

Science 8

Ms. Asgari

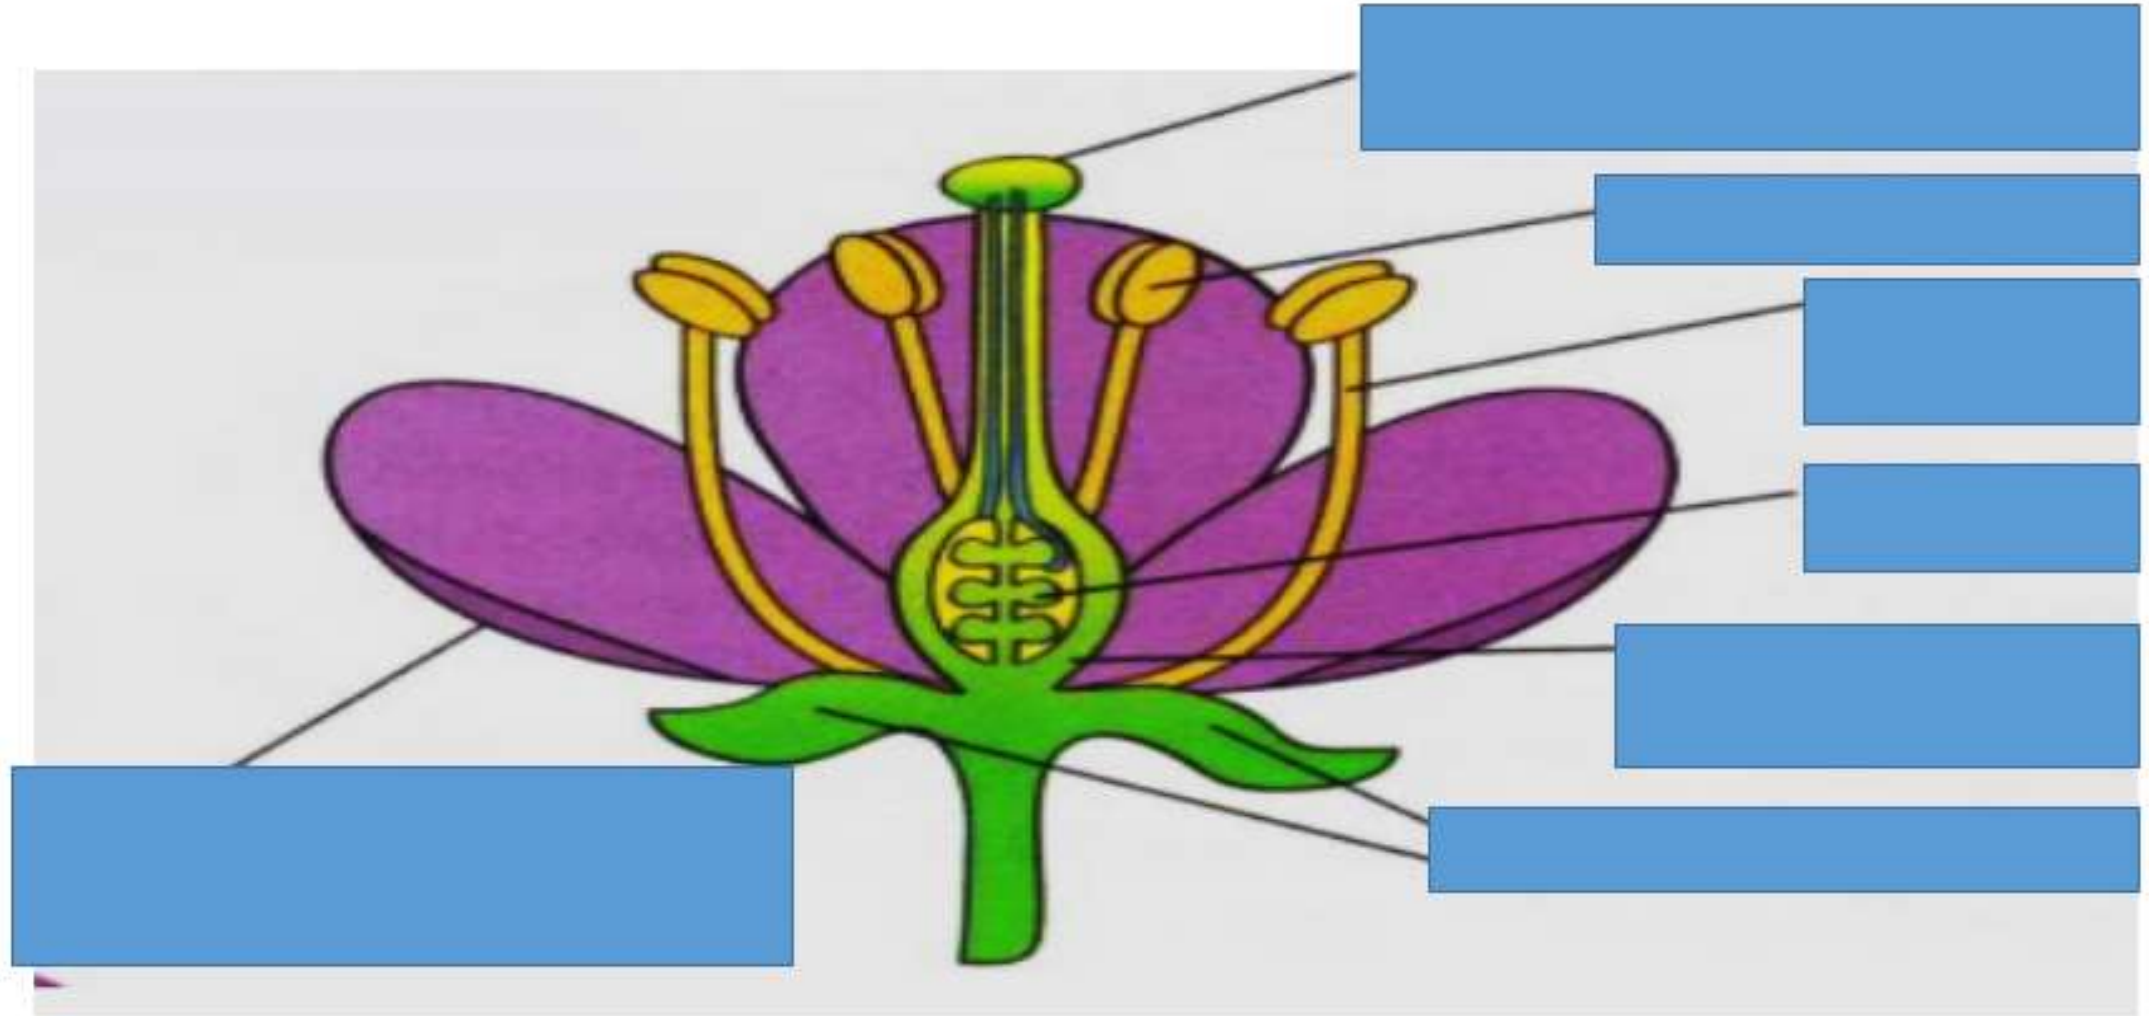

Hello everyone .

Let's review .

