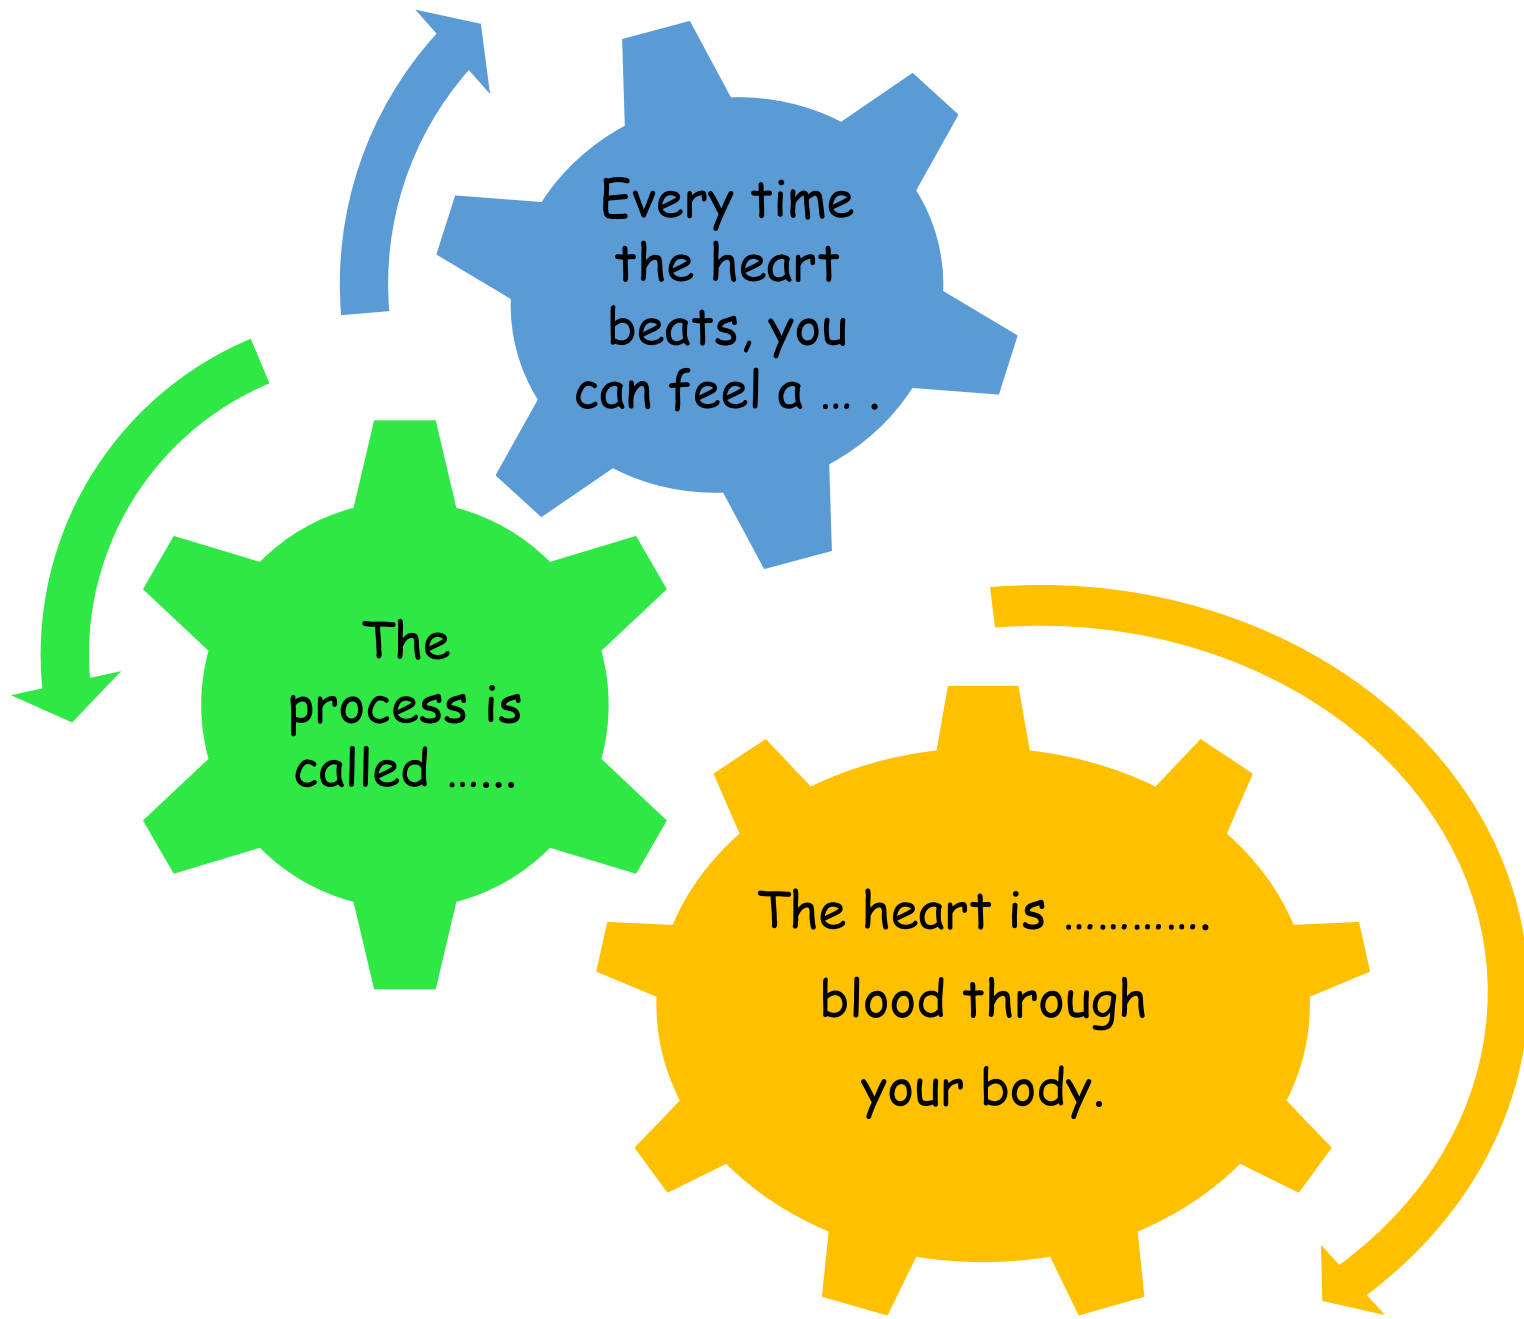

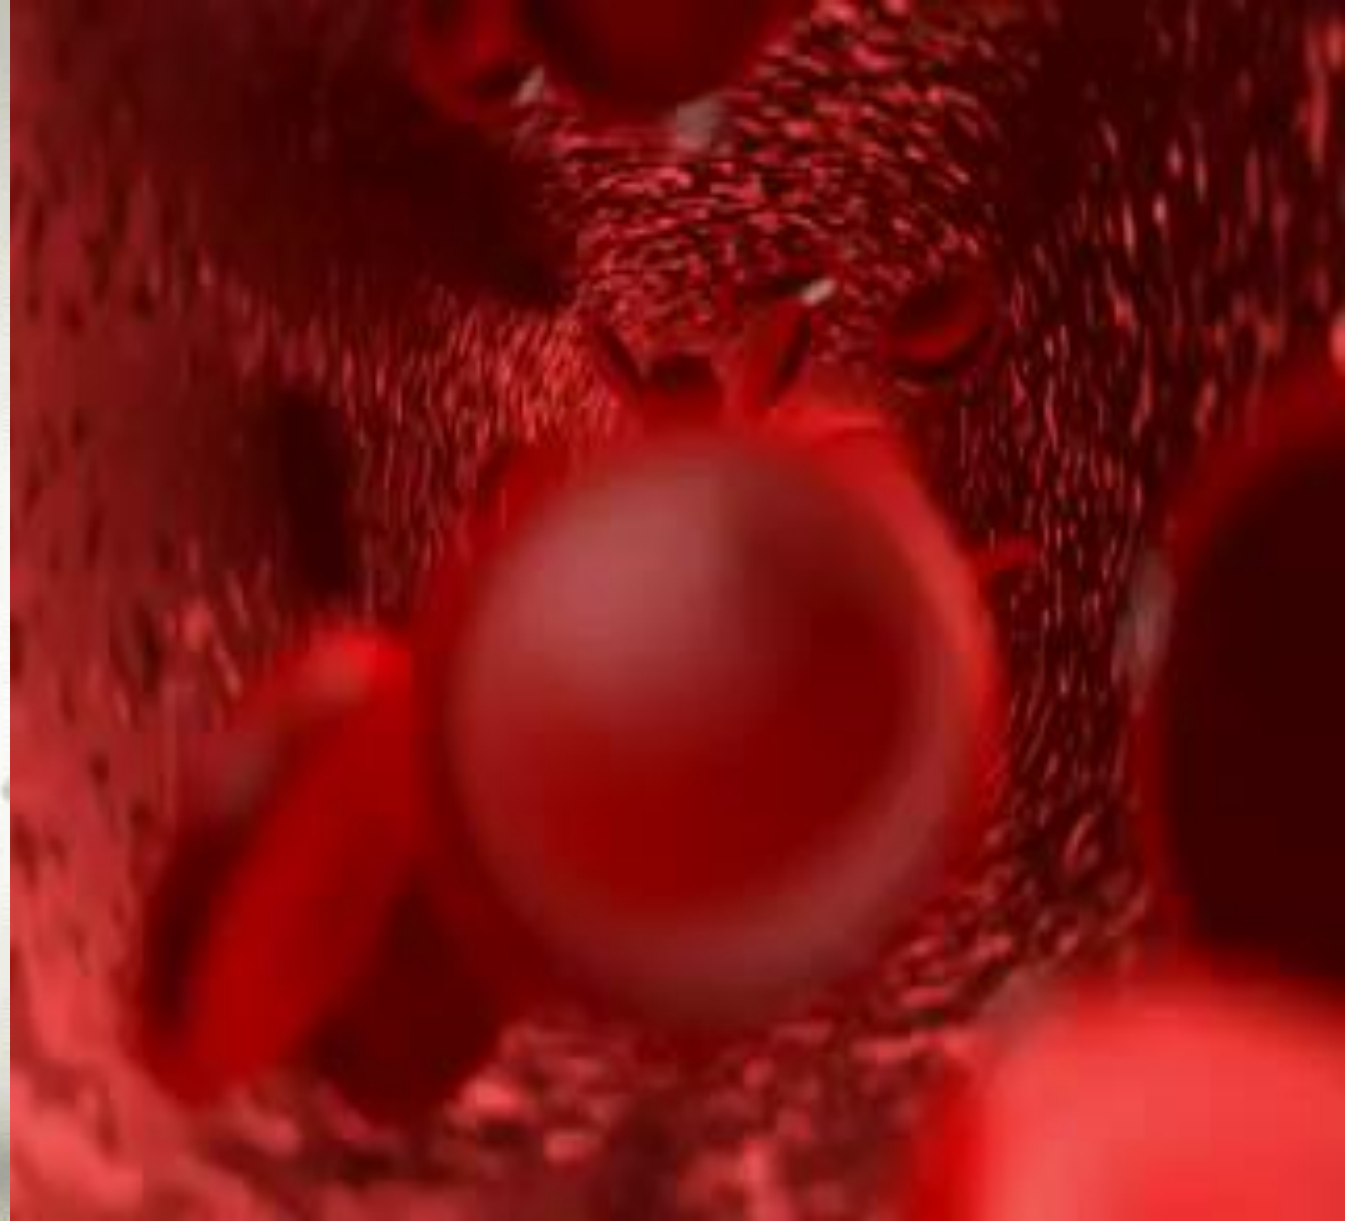

