

4.5. Sorting living things

Scientists who study living things need to be able to group them.

Help the zookeeper sort the animals into the correct group.

Think about different animals and fill in the blanks.

- have fur.
- have scales.
- have feathers.

* 5.1. Natural materials

Rocks are **natural** materials.

They come from the ground.

Natural materials come from nature.

There are many other natural materials, like rubber. Rubber comes from a tree.

What natural materials can you see in these pictures?