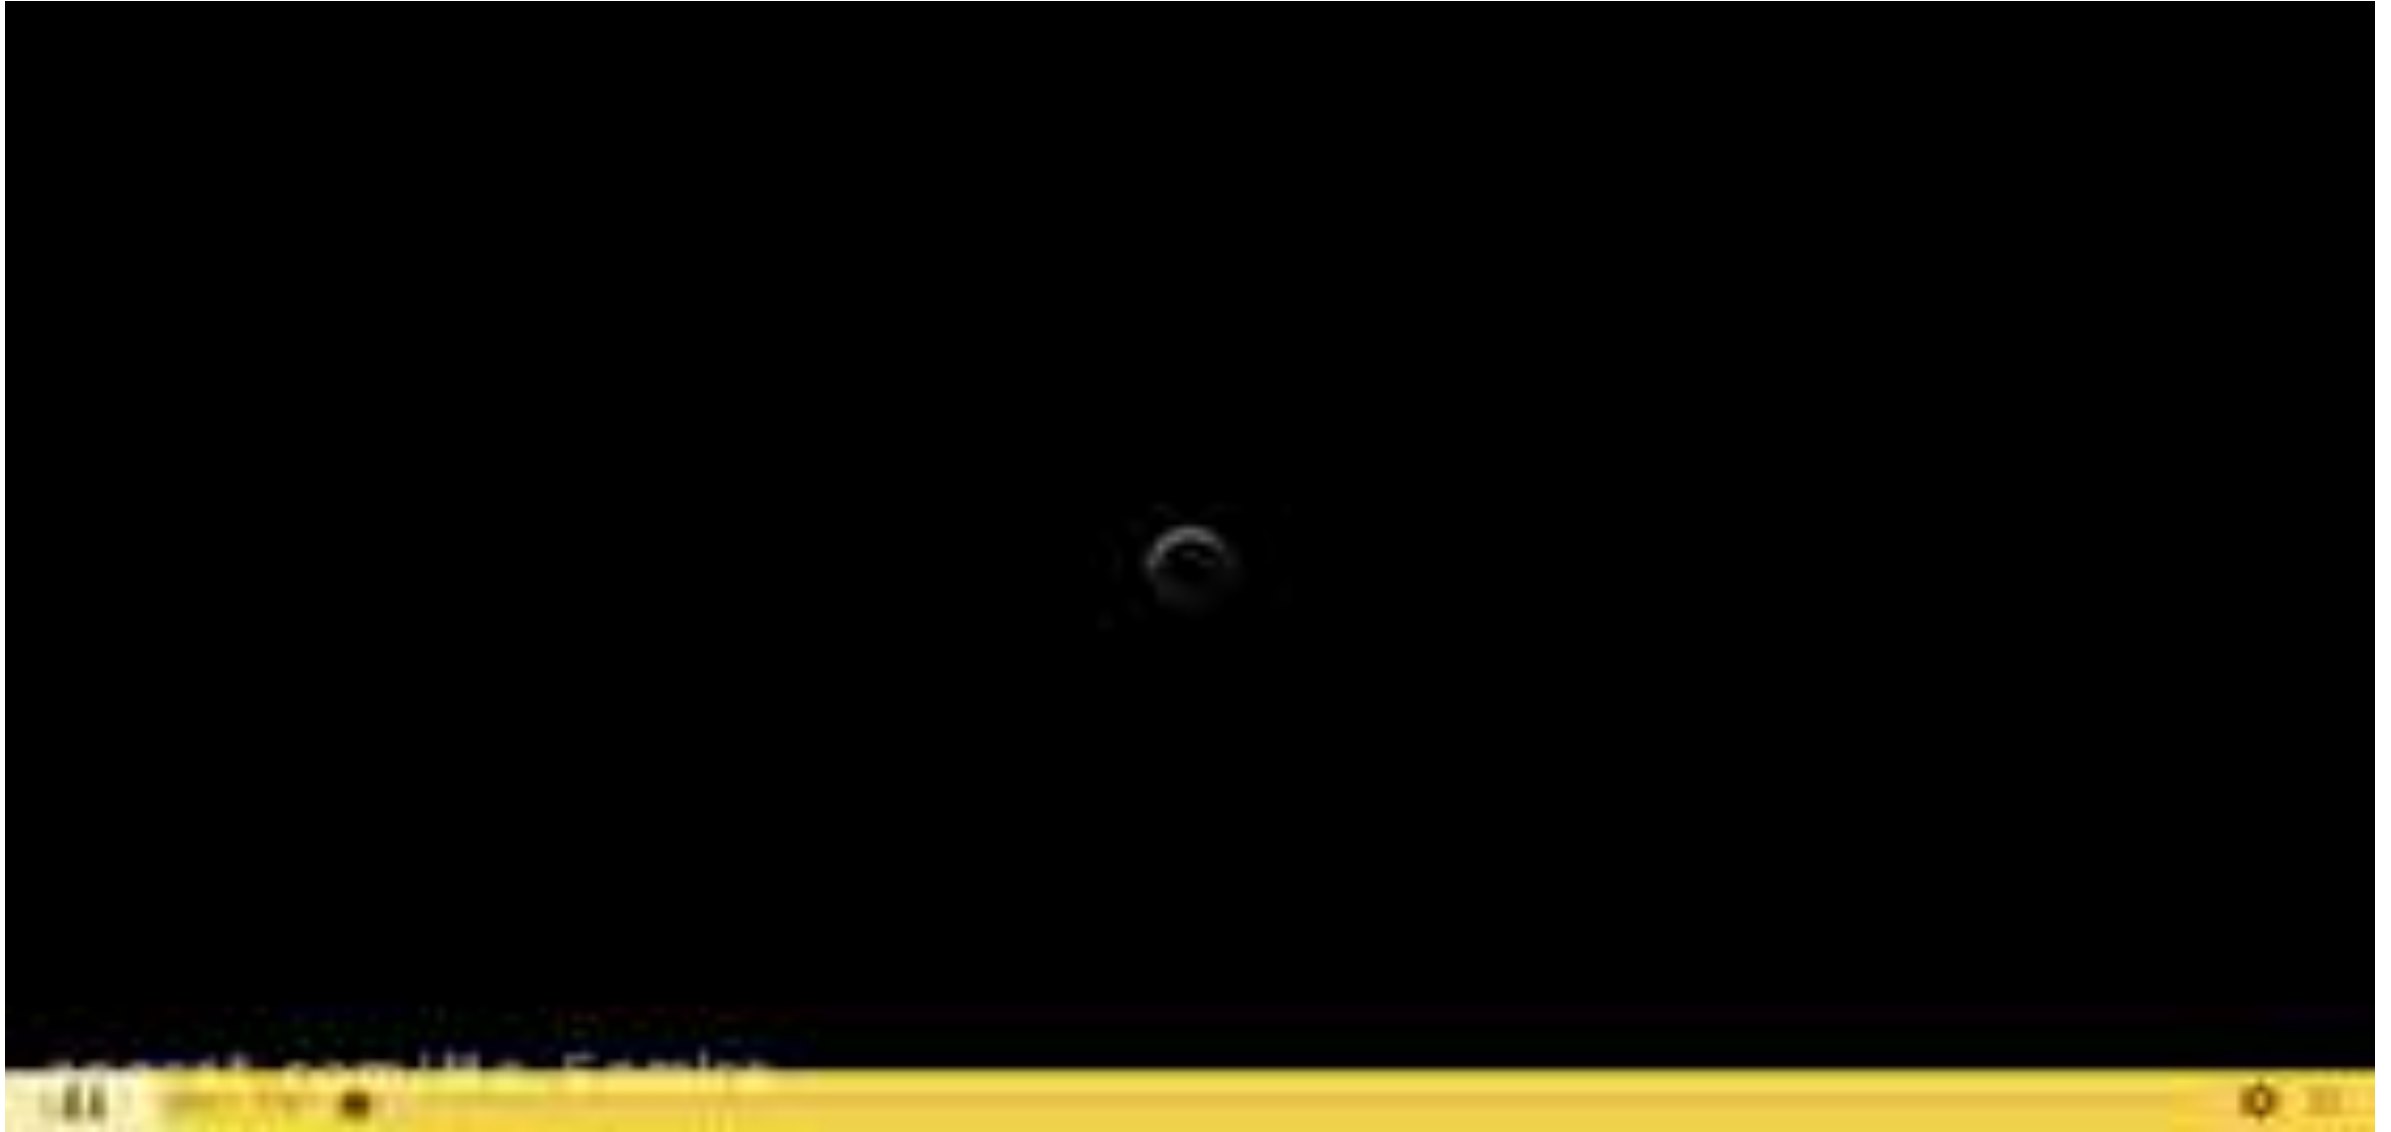

Can you fill in the blanks ?

Do you know what happens to plants after seed dispersal ?

Let's watch a movie about plant's life cycle .

Lets it learn the step by step .

- Are you ready ?

Step 1

- Seed dispersal

What is
seed dispersal?

