

skeleton

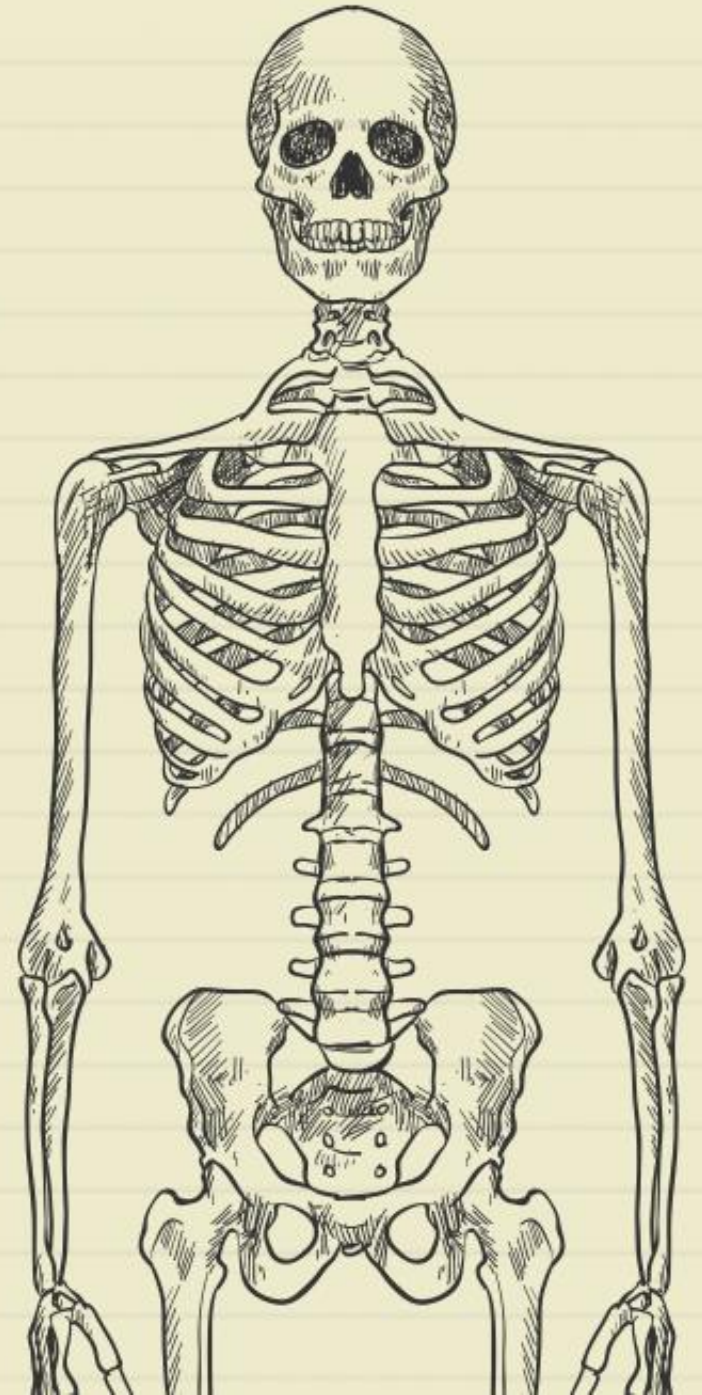

Miss Abdollahi

skeleton!

