

What is the liquid that you see? Water.

What is in the water? A boy and a sponge.

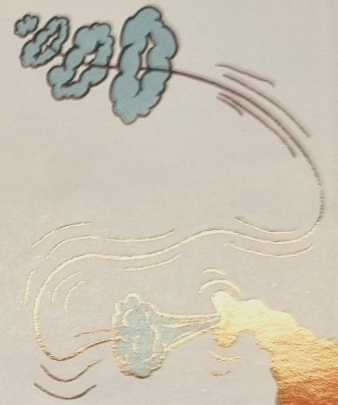

What is in the bathtub? Water.

What has changed about the water? The shape.

**A liquid takes the shape of its container.
Water is a liquid.**

cannot see air,
you can see how it makes things move.

made from **gases**.
take the shape of their container.

**A gas takes the shape of its container.
Air is made from gases.**