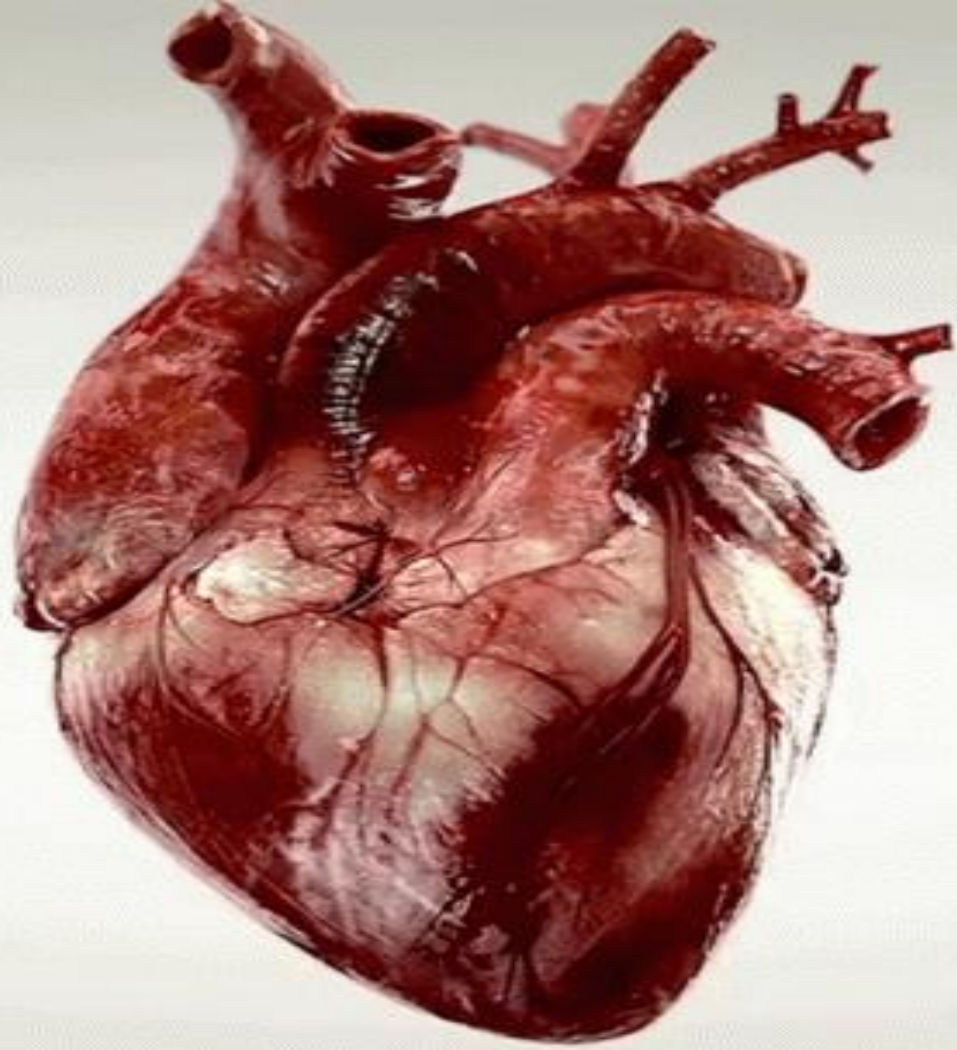

Body organs keep you
..... and

The major body organs are...