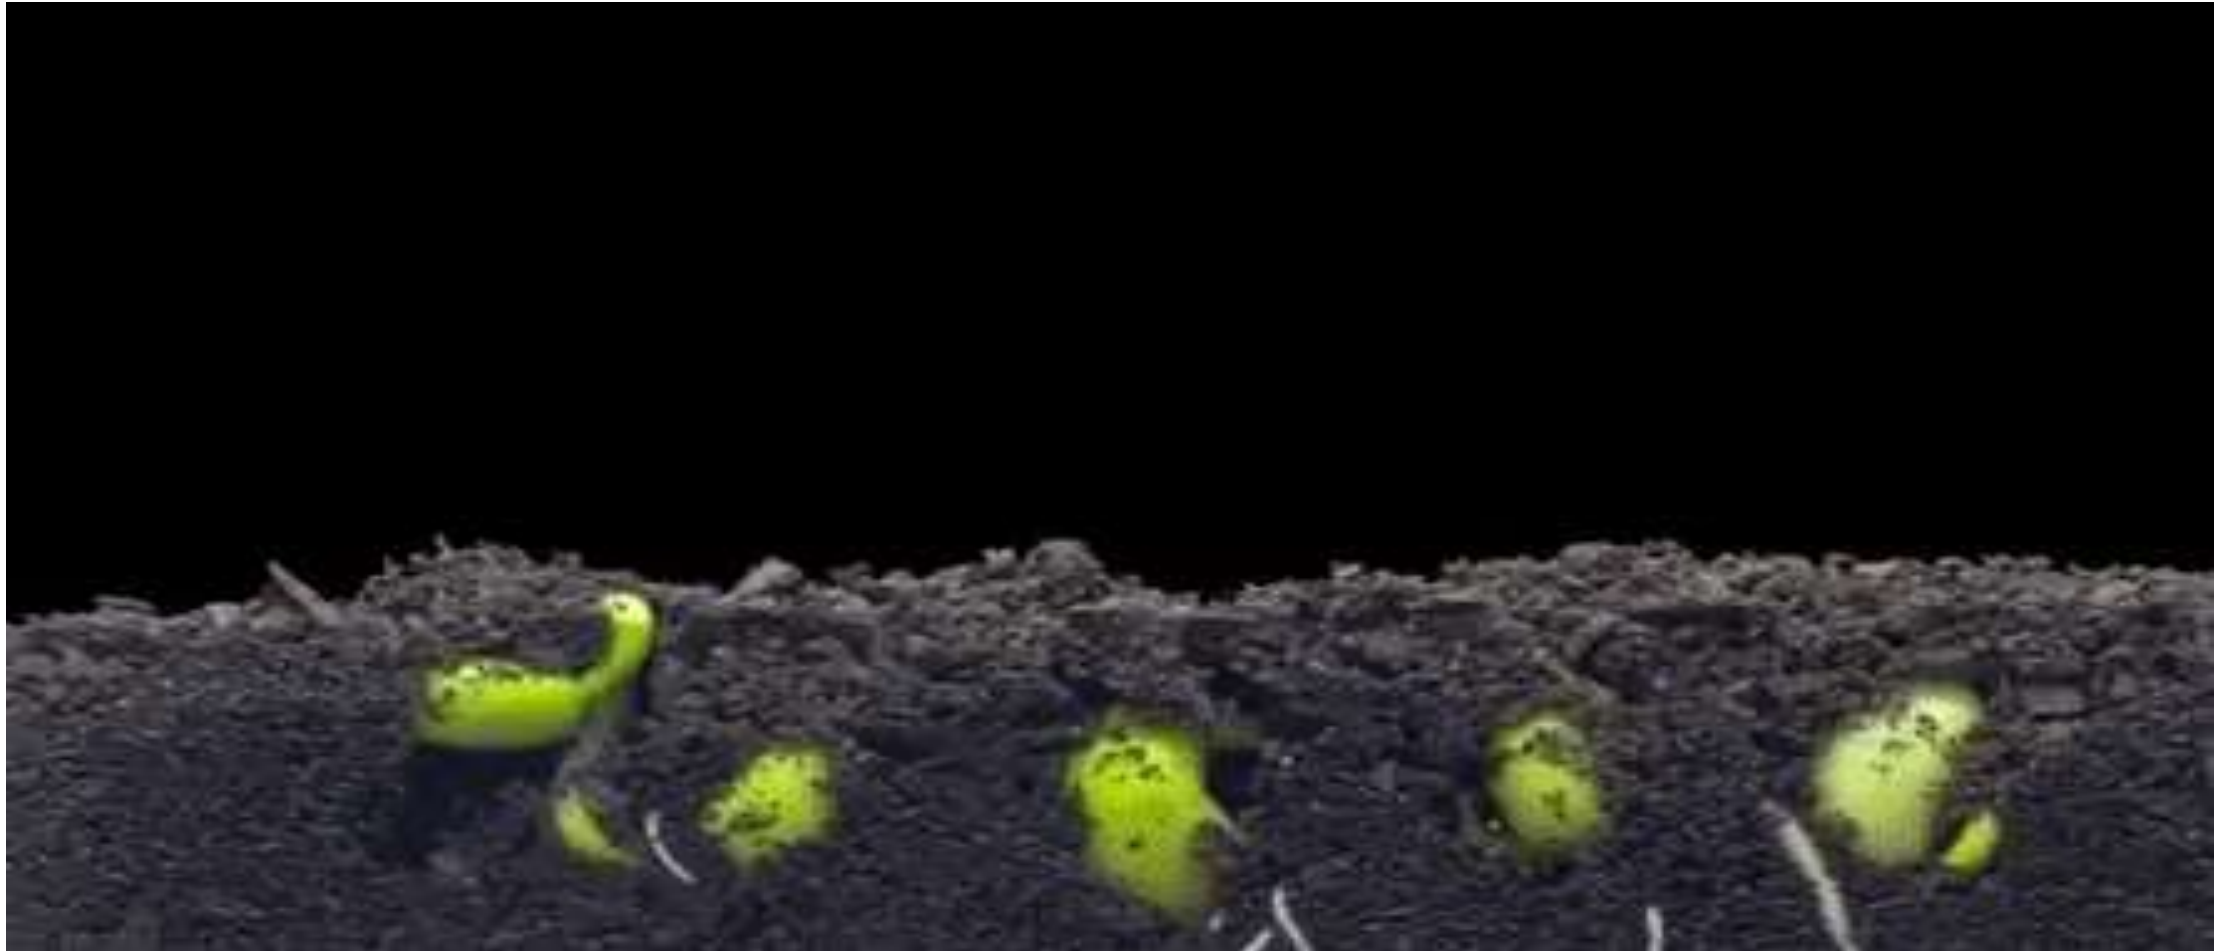

Step 2

- The plant dies after seed dispersal .

