

## Screw

A **screw** is also a simple machine. The lid of a jar and the bottom of a light bulb are both kinds of screws.

Screws make it easier to put things together. Think about the lid on a jar. As you turn the lid, it screws down onto the jar, closing it tightly.

## Lever

In the pictures below, you see levers. A **lever** is a simple machine for pushing things up. When you push down on one end of the lever, the other end goes up.

Did you know that a seesaw is also a lever?
