Part E: Reading (10 points)

۵ نمره	<p>متون زیر را بخوانید و به سؤالات داده شده پاسخ دهید.</p> <p>Passage 1</p> <p>The relation between the science of physics and the practical things that come from it is an interesting subject. Sometimes, the knowledge of the scientific basis for an invention comes after the invention has been made and improved. When James Watt built his steam engine in 1769, nothing was known about how heat was changed into mechanical energy. The great practical importance of Watt's engine, however, encouraged scientists to look into this matter, with the result that the new science of thermodynamics was formed. After the basic laws of thermodynamics were discovered, great improvement in the steam became possible, as such later developments as the steam turbine, the gasoline engine, the diesel engine, and the jet engine. Most of the great advances in the understanding of nature and properties of sound waves came after Edison had invented the phonograph and Bell had invented the telephone. As a result, the modern phonograph and telephone are not very much like the original models. So we see how science leads to new inventions and how these new inventions encourage scientists to explore the bases for them.</p> <p>59. According to the passage, sometimes a new device is invented</p> <ol style="list-style-type: none"> 1) after it is improved 2) without any need for it 3) by someone who has no knowledge 4) when there is not enough scientific basis for it <p>60. James Watt's invention of the steam engine encouraged scientists</p> <ol style="list-style-type: none"> 1) to improve the steam engine 2) to build trains and airplanes 3) to explore how heat was changed into energy 4) to learn more about the old science of thermodynamics <p>61. According to the passage, all of the following were affected because of the science of thermodynamics EXCEPT</p> <ol style="list-style-type: none"> 1) the gasoline engine 2) the steam turbine 3) the diesel engine 4) the phonograph <p>62. Watt's invention is a good example of</p> <ol style="list-style-type: none"> 1) the relation between sciences 2) how the gasoline engine works 3) how new inventions encourage scientific exploration 4) a basic and widely used principle of thermodynamics <p>63. Edison, Bell and Watt are all mentioned as</p> <ol style="list-style-type: none"> 1) engineers 2) inventors 3) scientists 4) discoverers 	۱۶

	<p>Passage 2</p> <p>Just imagine how many English dictionaries there are in the world. How do you know which is the best for you? Let's look at the three types of English dictionaries.</p> <p>Bilingual dictionaries: This is probably the first type of dictionary that you bought when you started to study English. Usually, the first half gives English words along with their meaning in another language and the second half gives the words in the other language first and then their meaning in English. This kind of dictionary is suitable for those who have just started learning. You can quickly find how to translate a word from your language into English. But sometimes the meaning of English word is a bit different from the word from other language. Also this kind of dictionary encourages the students to translate instead of thinking in English.</p> <p>Monolingual dictionaries: These dictionaries use just one language to explain the meaning of the words. These dictionaries are good for students with a more advanced level of English. Monolingual dictionary encourages people to think in English and help them practice their English reading skills.</p> <p>Electronic dictionaries: Both monolingual and bilingual dictionaries are available in electronic format. Electronic dictionaries can be really useful if they are properly used. This is especially true with regard to pronunciation, as they often have an audio feature that lets you hear the word spoken. This lets you check your own pronunciation.</p> <p>64. Which kind of dictionary is useful for beginners?</p> <p>65. What does the first half of a bilingual dictionary contain?</p> <p>66. How many languages are used in a monolingual dictionary to explain word meaning?</p> <p>67. A monolingual dictionary improves your English reading skills. a) True b) False</p> <p>68. You can correct your pronunciation by using an electronic dictionary. a) True b) False</p>	۵ نمره
