Reading Comprehension

Computers are good tools. The Internet is also good. But some people spend too much time online. They can't stop. Doctors say this is a new sickness. They call this sickness Internet Addiction Disorder (LAD). People with LAD are online a lot. They spend hours instant messaging their friends or playing online games. Many people with LAD spend more time on the Internet than with family or friends. Some people with LAD even quit their jobs!

Do you have LAD? Think about these questions: How many hours a day are you online? Is it a lot or a little? When you are not online, are you thinking about playing a computer game or checking your messages? When you are online, do you forget the time? Do you get angry When you can't play a game?

If you have LAD, what can you do? Dr. Ivan Goldberg and Dr. Kimberly S. Young have some ideas. First, ask yourself "Why am I online a lot?" Then try to take a break. For example, use the computer or play games twice a week, not every day. In this way, you can have a good social life with other friends.