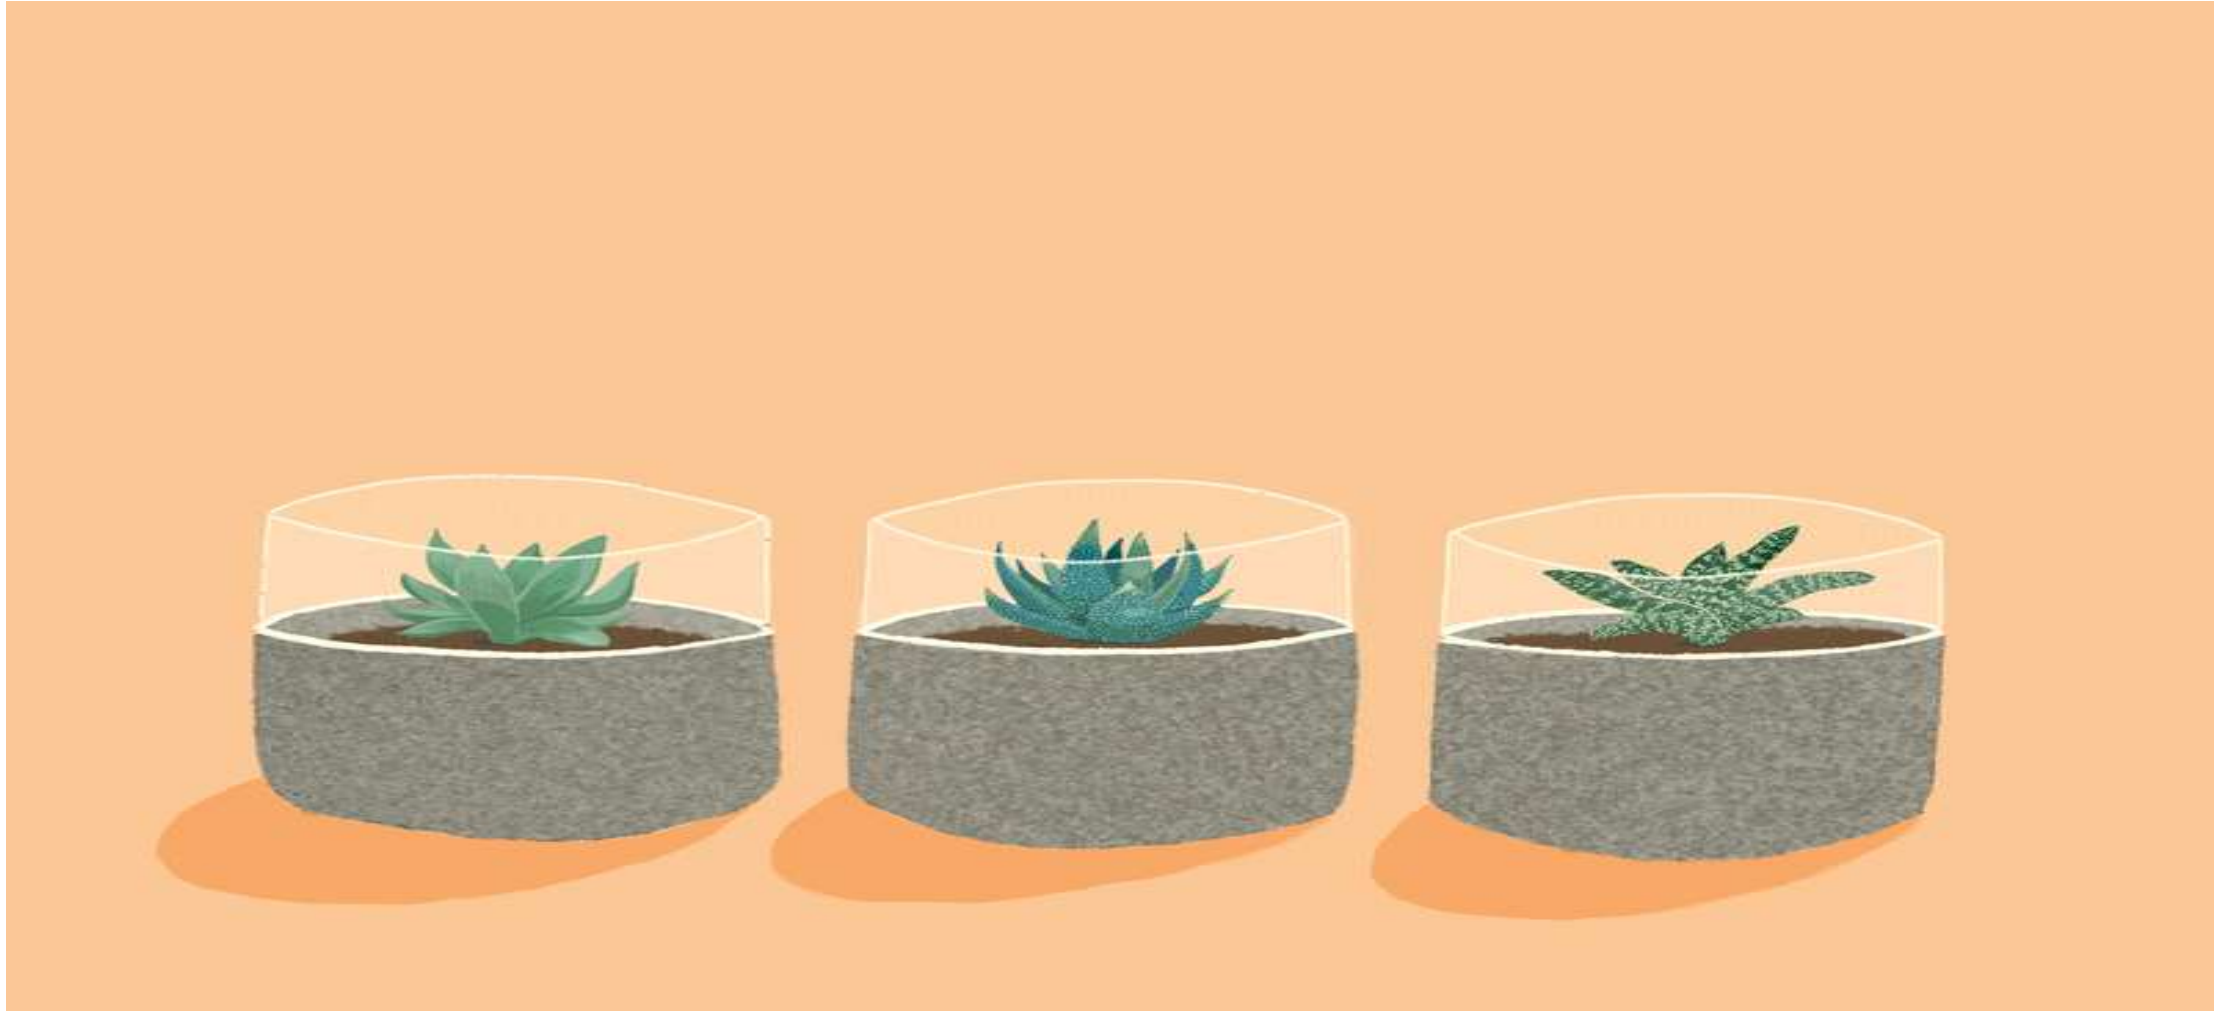

Step 3

Seed germination

Step 4

Growth

Step 5

Pollination

What is
pollination?

