

$$= \frac{1}{2} \times \frac{1}{2} + \frac{1}{2}$$

$$2 \frac{1}{2} \times 2 \frac{3}{4}$$

$$\begin{aligned} & \frac{1}{x} \times \frac{1}{x} = \frac{1}{x^2} \\ & \frac{1}{x} + \frac{1}{x} = \frac{2}{x} \\ & \frac{1}{x} \times \frac{1}{x} = \frac{1}{x^2} \end{aligned}$$

$\frac{1}{x} \times \frac{1}{x} = \frac{1}{x^2}$	$\frac{1}{x} + \frac{1}{x} = \frac{2}{x}$
$\frac{1}{x} = \frac{1}{x} \times 1$	$x = 1 \times x$
