

Each day, the temperature, wind, rain and sun can change. we call this weather.

There are different kinds of weather like: sunny, cloudy, rainy, snowy, windy and stormy.

1

Ronak Heydari

We can see a rainbow when sun is shining and it rains at the same time.

2

Barana Haghadian

We have 3 states of matter: Solid, liquid and gas.

3

Zahra Akhbari

A solid has a definite shape. for example Sofa, Tv, Pencil and radio.

4

Helma Fatehi

A liquid takes the shape of its container.  
For example: Milk, Water, Juice.

5

Raha Hasani

A gas takes the shape of its container.  
For example: Oxygen, Air, water vapor

6

Farnaz Abdollahi

A light source makes light.  
Sun, Flash light, Lamp are light sources.  
But moon is not a light source because moon reflects light from the sun.

7

Parniyan Nematollahi

The earth spins so all parts of the earth have time in the light and the dark, we call these times day and night.

8

Fateme Jafari

First is egg.  
Second is egg hatching.  
Third is chick.  
Fourth is chicken.

9

Noora Masjedi

First is egg .  
second is egg hatching .  
third is tadpole .

11

Adelia Malvandi

1.A seed is planted  
2.The seed starts to grow.  
3.A young plant develops.  
4.The young plant becomes a fully grown,flowering plant.

12

Helena Sheibani

Some animals fly like birds.  
Some animals hop like kangaroos.  
Some animals crawl like turtles.  
Some animals run like horse.  
some animals swim like fish.  
Some animals walk like goat

13

Rose Haghghi

Habitat is the home of animals.  
For example:Jaguars live in jungle.  
Fish lives in the sea.  
Mountain goats live in mountains.  
Sparrows live in town.  
Snake live in desert.

14

Mahla Mirzaei

Animals have different skin covers.  
Some of them have fur like sheep and cat,  
Some have scales like snake and fish  
and some have feathers like parrot and duck.

15

Zahra Mohammadi

Natural materials come from the ground.  
Wood,cotton and rock are natural materials  
but Man-made materials are made by people.  
Paper,glass and plastic are man-made materials.

16

Elisa Roodbari

We can bend, twist, stretch, and squash materials.  
This will change the shape of the materials.

17 Parniyan Nematollahi

We use the sense of hearing to hear the sound of bell and for listening to music.  
We use the sense of touch to feel the hotness and coldness and to hug our friends and family.

19 Noora Tabatabaei

There are five senses in our body: Touch, taste, sight, hearing, smell

18 Raha Hasani

Our senses of smell and taste work together. They help us to stop eating bad food.  
For example the taste of Kiwi is pleasant and the smell of trash is unpleasant.

20 Elisa Roodbari

Our eyes have 3 parts:  
eyelash, pupil and eyelid

21

Zahra Akhbari

Some animals have poor eye  
sight and it means they can't  
see things well. Like mole.

22

Helma Fatehi

Some animals have good eye  
sight and it means they can see  
things very good.  
like tiger and owl.

23

Barana Haghdadian