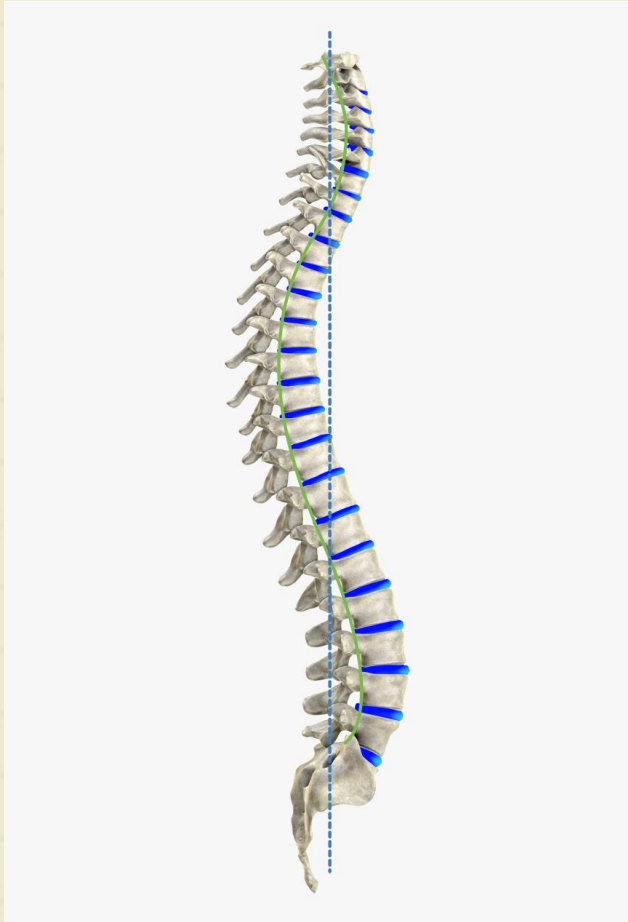

Sometimes skeletons look very scary. skeletons are not scary. people and many animals have skeleton inside their bodies. a skeleton is a hard strong frame that support our bodies from the inside.

bone

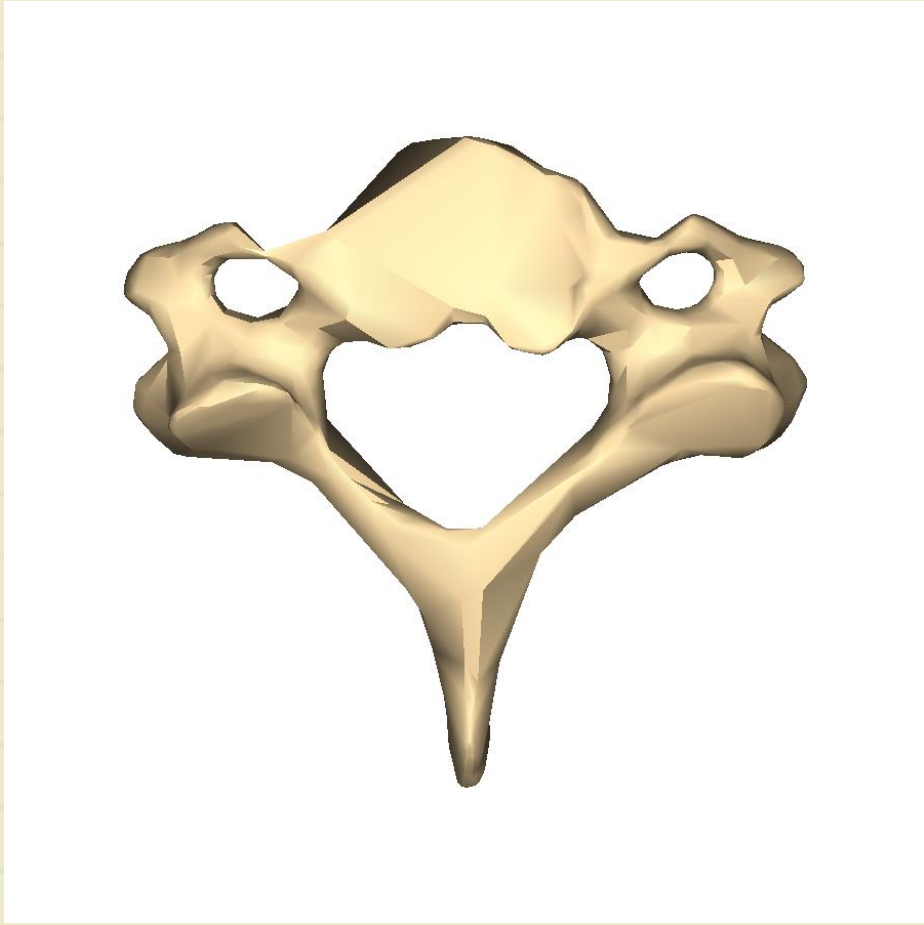

spine

skull

vertebra

What are skeletons made of?

Skeletons are made of bones. bone is very strong and hard.

Let's answer:

📖 Skeletons

skeleton, bones

Skeleton or no skeleton?

1 Look at the pictures. Put a tick (✓) in the box next to the animals that have a skeleton. Put a cross (X) in the box next to the animals that do not have a skeleton.