The heart is,
slightly to
It's protected by

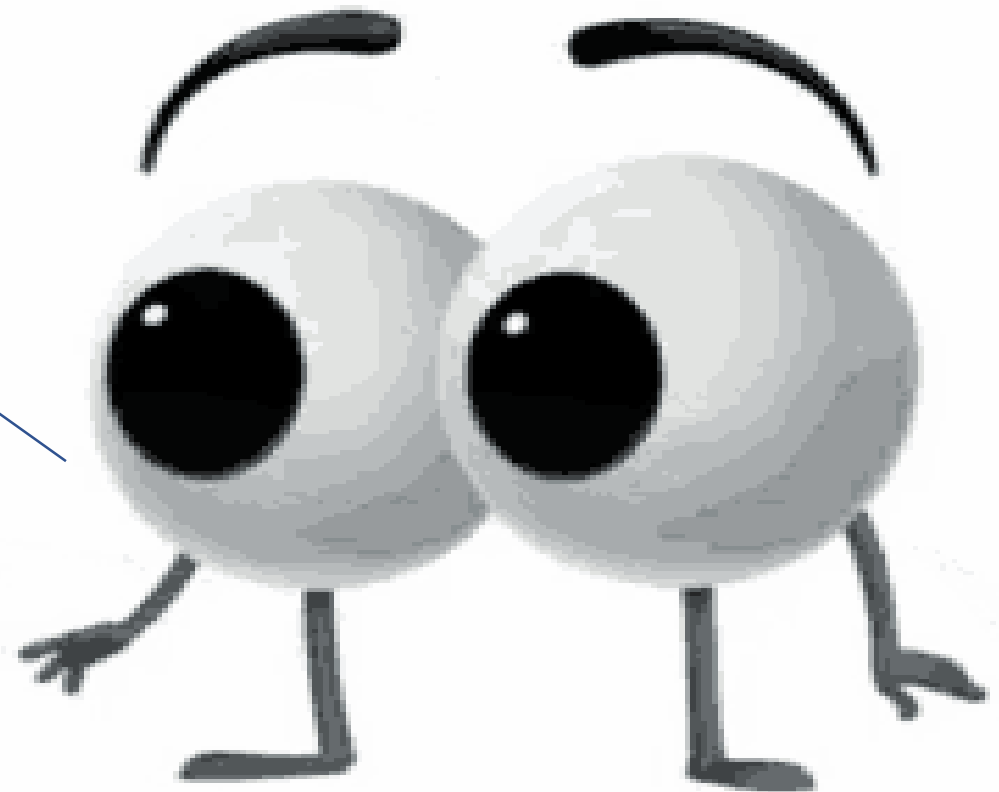

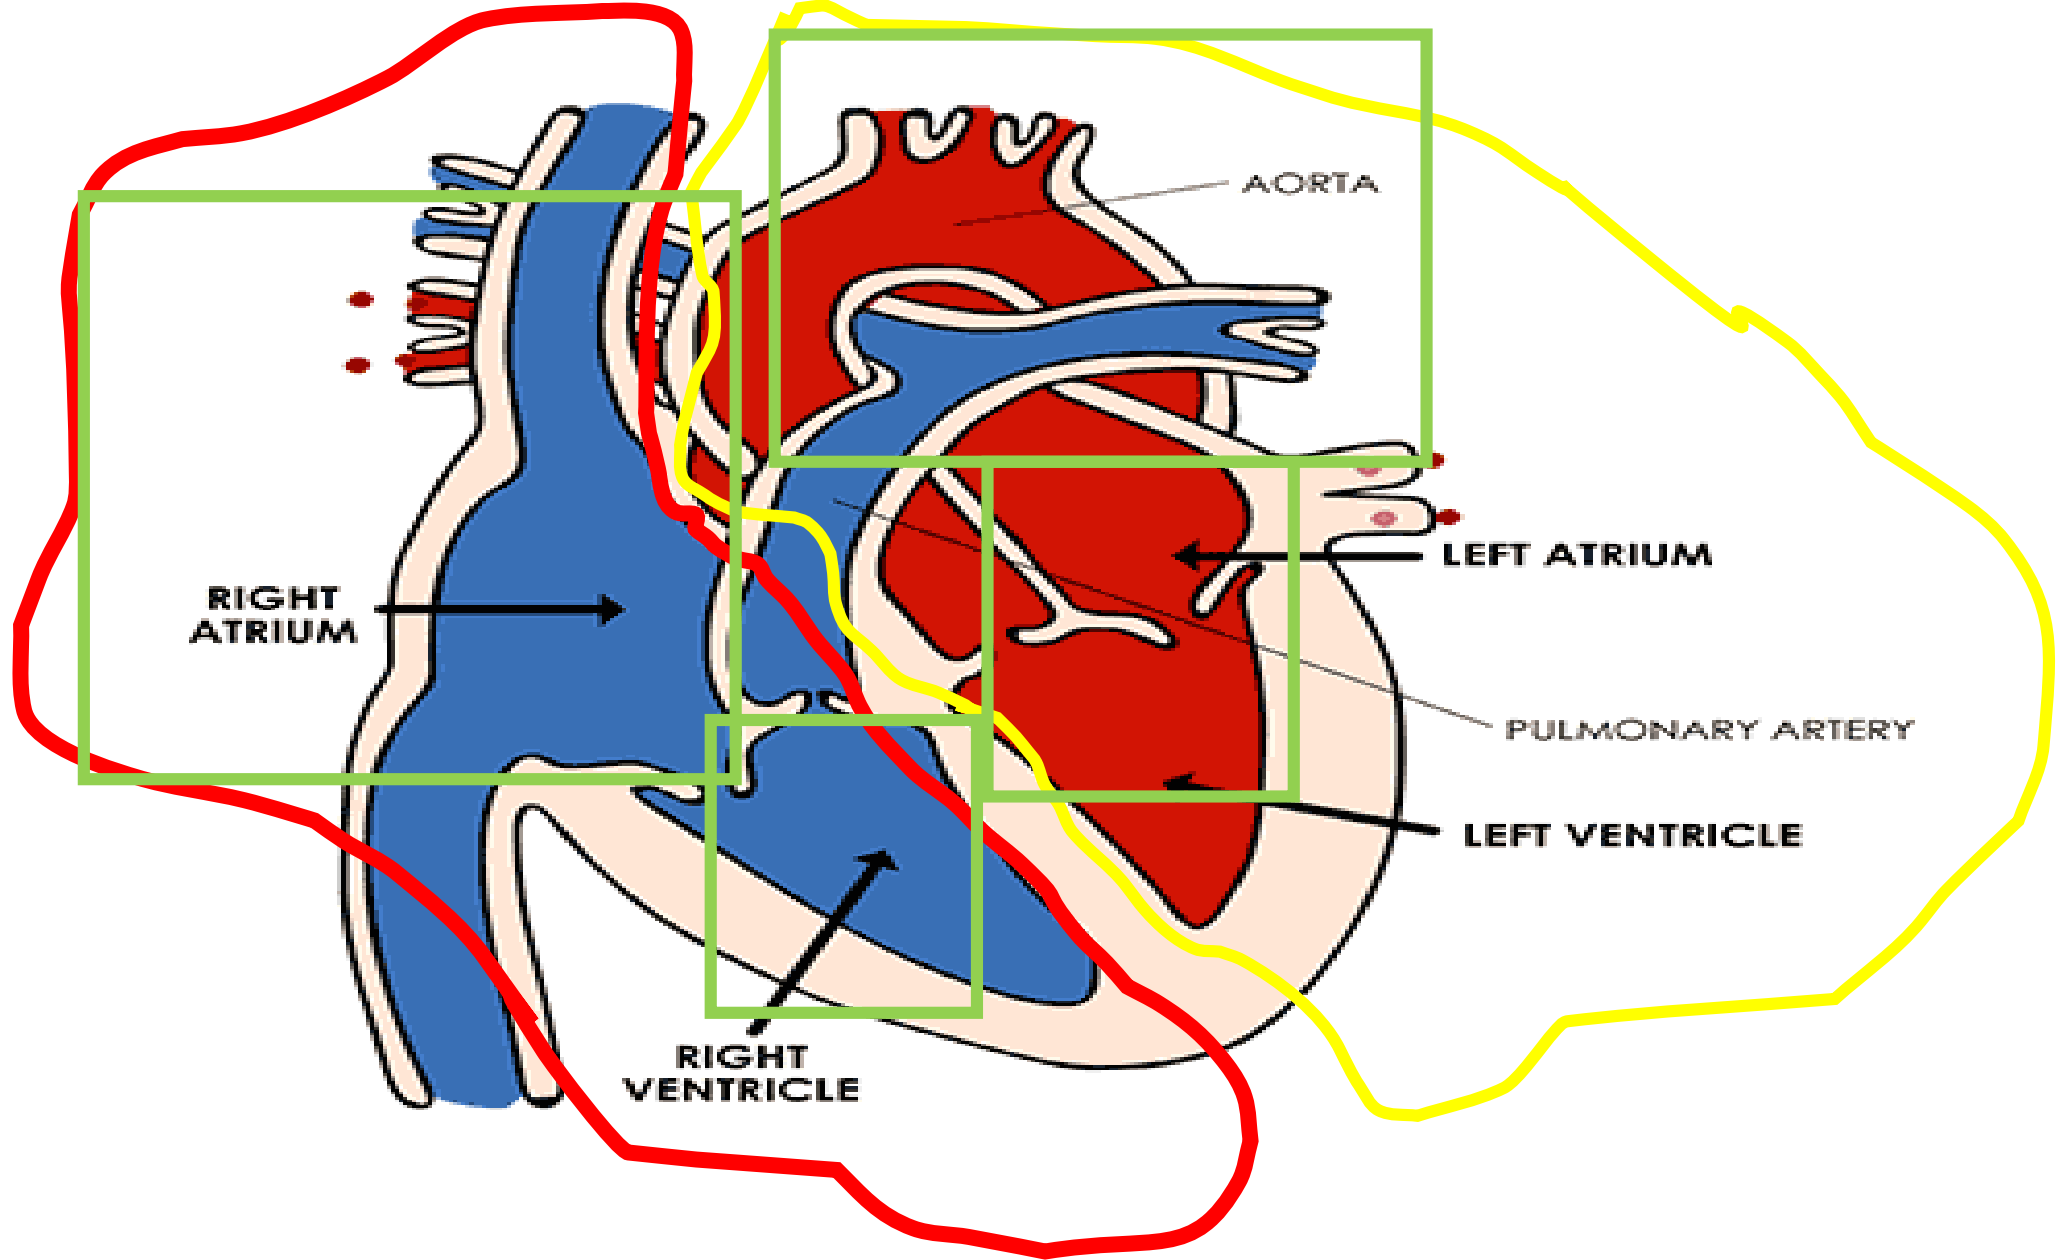

The heart pumps blood to all parts in minute.

Let's take a close look at the heart.

How many sides and chambers does the heart have?

The heart has 2 sides and 4 chambers.

Watch a video and answer
the questions below:

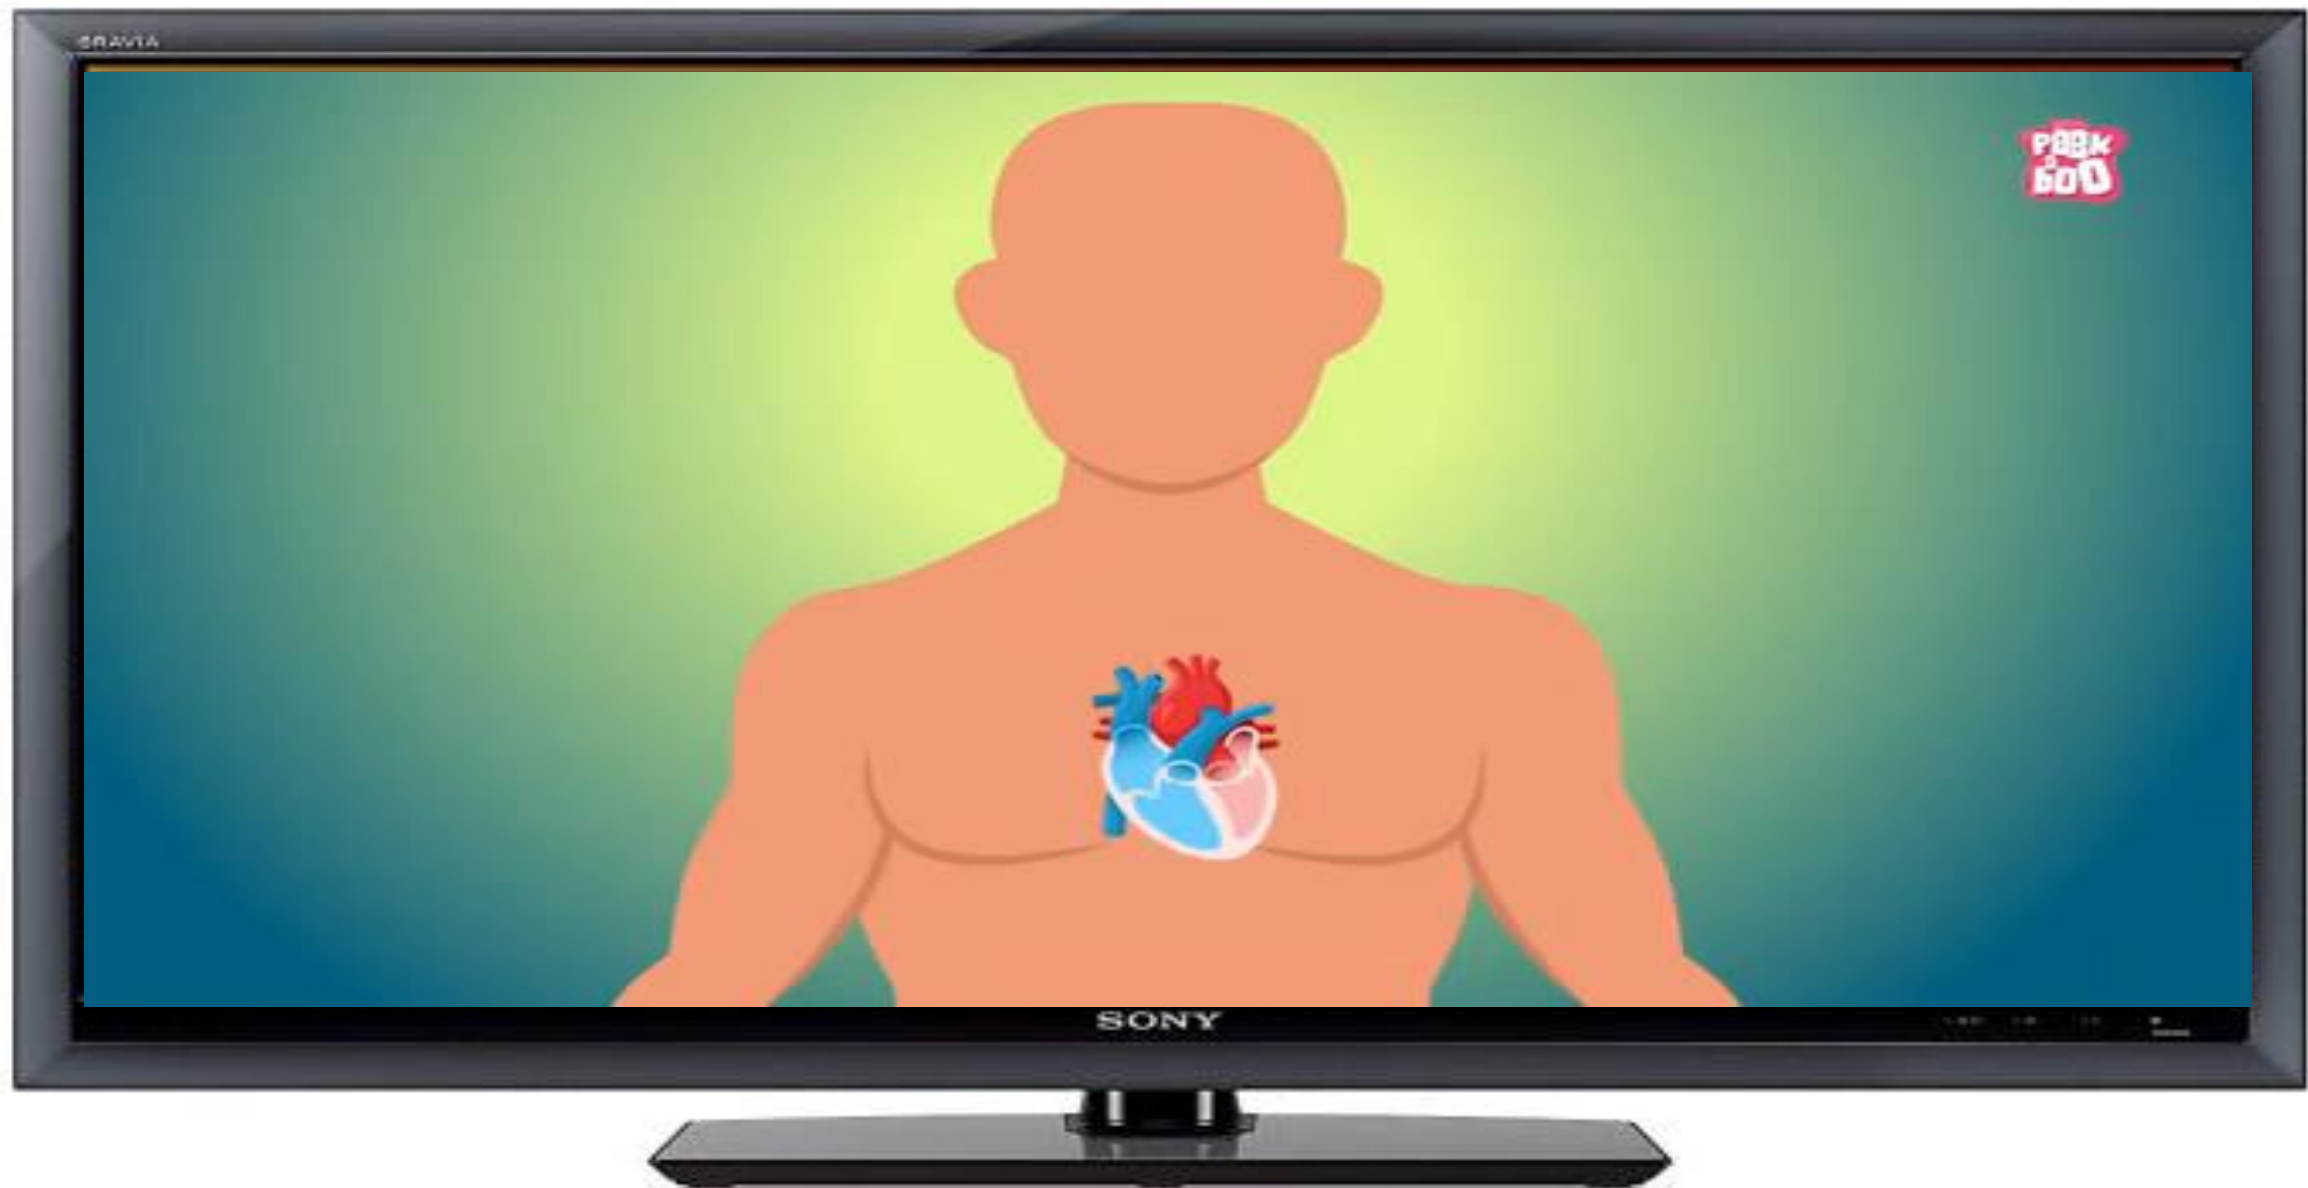

What are the upper
chambers called?

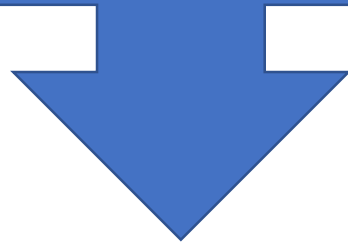

Which one is the
contains oxygen:
blue or red part?

What are the bottom
chambers called?

Which one is
without oxygen:
blue or red part?

Watch a video and answer
the questions below:

What are the upper
chambers called?

right and left
Atriums

What are the bottom
chambers called?

right and left
Ventricles

Which one contains
oxygen:
blue or red blood?

red

Which one is
without oxygen:
blue or red
blood?

blue

The right side pumps blood with without oxygen.