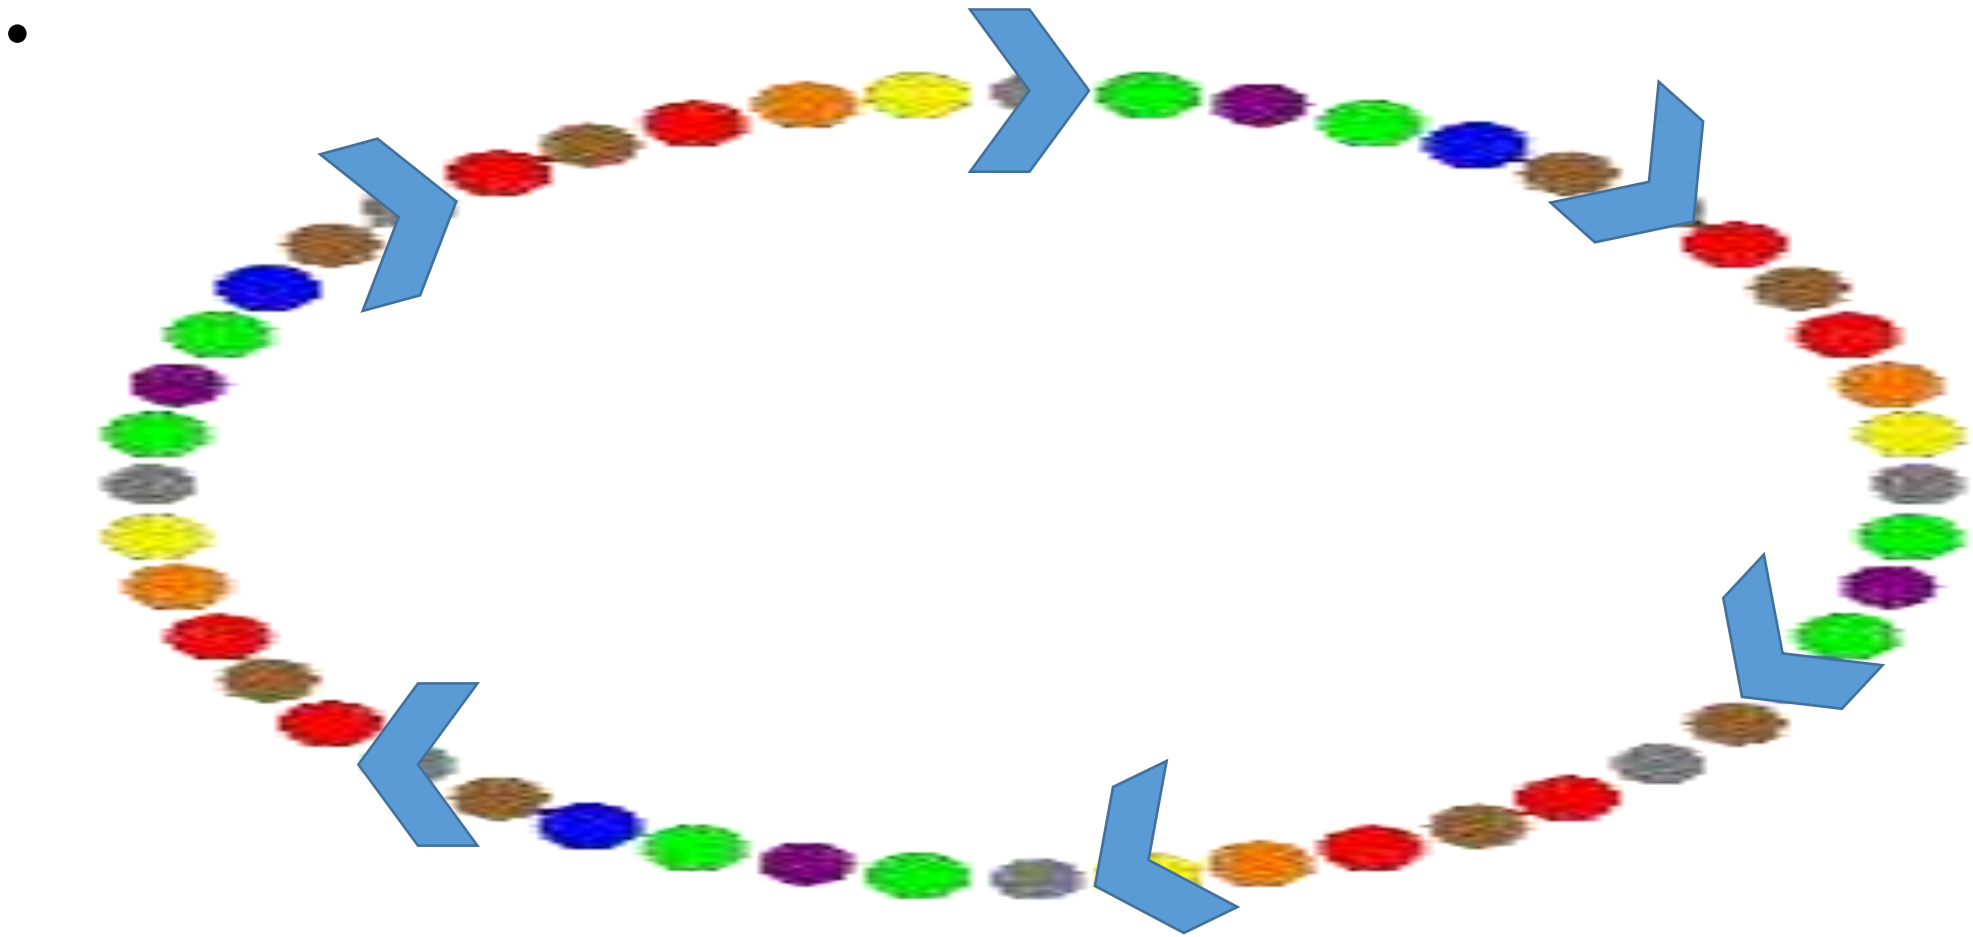

Step 6

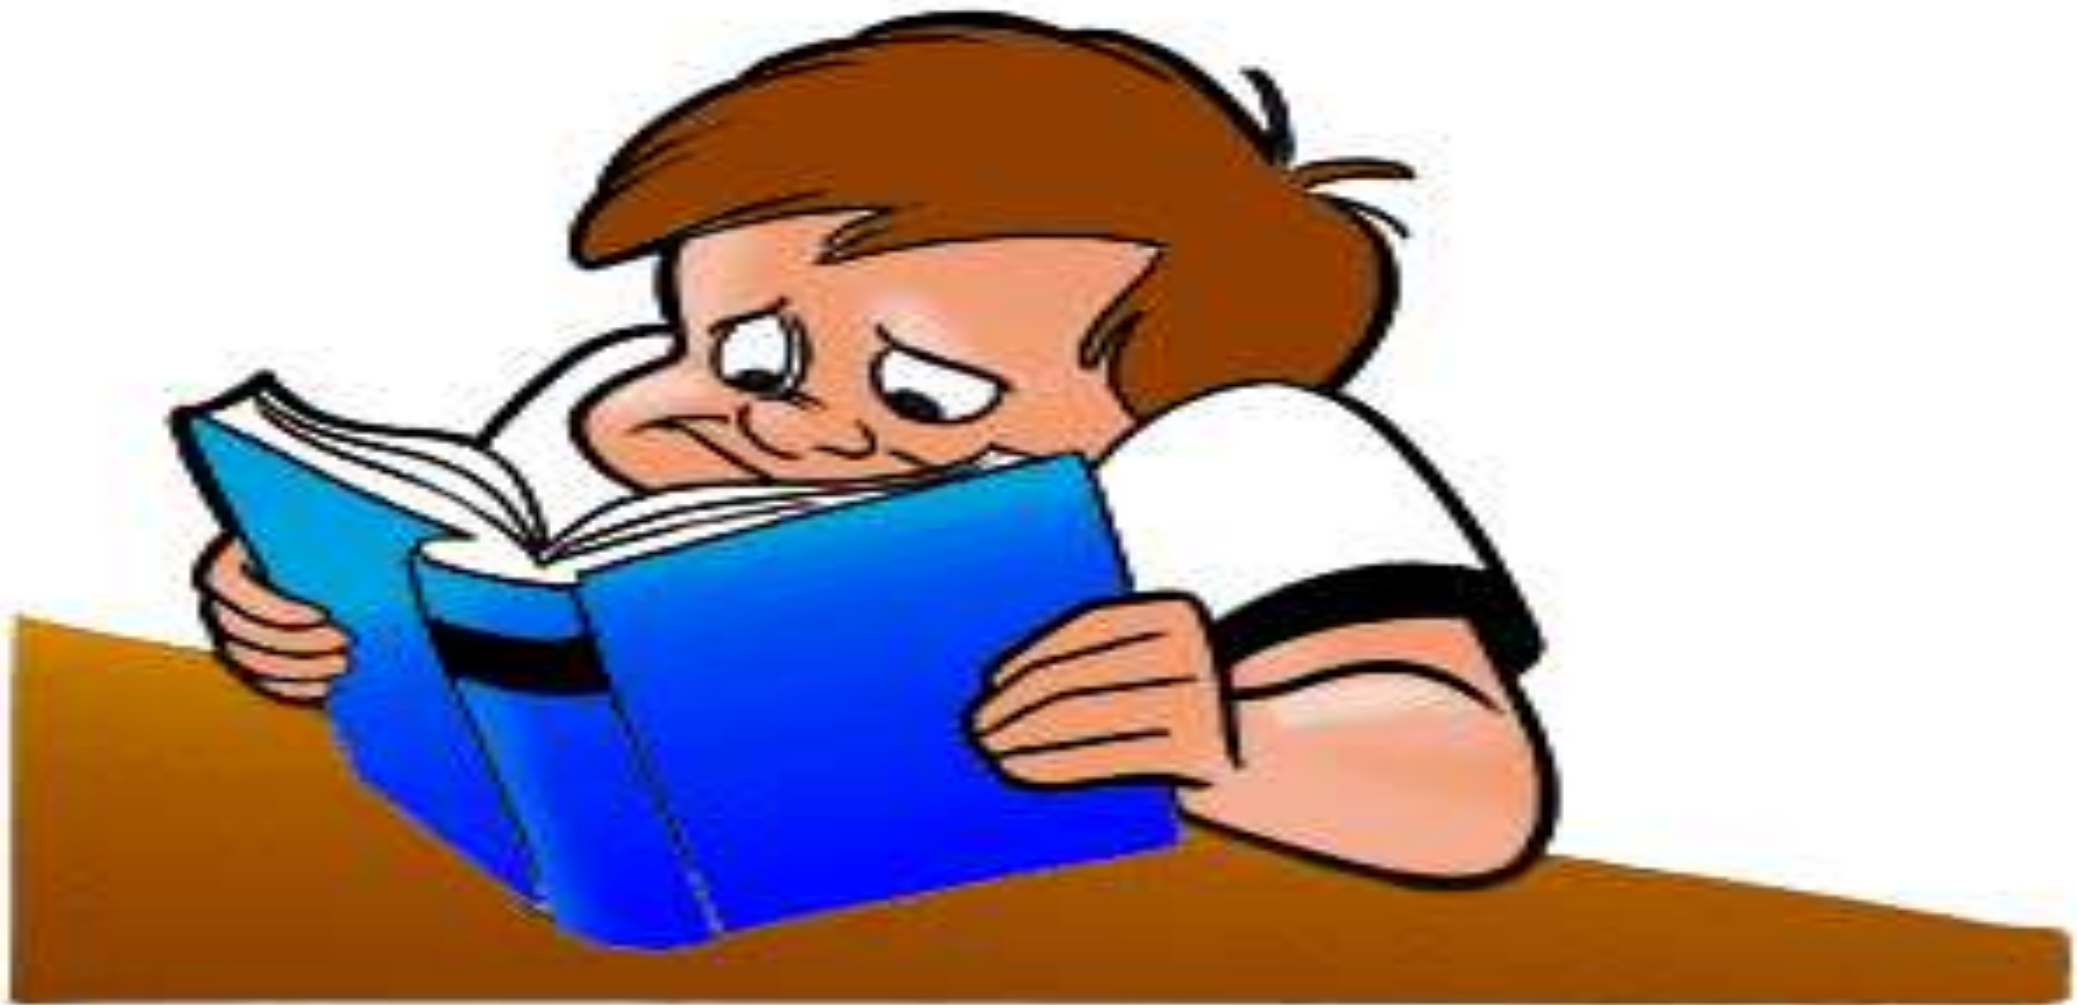

Seed production

And again step 1 to step 6 repeats .

