

You should see a doctor.

Noah, Zara and Nor are at the clinic with their mother, Mrs. Suppiah. The children have different symptoms. Noah has a bad cough. Zara has a sore throat. Little Nor has insect bites on her arms and legs which itch. She wants to scratch them all the time.

The children see Dr. Tan. She examines each child. Then she prescribes a different medicine for each child.

That's a nasty cough, Noah. This medicine will cure it. Take two of these cupfuls three times a day.

Mum will rub this ointment on your bites to stop them itching. Try not to scratch them, Nor.

We need to kill the germs causing your sore throat, Zara. Take one of these pills with a glass of water twice a day – once after breakfast and once before you go to sleep at night.