right Atrium

1

left Atrium

2

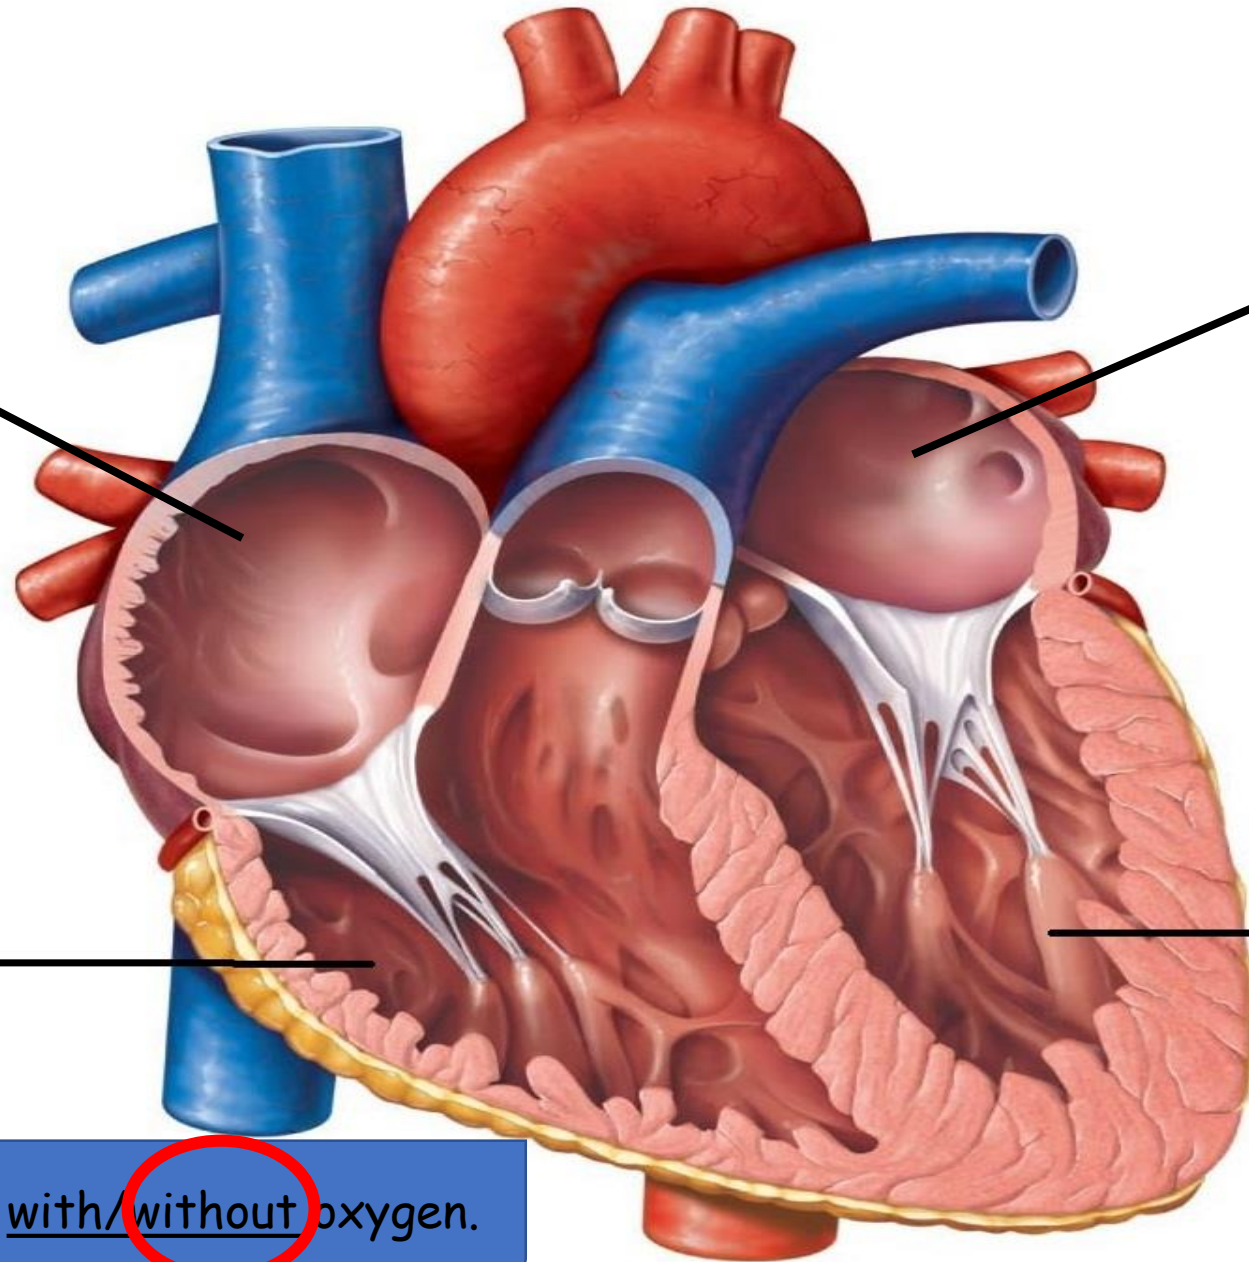

right Ventricle

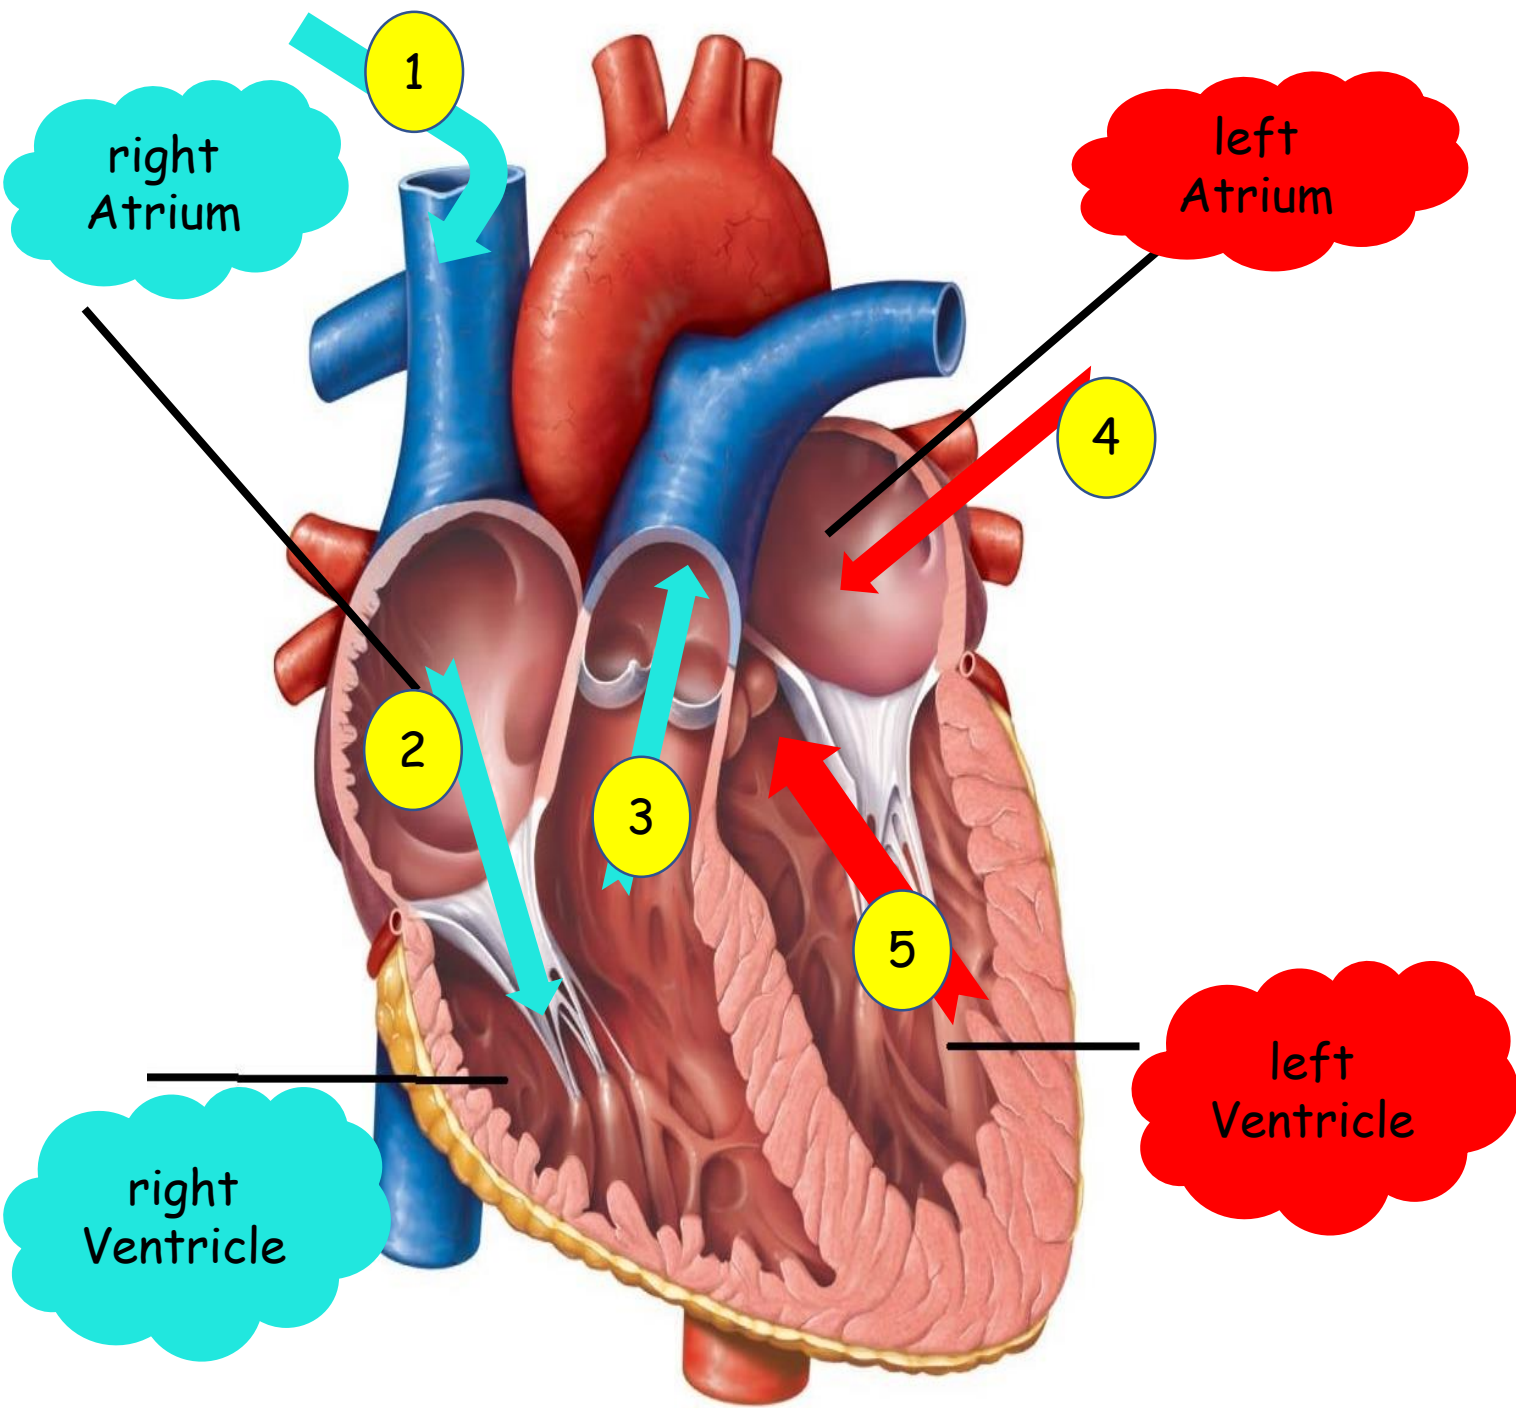

