

CHAPTER 1 Living things Alavi

Things that are alive:

-  need air to breathe.
-  need water and food.
-  can move.
-  have senses.
-  can produce young.
-  grow.
-  produce waste products (*excrete*).

These are the seven life processes.

Questions

1. List the seven life processes.
2. A horse can run, eat, drink and see.
Is it alive?
3. A toy kite moves and flies in the air.
Is it alive?

Living or non-living?

With a partner, sort pictures of things into two groups:

- ◆ living things
- ◆ non-living things.

You will need:
a large sheet of paper, pens and
a selection of pictures of things
that are living and non-living.

Use the seven life processes to help you decide where to put each picture.
Were there any that you found difficult to place?
If so, explain why.

Primary Science

* 1.2. Sorting humans

Look at other people. They are all *similar* to you but also *different*.
Our eyes are different colours.