Now let's read our book

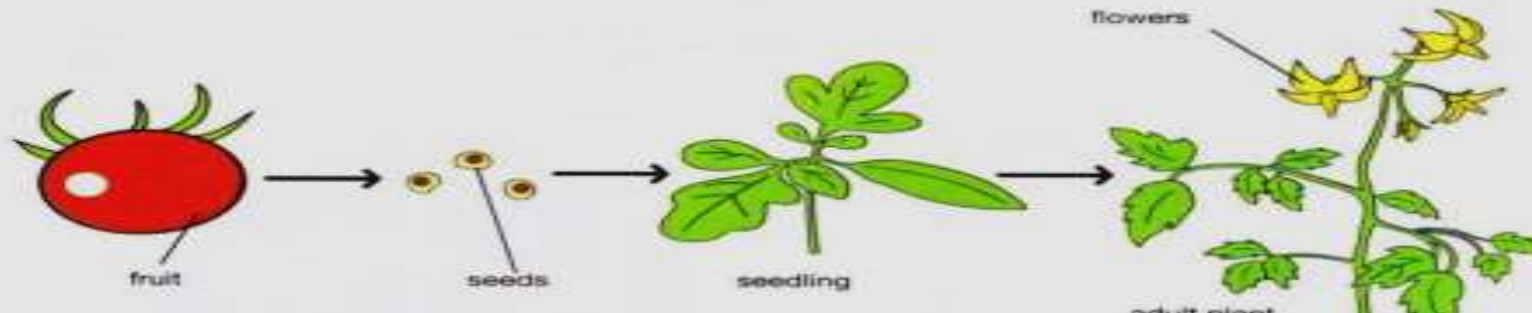

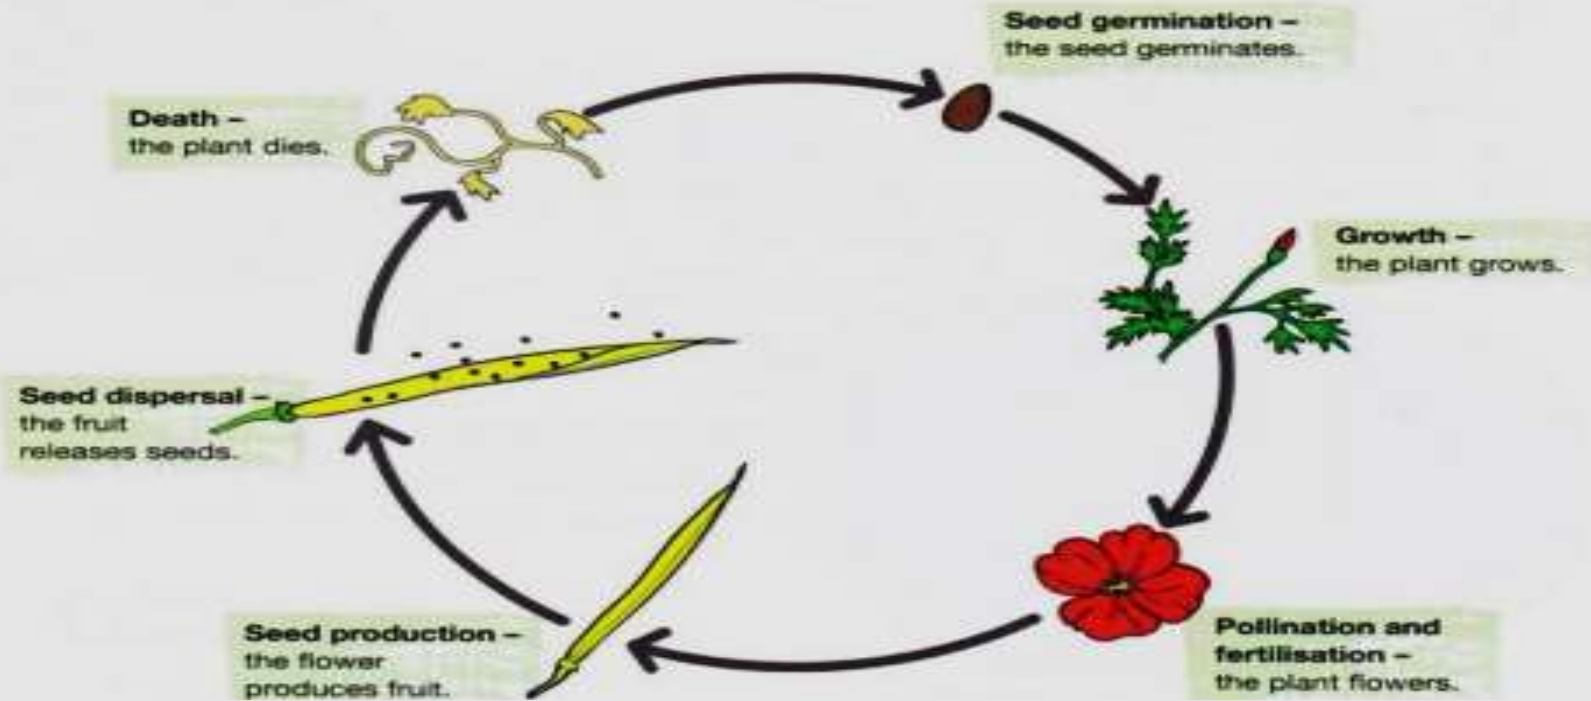

2.7 Plant life cycles

Words to learn
life cycle

Think about all the changes in a plant's life, from a germinating seed until it develops into a grown plant and forms its own seeds. All these changes are called the plant's **life cycle**. Some plants die after they have made their seeds. Other plants flower and make seeds every year.

Can you remember all those steps ?

Bye everything .
