۱۰	<p>متن زیر را بخوانید و به سؤالات آن جواب دهید.</p> <p>Cheetahs are part of the big cat family. While they can't climb trees, they can run faster than any other land animals. They can reach a top speed of around 113 km per hour. Cheetahs are smaller than other members of the big cat family, weighing only 45-60 kilograms. They have a lifespan of 8 to 10 years in the wild. Cheetahs are the only big cats that cannot roar. Instead, they can purr, like domestic cats! While lions and leopards usually do their hunting at night, cheetahs hunt for food during the day. Cheetahs mainly eat gazelles and other small animals.</p> <p>Cheetahs are not usually dangerous to humans; they don't usually attack people. Some people actually kept them as pets in the past. Some zoos even let you get really close to the animal.</p> <p>In the past, people hunted cheetahs to stop them from eating the animals they kept on the farms, although studies show that cheetahs don't usually do so. In 1900, there were over 100,000 cheetahs across the planet. Today, there are 9,000 to 12,000 cheetahs in the wild in Africa.