3

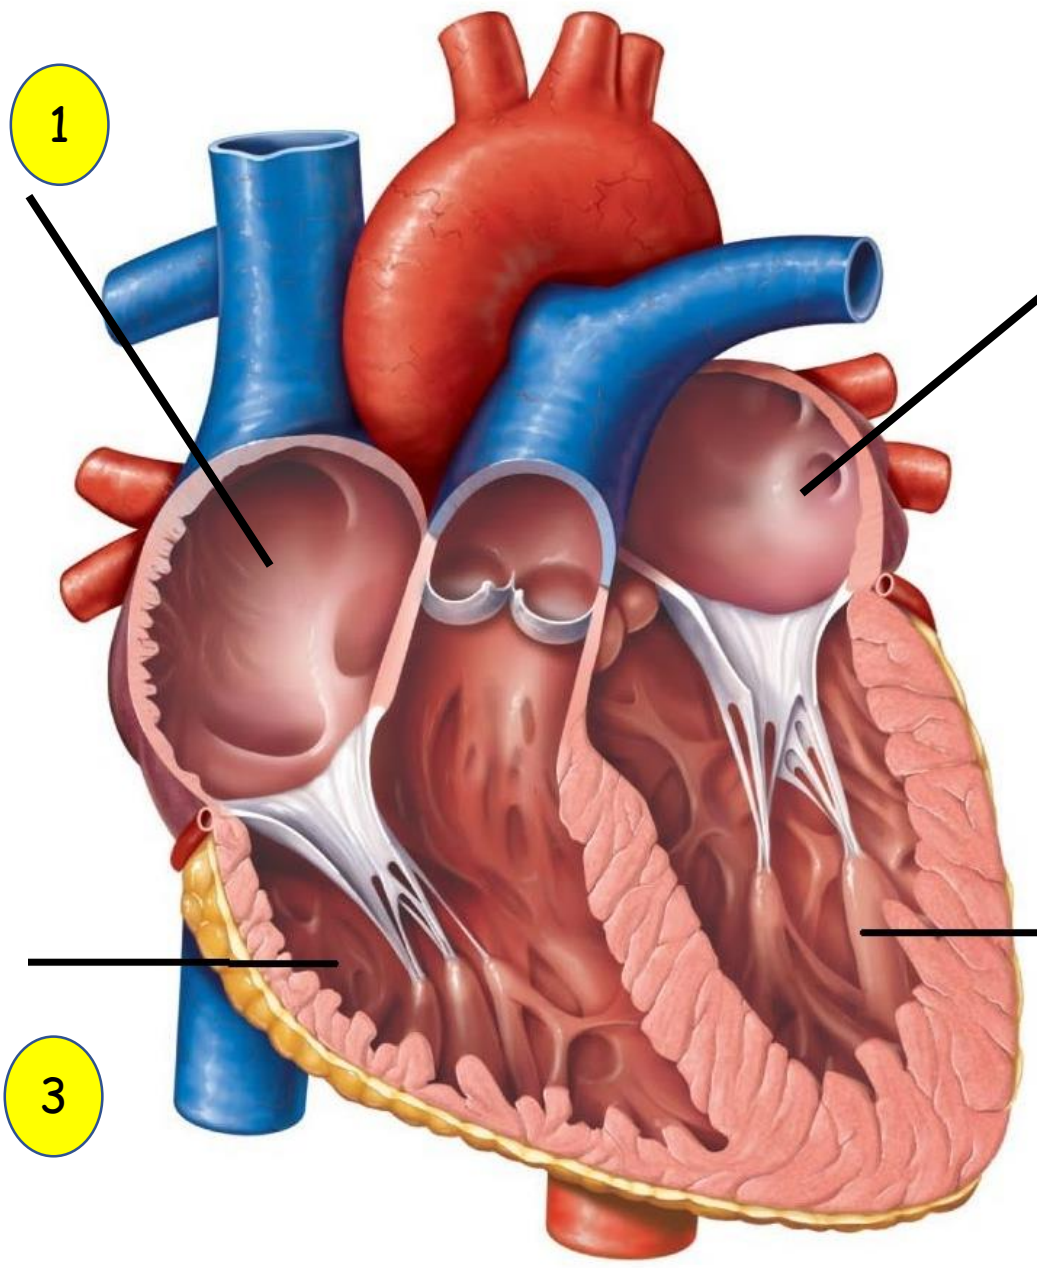

left Ventricle

4

The left side pumps blood with without oxygen.

