### Reading

۱۰	<p>J) Read the article below and then answer the questions.</p> <p>Cheetahs and leopards are both big cats found in Africa and parts of Asia. They may look alike, but they are different in many ways. Cheetahs are famous for their speed; they are actually the fastest land animals on the planet. Leopards are a little heavier than cheetahs. They are not as fast as cheetahs, but they are much more powerful. Cheetahs usually hunt during the daytime. They often hunt small animals like gazelles and impalas. But <u>they</u> are not dangerous for humans. Leopards always hunt during the night. They are among the most dangerous animals for human beings, especially when they are injured. Cheetahs live between 8 and 10 years in the wild. Leopards live longer. They can live up to 17 years in the wild.</p> <p>33. Leopards and cheetahs always hunt at night. True <input type="checkbox"/> False <input type="checkbox"/></p> <p>34. Leopards live longer than cheetahs. True <input type="checkbox"/> False <input type="checkbox"/></p> <p>35. An injured leopard is ..... a healthy one.</p> <p>1) as dangerous as      2) more dangerous than</p> <p>3) as powerful as      4) more powerful than</p> <p>36. The underlined word "<u>they</u>" in the second paragraph refers to ... .</p> <p>1) gazelles      2) impalas      3) cheetahs      4) leopards</p> <p>37. What does the cheetah usually hunt?</p>	۴ نمره
