

* 5.2. The human skeleton

We have 206 bones in our skeletons. There are different kinds of bones in the skeleton:

-  Long bones, like the bones in our legs and arms. The thigh bone is the long bone in your leg.
-  Short bones, like those in our fingers.
-  Flat bones, like those that make up our skull.
-  **Irregular** bones, like the bones in our spine.

Finding your bones

Feel your head. How many **skull** bones can you feel?

Hold your hands on the sides of your chest. Can you find your ribs?
How many ribs can you feel?

Now feel your back. The bumps you can feel are the bones of your **spine**. These bones are called **vertebrae**. One bone is called a **vertebra**.

Stand up and put your hands on your hips. Can you feel your hip bones?
