A large red speech bubble graphic with a tail pointing to the right, containing the text "Sessions 24/25".

Sessions

24/25

Sometimes, the producer is damaged!

Trees in forests are cut down.
When we destroy the forests by cutting trees
down, **deforestation** happens.

Trees are cut down:

1

To collect wood to
make furniture.

2

To collect wood to
burn as a fuel.

3

To clear land for
farming.

4

To clear land for mining.

5

To clear land cities.

Deforestation happens
when we d... the forests by c... .

Trees are cut down:

To clear land for mining.

To collect wood to make furniture.

To collect wood to burn as a fuel.

To clear land cities.

To clear land for farming.

Deforestation has a negative effect on the environment;
it causes **global warming** (the Earth becomes warm and warmer).

1. What is deforestation?
2. Why does deforestation happen?
3. What is the negative effect of deforestation on the environment?
