

به نام خدا

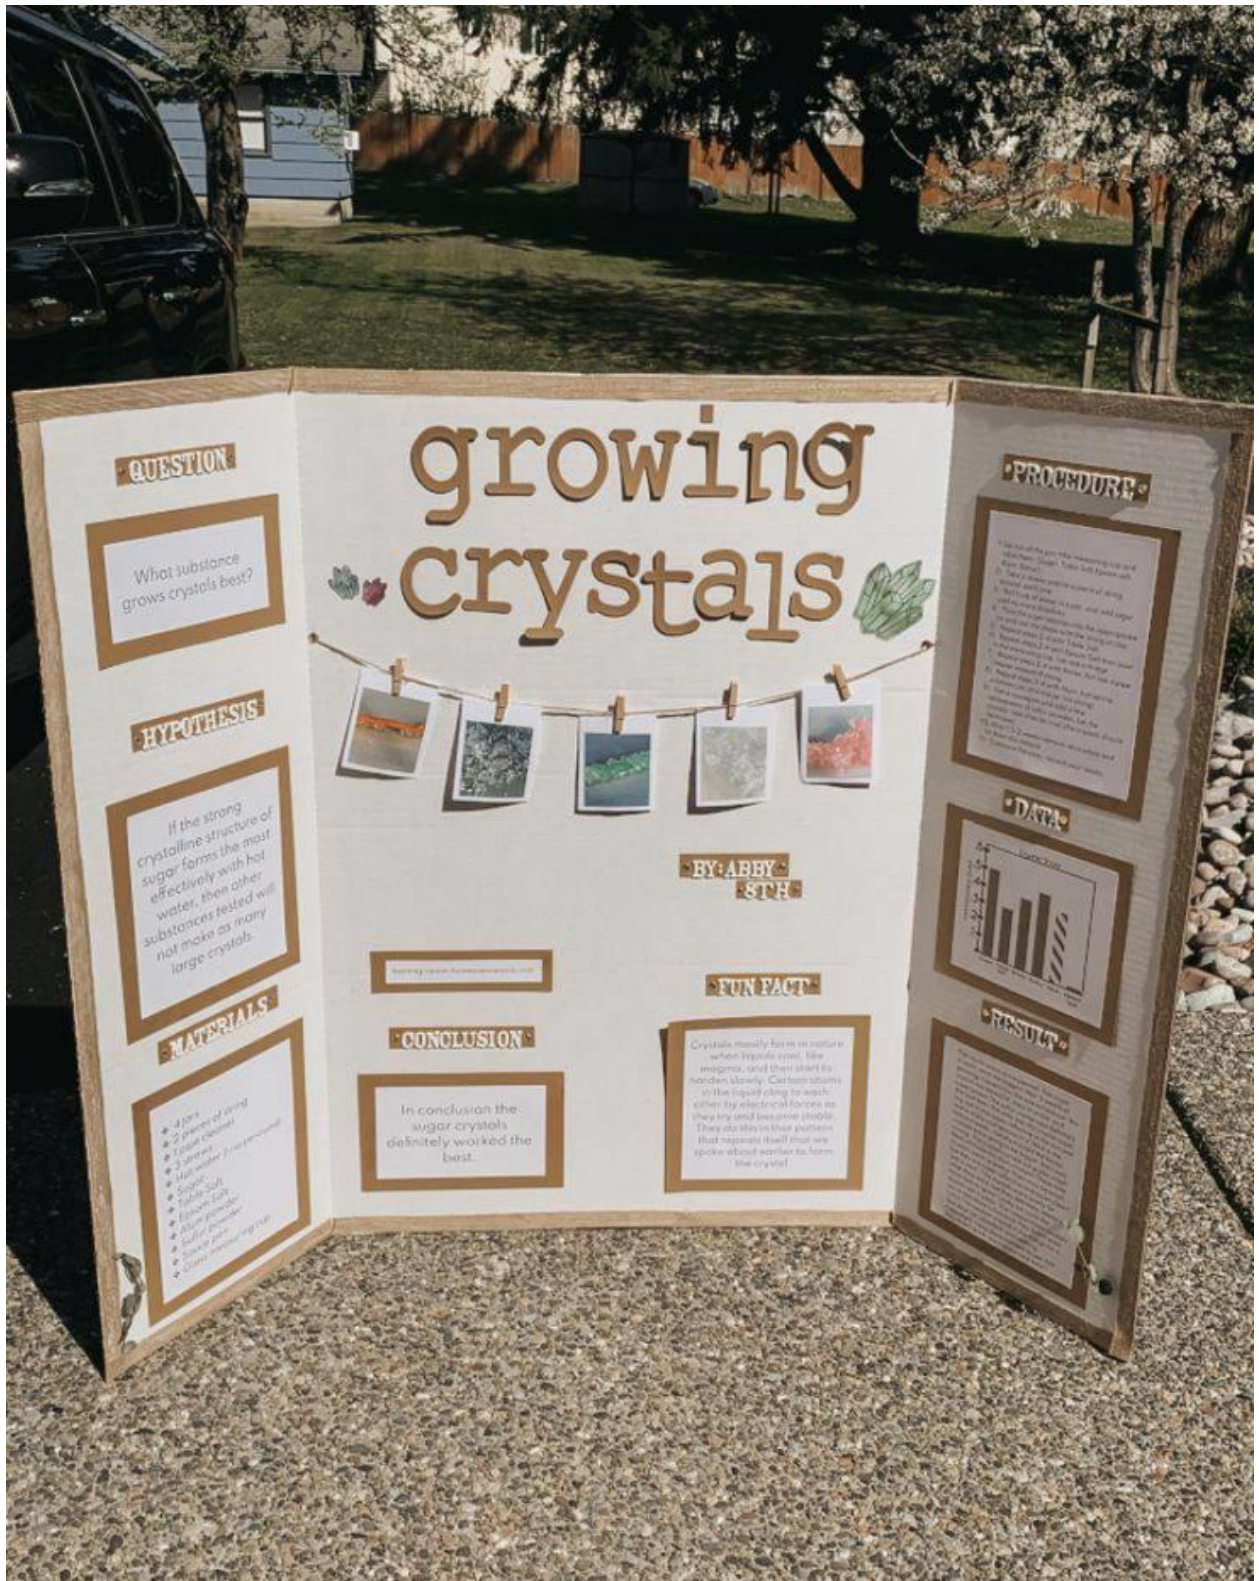

در هنگام ساخت پوستر حتما موارد زیر را رعایت کنید:

- 1- گروه ها 5 نفره باید باشد
- 2- موضوع پوستر مربوط به ماه های سال با ذکر فصل مربوطه -عکس از ماه های سال به میلادی-ذکر فعالیت ورزشی مربوط به هر فصل با تصویر. (توجه ابتدا فصل ها را مشخص کنید و سپس ماه های هر فصل ... و
- 3- پوستر باید دارای عکس و متن باشد(سائزش نسبت به اندازه پوستر تون باشد. فضای خالی یا استفاده نشده نباید داشته باشد)
- 4- متن پوستر باید تایپ شده و بدون غلط املائی باشد
- 5- فونت Sassoon infant باشد
- 6- رنگ پوستر دلخواه هست
- 7- پوستر باید شناسنامه داشته باشد (اسم/مقطع تحصیلی/ سطح / اسم معلم). و در سمت چپ و پایین چسبانده شود.
Name:/Grade:/Level:/Teacher's name:
- 8- سائز پوستر بزرگ باشد (طول حداقل 90 و عرض حداقل 70 باشد).
- 9- موضوع پوستر وسط بالا چسبانده یا نوشته شود.
- 10- پوستر باید سه قسمت داشته باشد
- 11- حتما از خلاقیتتون استفاده کنید(رنگ/تزیین/عکس های با کیفیت و متنوع و.....).
- 12- قبل از چسباندن عکس و متن حتما با من چک شود.
- 13- توجه داشته باشید که دانش آموز باید پوستر را ارایه دهد پس به تلفظ لغات و گرامر ها تسلط کافی داشته باشید و در صورت هرگونه مشکل از من بپرسید.
- 14- پوسترها در روز اختتامیه پایگاه تابستانه به نمایش گذاشته میشود.

QUESTION

What substance grows crystals best?