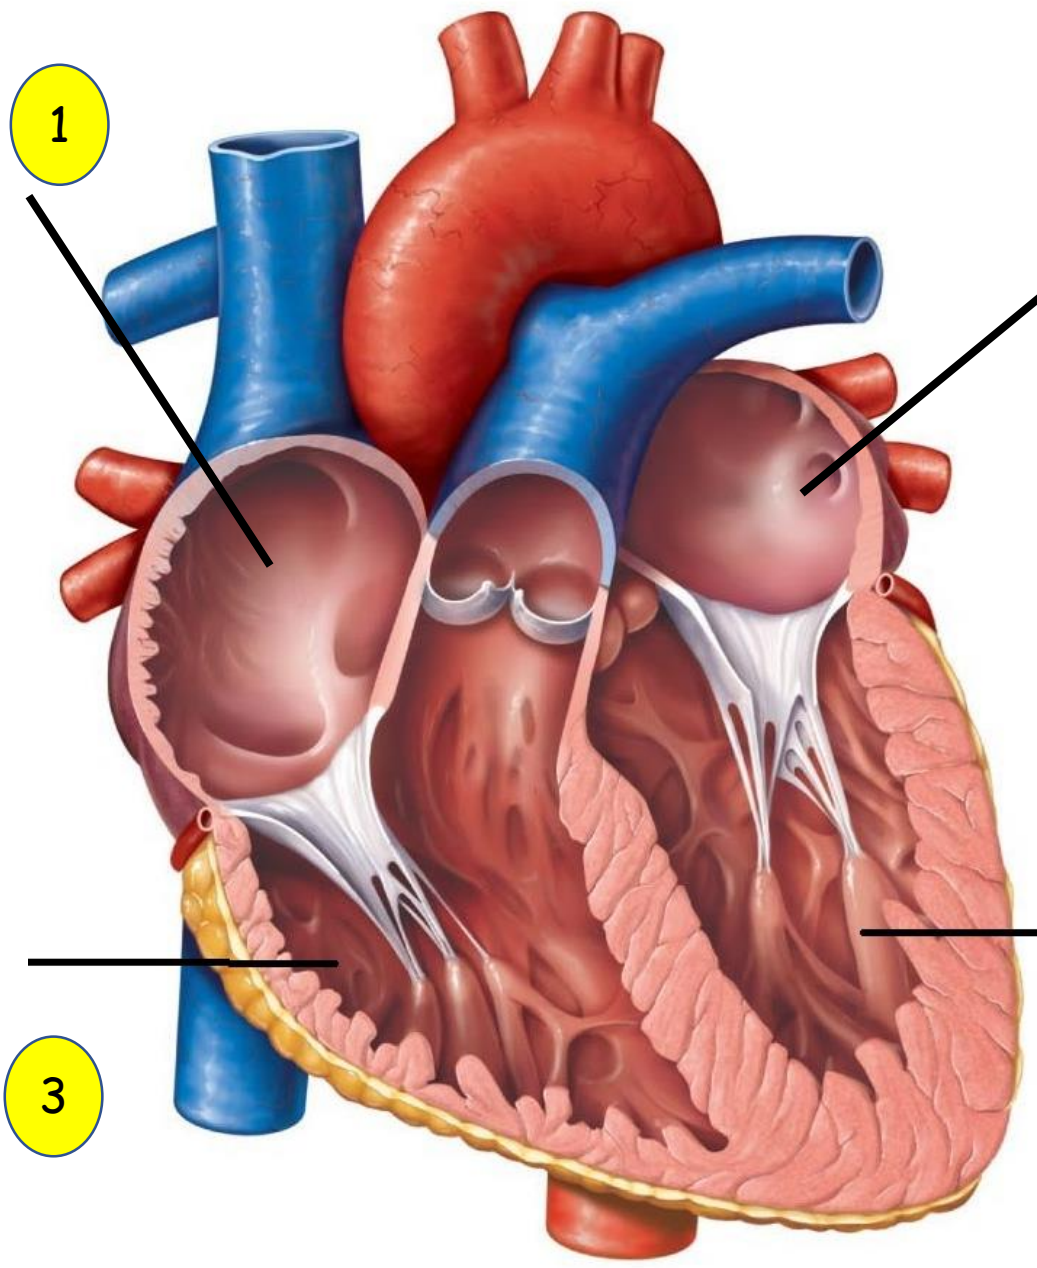

The heart has ... and

Two upper parts are:

Two bottom parts are:

1

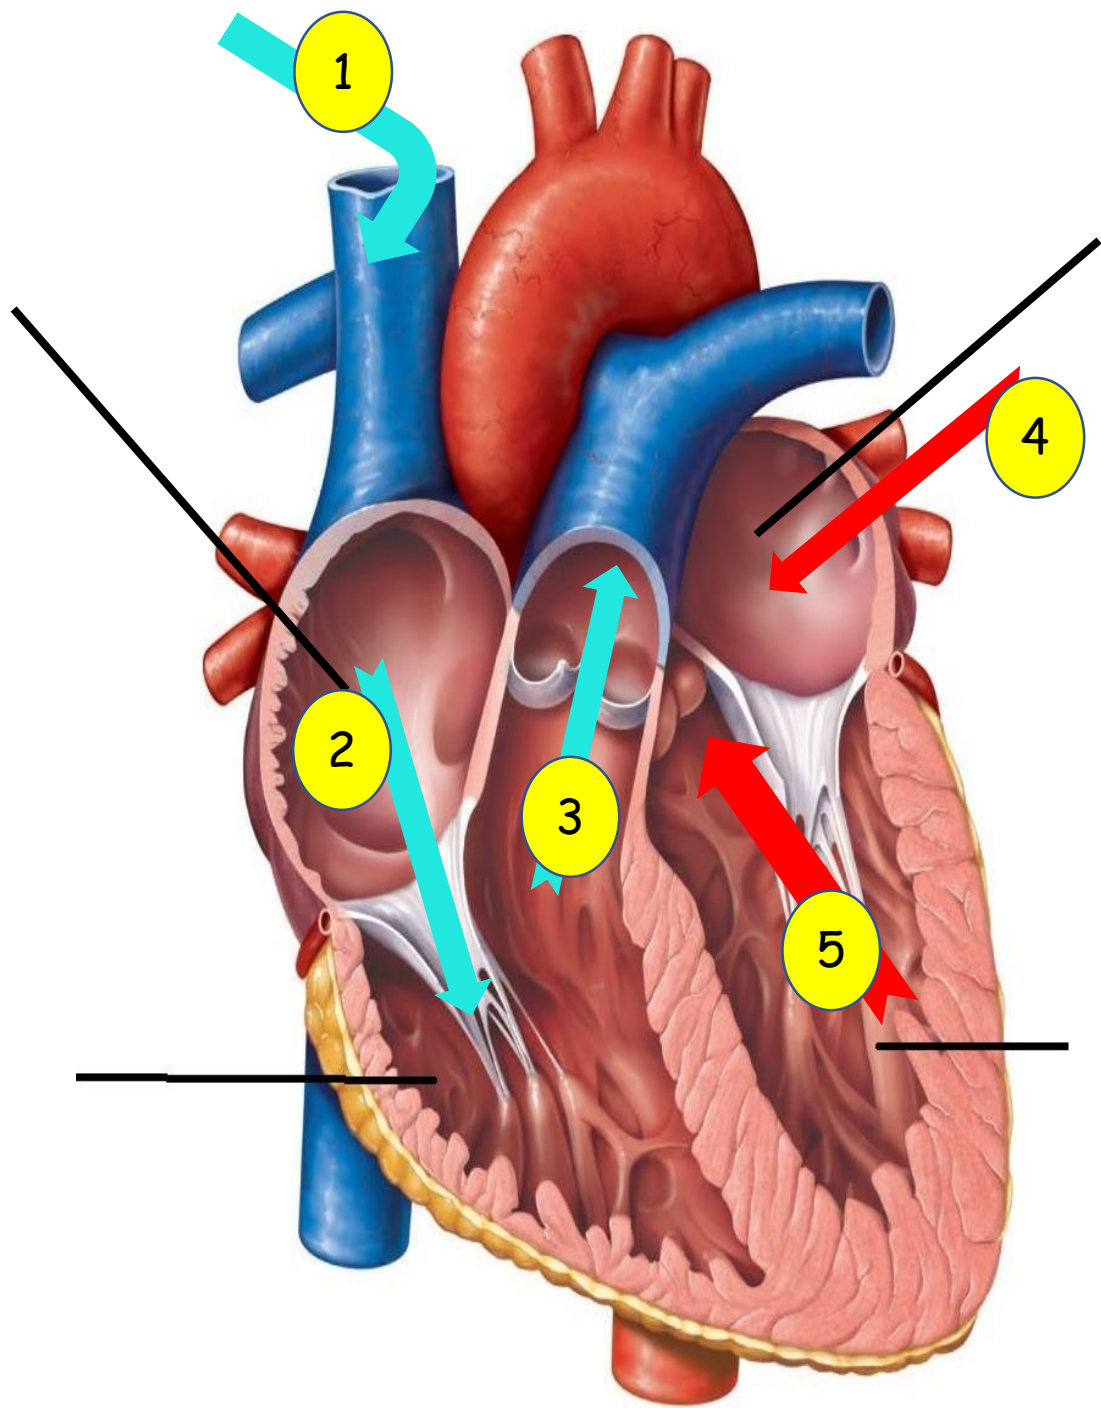

2

3

4

The left side pumps blood

The right side pumps blood

6
Then it goes into the whole body .

!!! BYE BYE !!!
