DAY & NIGHT

day

**It's day because you can
see the sun.**

night

It's night because you
can't see the sun.

the earth

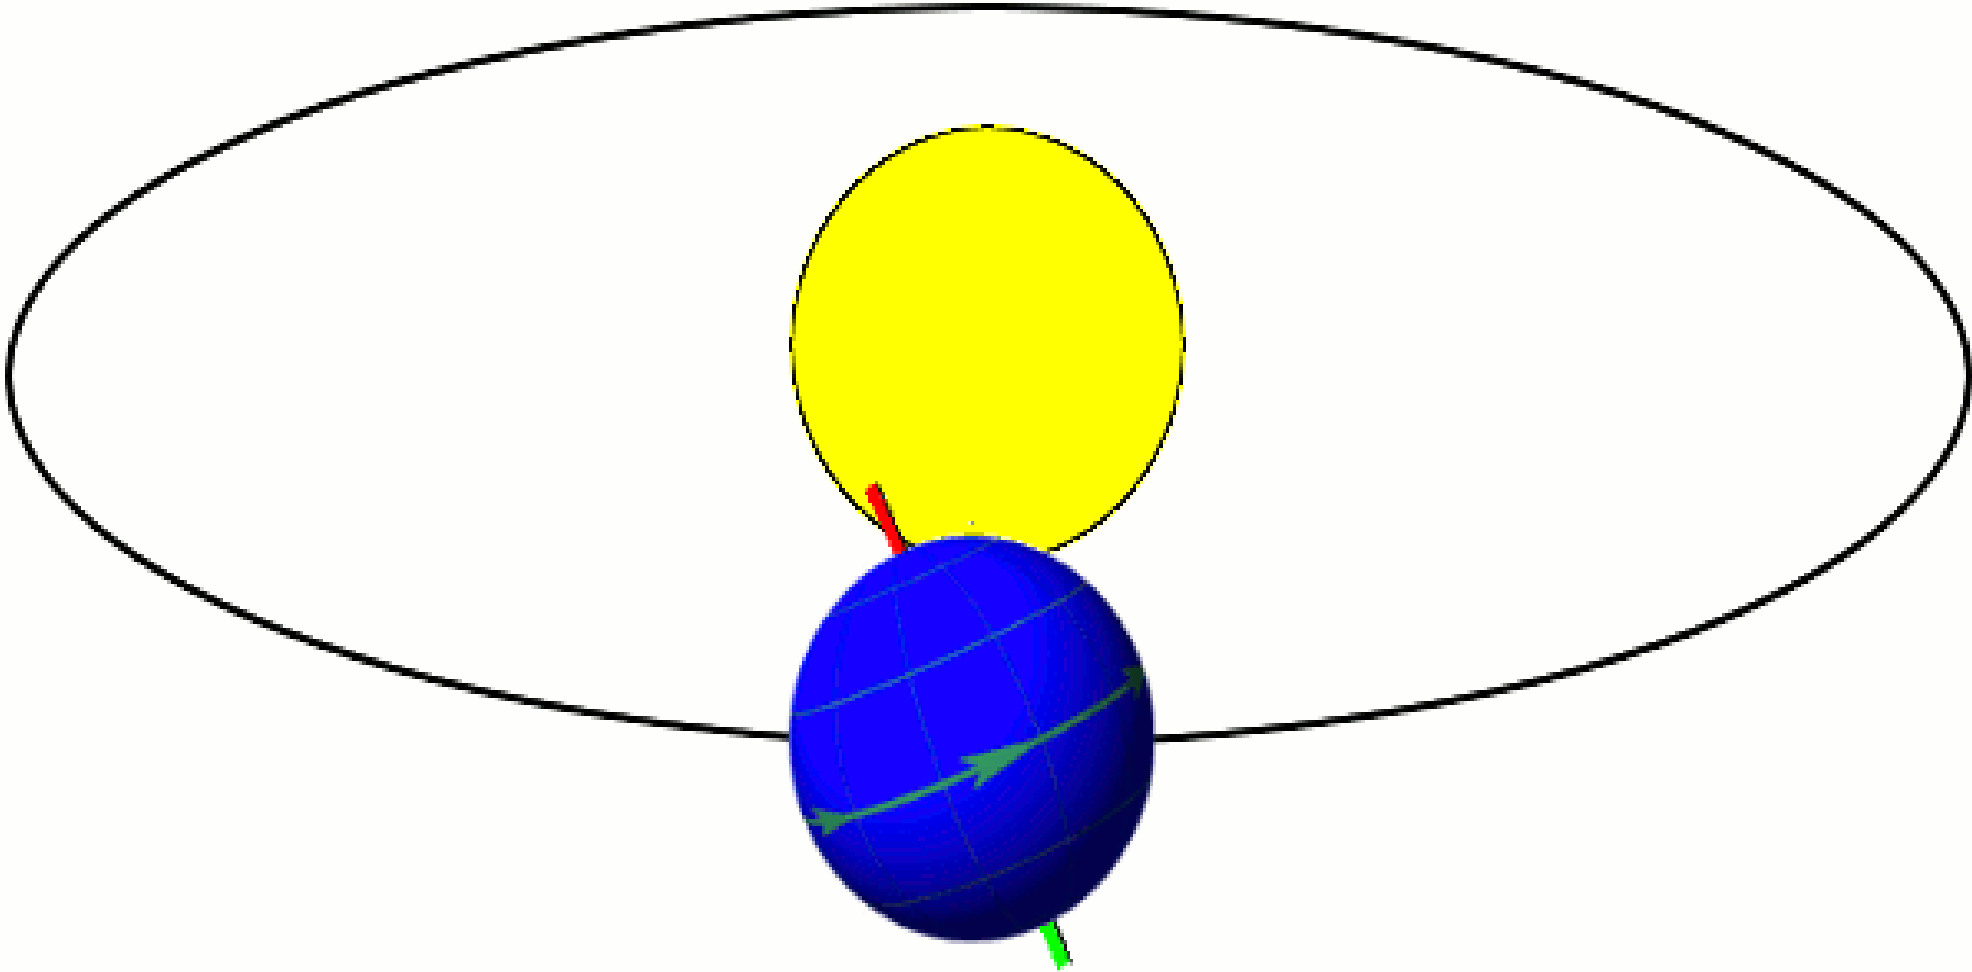

spinner

Earth is a spinning ball.

**The earth orbits around the
sun.**

A diagram illustrating the cycle of day and night on Earth. The Sun is shown as a large, bright orange and yellow sphere on the right. The Earth is shown as a smaller blue and white sphere on the left. A yellow line represents the Earth's axis, tilted towards the Sun. The side of the Earth facing the Sun is labeled "day", and the opposite side is labeled "night".

night

day

Where is day and night?

thanks