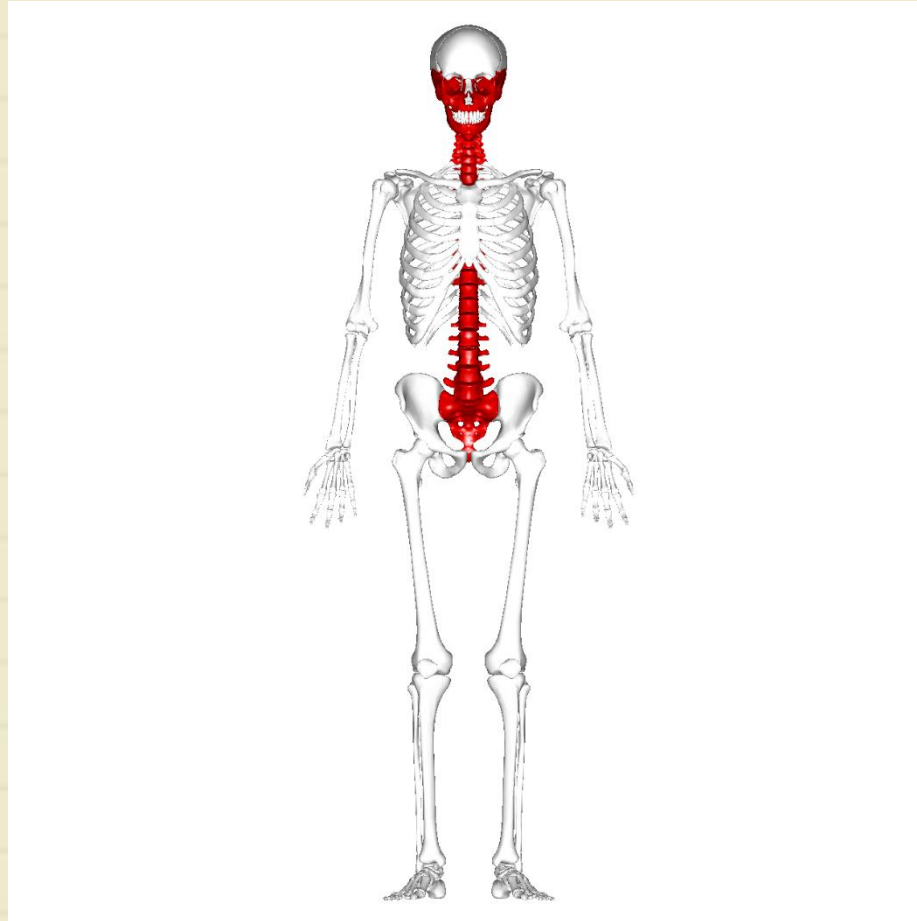

Types of bones in human body

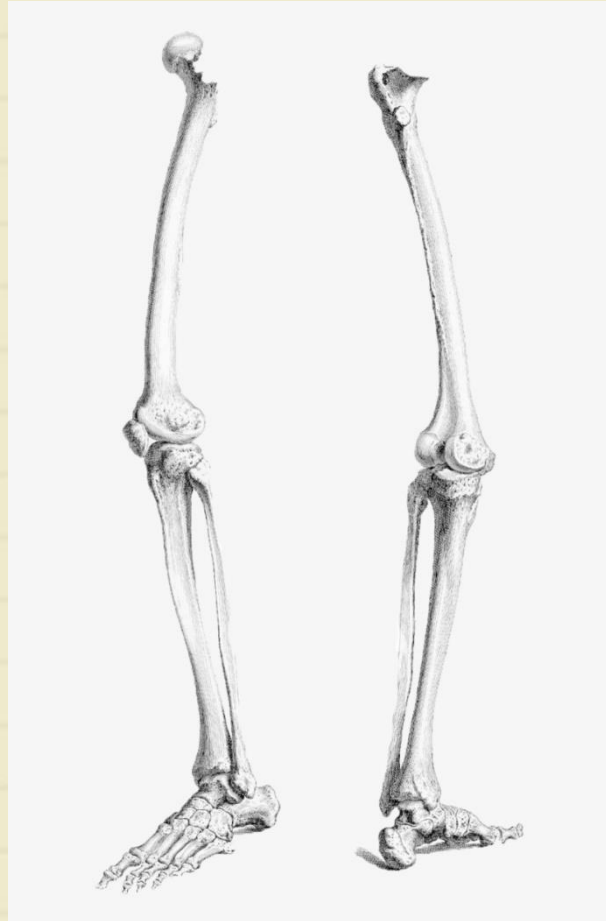

- Long
- Short
- Flat
- Irregular

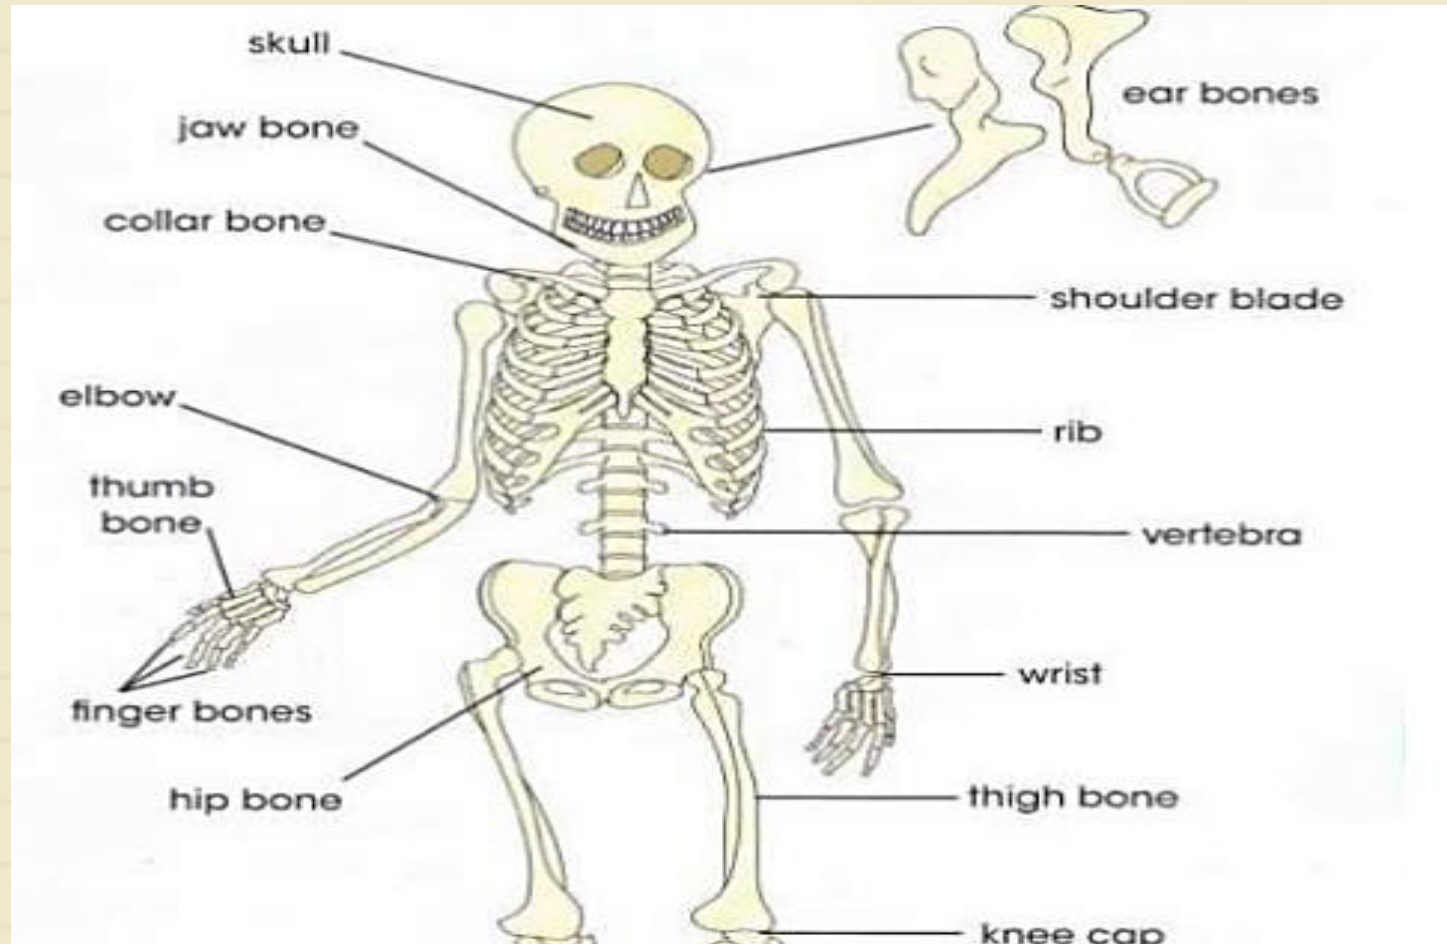

irregular

thigh

Activity 1.1

Finding your bones

Feel your head. How many **skull** bones can you feel?

Hold your hands on the sides of your chest. Can you find your ribs?

How many ribs can you feel?

Now feel your back. The bumps you can feel are the bones

of your **spine**. These bones are called vertebrae. One bone is called a **vertebra**.

Stand up and put your hands on your hips. Can you feel your hip bones?

2 What are the bones in your head called?

3 What are the bones in your chest called?

4 What is the row of bones in your back called?

5 What is a single bone in your back called?

Thanks!