HYPOTHESIS

If the strong crystalline structure of sugar forms with hot water, then other substances tested will not make as many large crystals.

MATERIALS

- 4 jars
- 2 pieces of string
- 1 paper cup
- 3 string
- 1/2 cup water
- 1 cup sugar
- 1/2 cup salt
- 1/2 cup baking soda
- 1/2 cup alum powder
- 1/2 cup borax
- 1/2 cup epsom salt
- 1/2 cup potassium permanganate

growing crystals

BY ABBY STH

CONCLUSION

In conclusion the sugar crystals definitely worked the best.

FUN FACT

Crystals mostly form in a liquid or when liquids cool, like magma, and then start to harden slowly. Certain atoms in the liquid cling to each other by electrical forces as they try and become stable. They stay in that pattern that repeats itself that we spoke about earlier to form the crystal.

PROCEDURE

1. Label the jars with the necessary cup and ounce amounts. Label "Cup 1/2" (sugar), "Cup 1/2" (salt), "Cup 1/2" (baking soda), "Cup 1/2" (alum), "Cup 1/2" (borax), and "Cup 1/2" (epsom salt).
2. Fill each jar with the appropriate amount of water.
3. Add the appropriate amount of string and sugar to each jar.
4. Stir the mixture thoroughly to dissolve the sugar.
5. Repeat steps 2-4 with the other substances.
6. Place the jars in a warm, sunny location.
7. Observe the jars daily and record your observations.
8. After 24 hours, remove the jars and observe the crystals that have formed.
9. Repeat the experiment with the other substances.
10. Compare the results of the experiment.

DATA

RESULT

The results of the experiment show that sugar crystals grew the most in the jars. This was expected because sugar has a strong crystalline structure. The other substances also grew crystals, but they were much smaller and less numerous than the sugar crystals. This supports the hypothesis that sugar forms with hot water more effectively than other substances.

China

中国

economics

China is a rapidly growing economy and is the second largest producer of agricultural products. China and the rest of the world are using computers. China produces more products than any other country. China exports a variety of products such as steel, oil, and coal. China's GDP in 2017 was \$14.7 trillion USD and the per capita was \$9,854 USD.

politics

China is a communist country. The government is a one-party system. The Communist Party of China (CPC) is the only political party in China. The CPC is led by Xi Jinping. The government is responsible for the economy, social stability, and national defense. China is a major power in the world and has a large military. China is also a member of the United Nations and the World Trade Organization.

The Great Canal is considered by many people to be the greatest engineering feat in the world. It is a 1,776-mile-long canal that connects the Yellow River in the north to the Yangtze River in the south. The canal is used for irrigation and transportation. It is also a major waterway for shipping goods and people. The canal is a symbol of Chinese ingenuity and hard work.

arts

Chinese calligraphy is a traditional art form. It involves writing characters in a stylized, flowing manner. Calligraphy is used for decorative purposes and to convey messages. It is a highly respected art form in China and is often used in traditional Chinese painting and architecture.

education

Education is highly valued in China. The government invests heavily in education and has made significant progress in improving the quality of education. China has a large and growing education sector. The government has implemented various reforms to improve the education system, including increasing the number of schools and teachers, and improving the quality of teaching. China is also a leader in research and development in education.

recreation

China has a rich and diverse cultural heritage. There are many traditional festivals and customs in China. People in China enjoy a variety of recreational activities, including playing mahjong, going to the opera, and practicing Tai Chi. China is also a major tourist destination and has many beautiful natural and cultural sites. The government has invested in developing the tourism industry and has made significant progress in improving the infrastructure for tourists.

religion

China is a multi-religious country. The most common religions in China are Buddhism, Taoism, and Confucianism. There are also many smaller religions and sects in China. The government has implemented various policies to manage the religious landscape in China. The government has implemented various reforms to improve the religious environment in China, including increasing the number of religious sites and improving the quality of religious services. China is also a leader in research and development in religion.

kinship

Family is highly valued in China. The family is the central unit of society and is responsible for the well-being of its members. The government has implemented various policies to support the family and to improve the quality of family life. The government has implemented various reforms to improve the family environment in China, including increasing the number of family-friendly policies and improving the quality of family services. China is also a leader in research and development in family studies.
